WHY QUIT NOW?
Bodily risks of tobacco use

Tobacco products have more than 7,000 chemicals and compounds – at least 69 cause cancer.

- Stroke
- Blindness (macular degeneration)
- Impaired sense of smell
- Cancer (lips and mouth)
- Cancer (throat, larynx, pharynx, esophagus and trachea)
- Heart disease
- Chronic obstructive pulmonary disease (COPD)
- Asthma
- Cancer (lung and bronchus)
- Cancer (stomach, liver, colon and pancreas)
- Early menopause
- Cancer (bladder, cervix and rectum)
- Infertility
- Impotence

TIPS

Set a quit date and make a plan.
- Write it down and post it in your home, at work and in your car where you can see it.

Before quitting, clean your house and car to get rid of smells from smoking.

Each day, cut down on the number of cigarettes you smoke by:
- Smoking half of each cigarette.
- Postpone lighting your first cigarette by 1 hour.

Switch brands.
- A new brand will taste different to you.
- Menthols and vaping are unsafe and not recommended.

Make smoking inconvenient.
- Stop buying by the carton.
- Make your pack more difficult to find.

Know your triggers.
- The urge for tobacco only lasts 3 to 5 minutes.
- Find ways to be busy when an urge strikes.

Let friends and family know what support they can provide.

Let us help you.
- With the help of a doctor or counseling program, 95% of smokers are able to quit. And, you can too!
Benefits of being tobacco free

<table>
<thead>
<tr>
<th>TIME:</th>
<th>BENEFIT:</th>
</tr>
</thead>
<tbody>
<tr>
<td>20 minutes</td>
<td>Your heart rate drops</td>
</tr>
<tr>
<td>12 hours</td>
<td>The carbon monoxide levels in your blood drops to normal</td>
</tr>
<tr>
<td>2 weeks to</td>
<td>Your heart attack risk begins to drop; your lung function begins to</td>
</tr>
<tr>
<td>3 months</td>
<td>improve</td>
</tr>
<tr>
<td>1 to 9 months</td>
<td>Coughing and shortness of breath decrease</td>
</tr>
<tr>
<td>1 year</td>
<td>Risk of heart disease is half that of a person who is a smoker</td>
</tr>
<tr>
<td>2 to 5 years</td>
<td>Stroke risk is reduced to that of a nonsmoker and risk of cancer of the</td>

</tr>
</tbody>
</table>

Quitting saves time and money – do the math

How Much Time Would You Save?

<table>
<thead>
<tr>
<th>Cigarettes smoked per day</th>
<th>Average time to smoke a cigarette</th>
<th>Total time spent smoking each day</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>x 6 min. =</td>
<td></td>
</tr>
</tbody>
</table>

When you quit, what will you do with the time you save?

How Much Money Would You Save?

<table>
<thead>
<tr>
<th>Price per pack of cigarettes</th>
<th>Average number of packs per week</th>
<th>Total spent on smoking per week</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>x 52 =</td>
<td></td>
</tr>
</tbody>
</table>

When you quit, what will you do with the money you save?
