Atrium Health Wake Forest Baptist Medical Center
Community Health Needs Assessment Implementation Strategy
Calendar Year 2022 – 2024

Introduction

North Carolina Baptist Hospital, the hospital component of Atrium Health Wake Forest Baptist Medical Center (North Carolina Baptist Hospital herein referred to as “AHWFBMC”), is a North Carolina non-profit corporation and is a part of Atrium Health Wake Forest Baptist (“AHWFB”), a preeminent, internationally recognized academic medical center with balanced excellence in patient care, research and education.

Atrium Health Wake Forest Baptist includes the following:

1. An integrated clinical health system – anchored by Atrium Health Wake Forest Baptist Medical Center, an 885-bed tertiary-care hospital in Winston-Salem – that includes Brenner Children’s Hospital, five community hospitals, more than 300 primary and specialty care locations and more than 2,700 physicians; and
2. Wake Forest University School of Medicine, the academic core and a recognized leader in experiential medical education and groundbreaking research that includes Wake Forest Innovations, a research enterprise focused on advancing health care through new medical technologies and biomedical discovery.

AHWFBMC is accredited by The Joint Commission and has been committed to providing for the health care needs of northwest North Carolina and southwest Virginia since the 1920s.

Vision

Atrium Health Wake Forest Baptist Medical Center’s vision is to be the first and best choice for care.

Mission

Atrium Health Wake Forest Baptist Medical Center’s mission is to improve health, elevate hope and advance healing – for all.

Culture Commitments

Atrium Health Wake Forest Baptist Medical Center’s culture commitments include the following:

- We create a space where all *Belong*
- We *Work as One* to make great things happen
- We earn *Trust* in all we do
- We *Innovate* to better the now and create the future
- We drive for *Excellence* – always

AHWF BMC is committed to improving access, community health, and addressing the needs of our most vulnerable communities. As a result, we will emphasize identifying the places (e.g., zip codes, census tracts, neighborhoods, streets), partners, people, and aspects of poverty that we need to engage and address in our communities as we implement strategies.

We strive to be a leader in population health, health equity, and social impact as we look beyond the walls of our hospitals and medical offices to address social, economic, and environmental conditions that contribute to poor health outcomes, shortened lives, and higher health care costs of the communities we serve.

Community Served

AHWF BMC serves a 24 county service area that encompasses two states, North Carolina and Virginia, and a more immediate service area of seven contiguous counties. Forsyth County residents represent 34% of total inpatient admissions and 58% of total emergency department visits for calendar year 2020. AHWF BMC’s community served is defined as Forsyth County, North Carolina.

Forsyth County is located in the Triad region of North Carolina. The county covers approximately 408 square miles and has a population of approximately 937 residents per square mile.¹ With 382,295 residents in 146,816 households, Forsyth County is the fourth most populous county in North Carolina. The population is 56.3% white, 27.5% Black or African

¹ https://censusreporter.org/profiles/05000US37067-forsyth-county-nc/
American, 13.3% Hispanic or Latino, 2.6% Asian, and 0.3% other. The population is 52.7% female and 47.3% male. Persons under 18 years of age represent 22.7% of the population while persons 65 years of age and over represent 16.4%. The percentage of persons without health insurance and under the age of 65 years old is 14.2%. In addition, the median household income in 2019 dollars is $51,569. The percent of persons in poverty is 15.2%.2

Forsyth County is ranked third from last in the United States in terms of economic mobility. This means that if you are born poor in this county, the odds of getting out of poverty are worse than many other places in the entire country. One reason for the lack of economic mobility in Forsyth County is that fewer new jobs are being created for workers with only a high school diploma. Of the 11.6 million jobs created since the Great Recession, 99% have targeted workers with at least some postsecondary education.3

According to the 2020 Forsyth County, State of the County Health (SOTCH) Report, chronic diseases and health conditions are the leading causes of death in Forsyth County. Although the rate has decreased to 157.9 (per 100,000) between 2015 and 2019, cancer remains the number one cause of death in Forsyth County. Mental health continues to be a health crisis for Forsyth County, although the number of residents who visited the Emergency Department (ED) for mental health reasons in 2020 (2,318) declined from the previous year’s total (2,746).

While Atrium Health Wake Forest Baptist Medical Center’s community served is defined at county level, special attention was placed on several defined populations and neighborhoods within the county to understand the diversity of the County’s population. In particular, the Medical Center seeks to understand and include communities who are historically marginalized, underserved, and who experience health inequities.

### 2022-2024 Community Health Needs Assessment

During 2021, AHWFBMC conducted a Community Health Needs Assessment (“CHNA”) for the calendar years 2022-2024 to identify the health needs of Forsyth County. The CHNA process involved the collection of primary data from community surveys, conversations, focus groups, and interviews. In addition, secondary data sources were examined that included state level data (e.g., North Carolina State Center for Health Statistics, Healthy North Carolina 2030), county level data (e.g., State of the County Health (SOTCH) Reports from health departments), and community level data (e.g., neighborhood initiatives, community organizations). The process to identify priority health needs and to locate primary and secondary data sources involved close collaboration with partners, particularly the Forsyth County Department of Public Health and Novant Health Forsyth Medical Center. In determining our criteria for priority health needs selection, the highest weights were placed on the health disparities associated with the need, the burden of the health need, the feasibility of possible interventions, and the importance the community placed on addressing the need. Upon completion of the CHNA, results of the assessment were shared with leaders at AHWFB and other key contributors for input.

The following CHNA priorities were identified and approved by the Board of Directors on December 8, 2021.

---

3 Source: Winston-Salem State University’s Center for the Study of Economic Mobility, 2018.
1. **Access to Care**: with a focus on special populations who experience significant financial, health insurance coverage, transportation, location, time, health and health system knowledge, and agency barriers.

2. **Social Impact and Injustice**: with a focus on the following factors that influence health
   a. Food insecurity in underserved neighborhoods
   b. Race and culture
   c. Lack of awareness of resources
   d. Inability to work due to medical conditions
   e. Lack of affordable housing and poor housing conditions
   f. Poverty
   g. Education – universal Pre-K

3. **Chronic and emerging diseases, and key health conditions and indicators** including:
   a. Cancer
   b. Diabetes
   c. Heart Disease
   d. Hypertension
   e. Cerebrovascular disease
   f. COVID-19

4. **Maternal and Child Health and Infant Mortality**

5. **Mental Health and Poly-substance Use**

The 2022-2024 CHNA process found that the community identified social impact and injustice as a significant health priority that greatly influences the health of the community particularly its most vulnerable and underserved populations and individuals. The distribution of behaviors and health outcomes consistently follows social and economic patterns. Furthermore, some barriers to accessing care continue to prevent current programs and initiatives from reaching the populations in need. These challenges present important opportunities for the future. As we move forward as an integrated community of healthcare, social services and community leadership, we can leverage community assets and access to resources from the Atrium Health enterprise to improve the health of residents in Forsyth County.

AHWF BMC acknowledges the importance of all health needs in the Forsyth County community even though the hospital’s resources and assets were best aligned to focus on the prioritized health needs addressed above. Community needs that were identified but not prioritized for the 2022-2024 CHNA are as follows:

- Dental health
- Employment or job finding services
- Domestic Violence services
- Sexual health
- Unintentional injuries
- Motor vehicle injuries
• Septicemia
• Human Immunodeficiency Virus (HIV)
• Homicide
• Teen birth rate
• Short-term suspensions
• Incarceration rate
• Access to exercise opportunities

AHWF BMC leadership will continue to partner with community-based and non-profit organizations, public health and other governmental agencies, and the broader community to help address these health needs.

**2022-2024 Community Health Needs Assessment Implementation Strategy Development**

This accompanying document to AHWF BMC’s 2022-2024 CHNA outlines strategies designed to improve health through hospital programming and support for external community initiatives led by community coalitions and organizations. The list of outlined strategies will describe planned actions to address the community health needs that were identified through its CHNA process. In addition, hospital leaders will use this document to communicate the goals, objectives and approaches that the hospital will undertake to address community needs over the next three years, and help the community understand its role in addressing those needs.

The current set of strategies and related resources were identified by reviewing the Atrium Health Wake Forest Baptist Social Impact Inventory, the hospital’s Program Inventory, the previous strategies outlined in the 2020-2022 CHNA Implementation Strategy, and other sources of information identified by the CHNA team leads. Additional existing programming and resources were identified through conversations with hospital and community leaders who have leadership responsibilities in addressing the priority health needs in Forsyth County. These existing strategies were evaluated to determine if the hospital could build upon community assets, refocus the existing program to meet prioritized health needs, and reallocate internal resources for the strategies.

After identifying existing strategies & programming that would continue to meet the priority needs of the current CHNA cycle, attention then focused on identifying new strategies that would allow the hospital to:

- be consistent with the hospital’s organizational strengths and community capabilities
- assess availability of hospital and/or community resources to carry out the strategy.
- achieve short-term and long-term results
- identify barriers that might exist
- create partnerships and generate community support

In developing new strategies, AHWF BMC initially reflected on how it might effectively lead, compared to being a supportive partner for, other organizations designed to achieve collective impact. Additionally, the three levels of prevention were considered during the development process: 1) Primary prevention – preventing disease from occurring, 2) Secondary prevention – finding and treating the disease early, and 3) Tertiary prevention – targeting people with
symptoms and making them healthy again. Multiple factors were considered that impact health, including individual behavior, community/social supports, and government health policies. Finally, the following evidence-based interventions were investigated:

- Community Health Improvement Navigator, CDC (http://www.cdc.gov/chinav/database/index.html)
- Evidence-based Practice Centers, AHRQ (http://www.ahrq.gov/clinic/epc/)
- Guide to Community Preventive Services, CDC (www.thecommunityguide.org)
- The Cochrane Collaboration (http://www.cochrane.org/)
- County Health Rankings and Roadmaps (www.countyhealthrankings.org/)
- Healthy People interventions and resources (www.healthypeople.gov)
- Healthy Communities Institute (www.healthycommunitiesinstitute.com)

AHWF BMC addressed each of the community health needs prioritized in the 2022-2024 CHNA when developing its implementation strategy action plan. Specific implementation strategies for each prioritized health need are included below. Over the next three years, additional strategies may be added to this action plan as opportunities arise from the identification of new health trends, health system resources, and community resources and partnerships.

### PRIORITIZED HEALTH NEED: ACCESS TO CARE

<th>Potential Partners or External Organizations</th>
</tr>
</thead>
</table>
| Prevent, detect or manage the following chronic and emerging diseases, while limiting long-term complications that may result: cancer, diabetes, heart disease, hypertension, Cerebrovascular disease, and COVID-19 | **Strategy 1:** Work with physicians or Advanced Practice Providers (APPs), and community organizations to improve care, prevention and management of diabetes by referring any known member of the community diagnosed with this disease to Gateway to Success program to get better management with their diabetes. The Gateway to Success program is an evidence-based program that uses an integrated care model for diabetes prevention and management for low-income participants diagnosed as prediabetic or with Type 2 diabetes. The program helps participants manage or improve their health through life-style changes including good nutrition, weight loss, exercise, and better behavioral health. | - Number of individuals referred to Gateway to Success program.  
- Number of referred participants improving and/or maintaining A1C levels.  
- Number of referred participants improving and/or maintaining their BMI levels.  
- Number of referred participants in individual or group exercise sessions.  
- Number of referred participants in behavioral health/nutrition education programming  
- Number of referred participants in one-on-one wellness coaching | - The YMCA of Winston-Salem Forsyth County  
- Novant Health |
| | **Strategy 2:** Improve community approaches to childhood obesity, a precursor to other chronic diseases into adulthood by understanding the social determinants of health influences on weight, tackling root causes of obesity to both promote wellness and to reduce complications and other chronic diseases that may result. | - Number of participants in the culinary medicine program  
- Number of food security periodic screenings leading to referrals to Brenner FIT  
- Number of instruction sessions aimed at teaching culinary medicine to medical students & other professionals on the front line | - YMCA of Northwest North Carolina  
- American Heart Association  
- Imprints Cares, Parenting Path |
Brenner FIT will be engaged to assist with this strategy. Brenner FIT is an interdisciplinary program focused on evidence-based approaches to preventing and treating childhood obesity and is involved with clinical treatment, research, education, and community engagement. Brenner FIT targets any child and family with concerns about their child’s weight, and makes a concerted effort to especially reach children of color and eliminate barriers to care, including distance, language barriers, and lack of insurance reimbursement for core services. The program’s community activities are focused on children in urban and under-resourced areas, with a designated bilingual (Spanish) team.

<table>
<thead>
<tr>
<th>Strategy 3: Manage indigent community members with chronic conditions by deploying care management resources, including Wake Connect. Wake Connect increases access to primary care for indigent community members with complex chronic conditions resulting in frequent ED and IP admissions. By identifying and proactively engaging with these individuals, the program works to enhance coordinated care practices; reduce improper ED utilization; and assist in connecting community members with social service resources. Wake Connect reduces the cost of care by supporting community members’ proper use of healthcare services available within the broader community.</th>

| Increase the number of programs and services that are designed to improve the health of mothers and their children. | Strategy 1: Ensure all newborns discharged have a place that they can sleep safely at home. Safe Sleep for all Newborns is a program that serves all newborns at Atrium Health Wake Forest Baptist Medical Center (and two network hospital locations) to ensure all discharged newborns have a place where they can sleep safely at home, which is proven to lower sudden infant death syndrome (“SIDS”) and infant mortality. Safe Sleep also refers families to Cribs for Kids, which engages a social worker to provide a mobile and easy-to-transport Graco Pack-N-Play. | - Number of newborns identified who do not have a safe place to sleep  
- Number of families referred to Cribs for Kids.  
- Number of mobile Pack-N-Play units provided that were funded by the hospital | Cribs for Kids. |
|                                                                      | Strategy 2: Ensure children in the community have proper protection and safety while traveling in vehicles. | - Number of car seats distributed to individuals with children |                                                                                                                                                                                 |
|                                                                      | Strategy 3: Increase availability of pre- and postnatal care services, especially in high-risk populations, through support programs including Nurse Education and Support Team (NEST), a home visiting program designed to meet the needs of all women residing in Forsyth County, NC. Information and/or referrals for local services and resources are provided within the first few days after delivery by a NEST Coordinator. An assessment is completed in person in a community setting or by video/phone by a NEST Nurse within the first 2-3 weeks postpartum to evaluate and address acute postpartum issues and provide education and support for postpartum women and their families. A follow-up phone call is also made by a NEST Coordinator about six weeks after delivery to determine the need for utilization of additional services, resources, and/or referrals. | - Number of clinical assessments performed for post-partum concerns  
- Number of hospital readmissions for complications after delivery for postpartum women  
- Number of community screenings for postpartum depression  
- Number of postpartum women residing in Forsyth County scheduled to have a nurse home visit two-three weeks after delivery  
- Number of scheduled/completed two to three week postpartum nurse visits completed.  
- Number of follow-up calls at 6 weeks post-partum | School Health Alliance  
Winston-Salem Forsyth County School System |
|                                                                      | Strategy 4: Connect youth to primary medical and mental health providers through collaboration with and support of the School Health Alliance, an external program that works with the Winston- | - Cost of partnership/collaboration with School Health Alliance |                                                                                                                                                                                 |
Salem Forsyth County School system and the WSFC Social Work Department to build linkages among schools, health care providers, and faith communities to more effectively serve the needs of students and their families. Utilizing the AHWFBC mobile health clinic, the program serves students at Cook Elementary, Carver High, Parkland High, and Hanes Middle by providing full medical and mental health screenings, as well as treatment and referrals.

<table>
<thead>
<tr>
<th>Prioritized Health Need: Mental Health and Poly-substance Use</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Goal</strong></td>
</tr>
</tbody>
</table>
| Improve access to mental health and substance abuse services for vulnerable populations | **Strategy 1:** Assist homeless adults, many of whom experience severe and persistent mental illness and substance abuse issues, with exiting homelessness through access to mental health and/or substance abuse services, other health care services, housing opportunities, employment assistance, disability assistance, or other needed services by providing street outreach and case management through the Empowerment Project. The team will conduct outreach to adult individuals who are homeless or at imminent risk of becoming homeless in Forsyth County, NC. These individuals will be outreached on the streets, shelters, and other community settings. Individuals may receive case management services for up to six months or until the individual is stably connected to a health care provider of his/her choice. | • Number of community outreach encounters completed in a year  
• Number of people enrolled in case management  
• Average number of months an individual spends in case management  
• Number of people assisted with the following: Housing, employment, transportation to medical/dental appointments, food, health insurance  
• Number of people assisted with mental and/or substance abuse disorders  
• Cost of support for Bethesda Center  
• Cost of support for Samaritan Ministries | • United Way’s Continuum of Care  
• City with Dwellings  
• Samaritan Ministries  
• Bethesda Center for the Homeless  
• Experiment in Self Reliance (ESR)  
• Salvation Army |
| | **Strategy 2:** Collaborate with CareNet, a statewide community-based counseling organization affiliated with AHWFBC, which provides spiritually-integrated counseling care, psychotherapy, and education in local communities. | • Number of clients served  
• Number of client hours | • CareNet local boards  
• Screening for Mental Health (nonprofit organization)  
• Various civic, religious, and professional groups |

**CHNA Implementation Strategy Updates**

Atrium Health Wake Forest Baptist Medical Center will update and sustain this CHNA implementation strategy over the next three-years, paying attention to new community and hospital resources, and evaluating results of community benefit programs. The evaluation will
determine if strategies are being carried out as planned and achieving desired results. As the programs are evaluated, the hospital may:
  o Change a program to improve its quality or effectiveness,
  o Expand a program to other geographic areas or populations, or
  o Eliminate/replace a program with an alternate approach.

**CHNA Implementation Strategy Adoption**

The Atrium Health Wake Forest Baptist Medical Center Board of Directors approved this Implementation Strategy through a board vote on May 12, 2022.
