What to do if you feel sick

Call ahead. If you have a fever, cough, shortness of breath, or loss of smell and/or taste, stay home, isolate yourself from others and seek care virtually. Most cases of the virus involve mild symptoms and can be safely managed at home. If you're experiencing severe symptoms, such as difficulty breathing, go to the ER – and please call ahead so teams can prepare. If your symptoms are life-threatening, call 911 immediately.

Get care from home.
With Atrium Health's remote care options, you can be screened for COVID-19 and get the medical care you need from the comfort of home at little or no cost to you. To get started, go to AtriumHealth.org/Coronavirus.

Stop the Spread
