I was exposed to COVID-19 but don’t have symptoms?
If you were around someone who tested positive in the last 14 days, you might still need to get tested – even if you’re feeling fine.

I need a test for work, school or travel?
Sometimes all you need is a negative test, so you can get back to your life.

WHERE SHOULD I GO IF…
I am having COVID-19 symptoms?
Common symptoms include fever, cough, shortness of breath, or loss of taste and/or smell. If you’re having symptoms, you might need both a test and medical care. Start with one of the below options:

The NC Department of Health and Human Services describes several different ways to access COVID-19 testing, including no-cost options. And the SC Department of Health and Environmental Control also describes several different ways to access COVID-19 testing, including no-cost options.
