COVID-19 Delta Variant
The Newest Variant of Concern

**Virus 2.0**
The Delta variant is highly contagious. It is 2 to 3 times more contagious compared to prior strains.

**Heavy Hitter**
It is the dominant strain in the United States.

**2X Hospitalization**
Has a two times higher rate of hospitalizations.

**Effective and Protective**
According to recent data, COVID-19 vaccines are highly effective against this variant and protective against hospitalization and death. While mild cases of COVID-19 after vaccination can develop, COVID-19 hospitalizations and deaths occur mostly in unvaccinated people.

**Who’s at Risk**
At risk groups include unvaccinated and partially vaccinated people.

**Protect Yourself**
Get vaccinated and wear a mask
Get your vaccine to prevent the spread of and illness from the Delta variant. Make your appointment: AtriumHealth.org/COVID19Vaccine.

Wear a mask in public indoor places even if you are fully vaccinated.
