Senior Oncology Clinic

Department of Supportive Oncology

About Us

The Senior Oncology Clinic at Atrium Health Levine Cancer is focused on caring for adults 65 years and older. We work together with your cancer doctor to make sure you receive the best possible care. Our team will work with you to help with any symptoms you may be having, healthy eating, memory, daily activities and other issues.

We are recognized as an **Age-Friendly Health System** and have received designation for our **Commitment to Care Excellence**.

This means our approach to care and the services we provide center around the “4Ms”:

What Matters: Learning what is most important to you and making a care plan to include your wishes.

Medication: Reviewing your medicines to make sure they are working well and safely together.

Mentation: Preventing, screening and managing conditions such as dementia, depression and delirium.

Mobility: Helping patients move safely throughout the day to achieve their goals.

What We Offer

- **Special check-up:** We do a special check-up called “Comprehensive Geriatric Assessment” to take a close look at every part of your health.
- **Care just for you:** Our team makes a plan that is just for you, your health, wants and needs.
- **Team of experts:** We have a team trained in caring for older adults with cancer.
- **All-around support:** We help with everything, such as making treatment side effects easier to manage, and caring for your body, mind and spirit. We can help you and your loved ones connect to helpful support services.
