

SCOTLAND CANCER TREATMENT CENTER

DukeMedicine AFFILIATE

2015 Annual Report

A QUALITY PROGRAM
OF THE AMERICAN
COLLEGE OF SURGEONS

2015 Annual Report

Message from Leadership

The mission of the Scotland Cancer Treatment Center, Duke Medicine Affiliate continues to be to deliver expert treatment in a compassionate way and inspire hope in our patients. Our Duke Oncology Physicians are able to provide our patients with the highest quality of cancer treatment available in a caring environment that is close to home. We unfortunately had to say goodbye to Dr. Kelvin Raybon as he took a position in Lafayette, Louisiana which will start in January 2016. He is an excellent physician who we have enjoyed working with and wish him the best. Our excellent team of oncologist with the Duke Cancer Network will be staffing our center as we recruit two full time physicians to join our Duke staff here at Scotland.

It has been an exciting time as Hope Gibson, RN became our first dedicated patient navigator. Hope has an active role working with our Duke cancer center physicians and other area physicians as she helps patients who have been diagnosed with lung or colorectal cancer navigate through their treatments. She works with the various offices and directly with the patient coordinating their appointments, tests, and helping to answer questions they may have about their treatment.

Scotland Cancer Treatment Center has an excellent staff of professionals who specialize in cancer care from our oncology certified nurses, radiation therapists, oncology social worker, and oncology pharmacist. They are all supported by staff who work together to provide compassionate care to our patients and instill hope in them as they battle cancer.

Sincerely,

*Dotti Matthews, CMD,
BSRT(R)(T)
Director, Scotland
Cancer Treatment
Center*

Mammogram Assistance Program:

We continued to work with the Scotland Memorial Foundation and Scotland Imaging to provide mammograms for uninsured patients through the foundation. The imaging center performed 228 mammograms with this program of which 7 patients had to have additional views and/or ultrasound. Of those seven, one resulted in a diagnosis of breast cancer.

Prevention Programs:

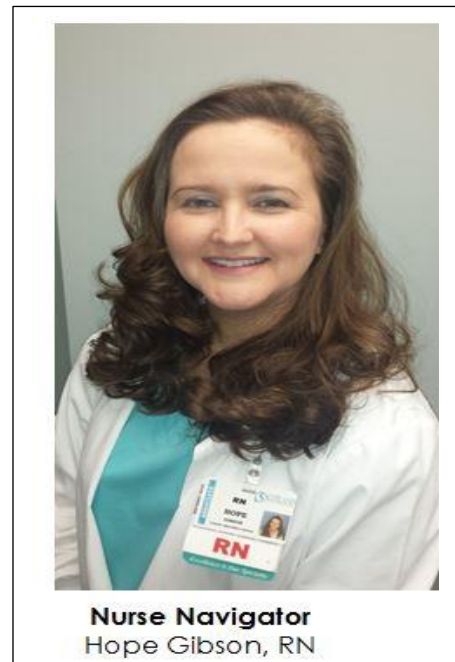

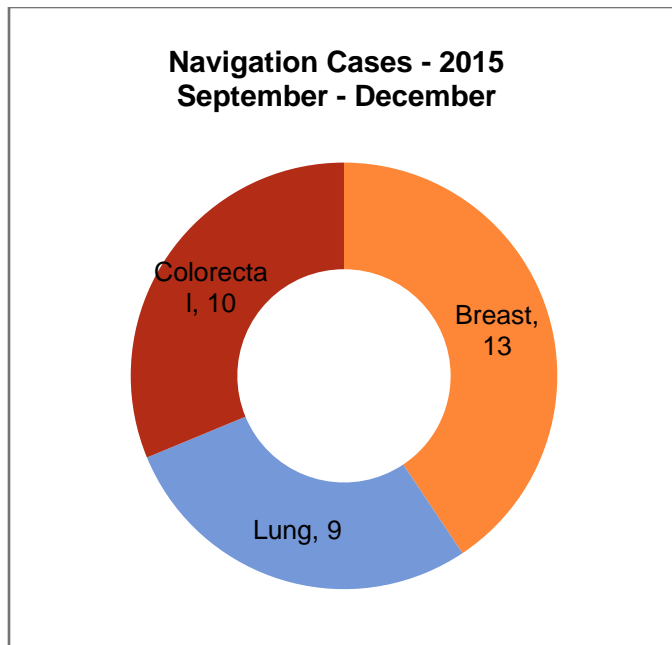

November 19th “The Great American Smoke Out” was held in main lobby of the hospital by Hope Gibson, cancer center lung navigator, along with Community health navigator, Patrick Bines. Twenty people filled out a survey onsite about the effectiveness of the campaign. Fifteen people stated they will consider quitting after speaking with us, 17 indicate they found information useful. A drawing was done at the end of event for a Wal-Mart gift card.

November 19th - Hope Gibson, cancer center lung navigator, spoke on the radio along with Lynn Soles, assistant director of imaging center. She talked about the statistics for Scotland Co. as well as National statistics for lung cancers and related deaths. Lynn spoke about new Low Dose CT screenings.

If you would like more information on Low Dose CT Screenings please call Chris Hogan, Director or Lynn Soles, Asst. Director of Scotland Health Care Systems Imaging Services at (910) 291-7729

Patient Navigation Program:

2015 Marked the beginning of our patient navigation program. Hope Gibson, RN, became Scotland Cancer Treatment Center’s first patient navigator. We began our navigation program focusing on breast cancer patients, lung cancer patients and patients with colorectal cancer. The Community Needs Assessment showed the greatest need in our area was with the lung and colorectal patients due to the high number of smokers and people with unhealthy lifestyles in Scotland County. Our navigation area is now focusing on those two areas and Hope is working with area physicians through the cancer center to help navigate these patients through their cancer treatment.

Standard 1.8: COMMUNITY OUTREACH

Women's Health Event:

The annual Women's Health Event was held Saturday, February 7th at a local church. A full day event focused on the health issues of women. Topics include physical fitness, chronic disease, financial concerns, health screenings, advance directives, and cancer concerns. Sylvia Baffour was our key note speaker. She spoke on "Learning, Laughing, and Loving More than Ever Before". The effectiveness of the program and her speech was apparent by the show of hands when she asked the audience if what they learned today would help them make choices to live a healthier lifestyle. All women in attendance raised their hands saying they had learned things to help them make better choices.

Men's Health Event:

The Men's Health Event was held on June 18th of this year which was attended by 68 men. We continued to work with the Scotland Memorial Foundation and area physicians to screen men for prostate cancer by having a day prior to this event for prostate exams and to check PSA levels on the registered men who would like to have this done.

WHAT CANCER CAN'T DO

Cancer Is So Limited

*It cannot cripple love,
It cannot shatter hope,
It cannot corrode faith,
It cannot eat away peace,
It cannot destroy confidence,
It cannot kill friendship,
It cannot shut out memories,
It cannot silence courage,
It cannot reduce eternal life,
It cannot quench the spirit,
It cannot lessen the power,
of the resurrection.*
