

# Primary Care Goes Virtual

For years, Atrium Health has offered the convenience of video visits when you're sick. Now you can meet even more of your health needs over secure video chat with Atrium Health Primary Care Virtual Family Medicine, available throughout North Carolina and South Carolina.

## What is Virtual Primary Care?

Unlike on-demand care, virtual primary care isn't just for sick visits – it's for all your routine health care needs, including:

- Management of chronic diseases like diabetes and high blood pressure
- Sick visits, including for colds, rashes and sprains
- Online prescription refills
- Mental health services
- Medicare Annual Wellness Visits
- eVisit secure messaging for minor conditions without an appointment
- Coordination of in-person care such as annual physicals, labs and screenings

## Exceptional care – anytime, anywhere

Secure video appointments are available 24/7 with board-certified physicians and advanced care practitioners, and insurance is accepted, with no extra fees. And if you need to be seen in person, we will coordinate your care.

Along with ease and convenience, you get a care team that really knows you and all the benefits of the region's most trusted primary care provider with Atrium Health.

Find a provider and schedule an appointment at **[AtriumHealth.org/VirtualPC](https://www.AtriumHealth.org/VirtualPC)** or call **704-667-0920**.

## How it works:

1. Log into the MyAtriumHealth app or access MyAtriumHealth.org online a few minutes before your appointment.
2. During your visit, your doctor may ask how you're feeling, explain recent labs and testing or examine physical symptoms.
3. At the end of your visit, your doctor will discuss next steps and, if needed, fill new/existing prescriptions or start coordinating follow-up visits.
