

Atrium Health Wake Forest Baptist

High Point Medical Center 2022 – 2024 Community Health Needs Assessment

Section I: Introduction

Atrium Health Wake Forest Baptist High Point Medical Center has a deep, rich history in the community that began in 1904. As the organization grew over time, the hospital developed into the health system that we have today. That growth has helped us continue to fulfill our mission to provide exceptional health services to the people of our region of greater than 600,000 people. Atrium Health Wake Forest Baptist High Point Medical Center has 352 licensed beds and provides many services to our community including: the Hayworth Cancer Center, Piedmont Joint Replacement Center, the Congdon Heart and Vascular Center, Esther R. Culp Women’s Center, Neuroscience Center, Imaging Services, Orthopaedic Services, Inpatient Pediatrics, Birth Center, Urgent Care, the Stroke Center, Pain & Spine Management, Rehabilitation Services, Behavioral Health and the Fitness Center.

Vision

Atrium Health Wake Forest Baptist High Point Medical Center’s vision is to be the first and best choice for care.

Mission

Atrium Health Wake Forest Baptist High Point Medical Center’s mission is to improve health, elevate hope and advance healing – for all.

Culture Commitments

Atrium Health Wake Forest Baptist High Point Medical Center’s culture commitments include the following:

- We create a space where all *Belong*
- We *Work as One* to make great things happen
- We earn *Trust* in all we do
- We *Innovate* to better the now and create the future
- We drive for *Excellence* – always

Mission Alignment

As Atrium Health Wake Forest Baptist High Point Medical Center strives to be a leader in population health, we must look beyond the walls of our hospitals and medical offices to address those social, economic, and environmental conditions that contribute to poor health outcomes, shortened lives, and higher health care costs of the patients we serve. This needs assessment is based on a set of best practices for community health assessments with the purpose of identifying regional priority areas to focus on for 2022–2024. The process was designed to rely on existing public data, directly engage community stakeholders and collaborate with local public health resources, other health providers, and community partners (such as faith networks and other nonprofit organizations) relevant to the social factors underlying patterns of access.

Section II: Definition of Community Served

Geography

High Point, NC is spread across four counties in North Carolina: Guilford, Forsyth, Davidson and Randolph. Atrium Health Wake Forest Baptist High Point Medical Center defines its service area to include the following zip codes: 27205, 27260, 27262, 27263, 27265, 27282, 27292, 27317, 27350, 27360, 27370, and 27407. These encompass the greater High Point community including Archdale, Trinity, Jamestown and other southwestern portions of Guilford County. However, the majority of inpatient admissions and emergency visits are provided to Guilford County residents, representing 50% and 52% respectively of the total patient volume for calendar year 2020.

In order to allocate resources and maximize the effectiveness of community initiatives, for the purposes of conducting this Community Health Needs Assessment, Atrium Health Wake Forest Baptist High Point Medical Center chose to narrow the focus to Guilford County and will focus special attention to neighborhoods that are geographically proximate to the hospital campus, have a poverty rate approaching 18%, have a high percentage of charity care patients, and have a density of high-risk patients who demonstrate poor health indicators.

These communities are primarily located in the High Point zip codes of 27260 and 27262, which are identified as areas with the greatest need areas on the SocioNeeds Index map (Figure 1).

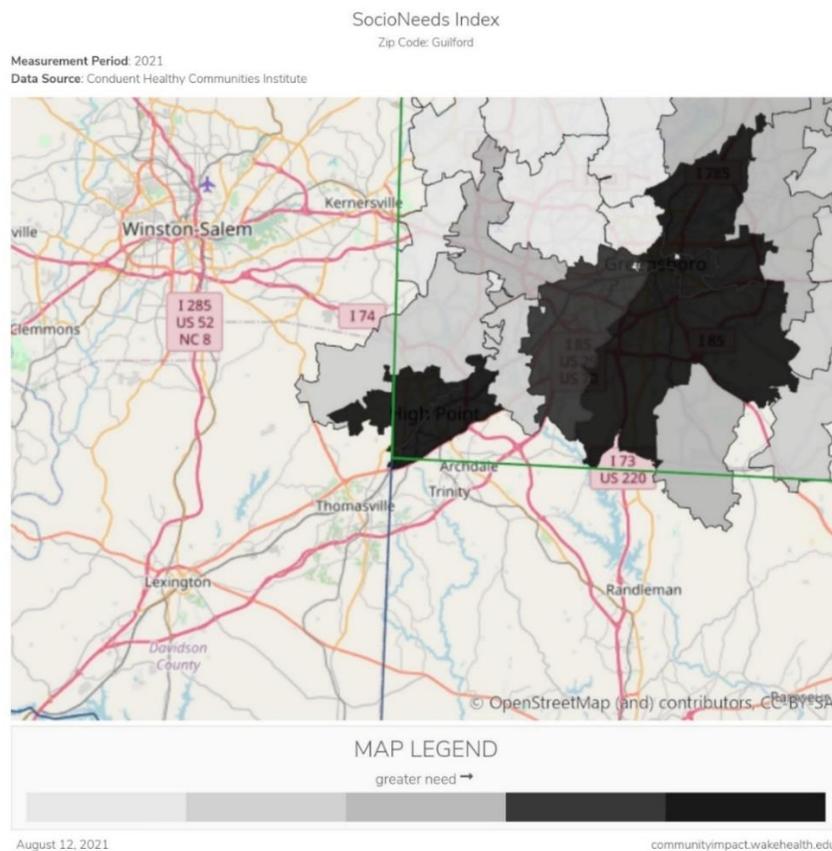

Figure 1. Map of SocioNeeds by zip code in Guilford County, 2021 (Conduent Health Communities Institute, 2021).

Demographics

According to the US Census Bureau, the population of Guilford County in 2019 was 537,174. There has been a trend of continuous growth in the County, with regular yearly increase since 2012 when the population was 500,471.

The US Census Bureau reports that in 2019 there were 31,278 persons (5.8%) under age 5, with 118,934 persons (22.1%) under age 18, and 83,442 persons (15.5%) over age 65.

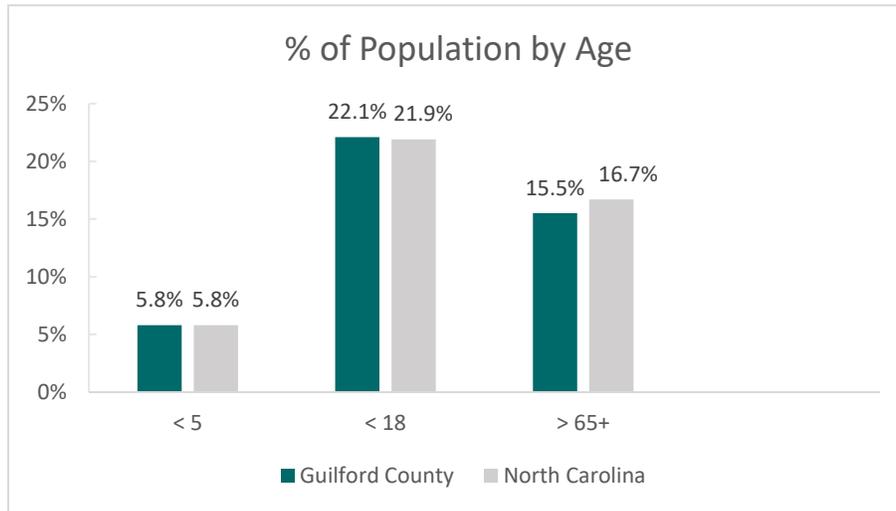

Figure 2. Guilford County population age distribution (US Census Bureau, 2019).

The County's racial distribution in 2019 is reported as follows, in descending order by percentage of total: 49.4% White, 35.4% Black or African American, 8.4% Hispanic or Latino, 5.3% Asian, and 1.5% Other. (US Census Bureau, 2019).

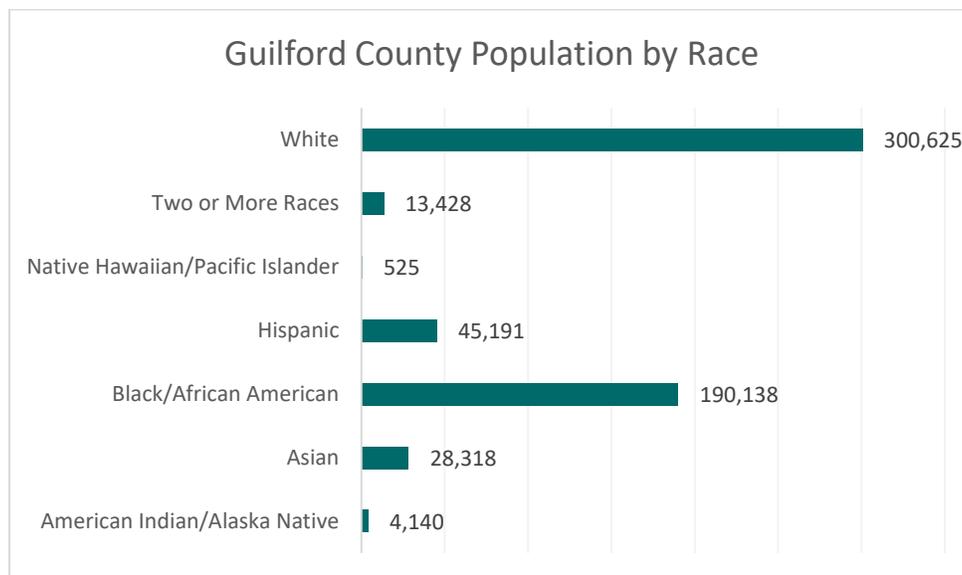

Figure 3. Guilford County racial distribution (US Census Bureau, 2019)

Females account for 52.7% of the total population.

Relative to other NC counties, Guilford has a high number of people over age 25 with a high school degree or higher at 89.1% (compared to State and National values of 87.8% and 88.0%, respectively). This number continues to trend upwards. Moreover, the County has a high percentage of persons over age 25 with a bachelor’s degree or higher at 36.0% (compared to State and National values of 31.3% and 32.1%, respectively). This data was measured from 2015 – 2019 by the American Community Survey.

As you can see in Figures 13-15, education levels vary significantly by zip code. In zip code 27260, 20-100% of residents over 25 years old do not have a High School Diploma, 30-33% have only a high school diploma and only 1-13% have obtained a Bachelor’s degree or higher. Education level can be a predictor of ability to obtain a job, afford quality health insurance, and be able to address health needs as they arise.

Guilford County Population Age 25 Years or Older with Less than a High School Diploma or Equivalent by Zip Code

NOTES

- ▶ The Census Bureau treats "Hispanic" as an ethnicity, not a race, so persons of Hispanic ethnicity can be of any race.
 - ▶ Households below poverty level are those with household income below \$25,000.
 - ▶ Percentages may not add to 100% due to rounding.
- SOURCES: Crimson Market Advantage (Demographics Module), WFBH DSS (Strata)
Growth, Strategy and Business Development RML 8/9/2021

Table 1. US Census Bureau data defining the demographics of Guilford County by race, ethnicity, and economics, including specific zip codes central to the HPMC area of service.

Additional demographic information for Guilford County is described in Section IV for prioritized health needs and targeted populations.

Section III: Process & Methods Used to Conduct CHNA

Primary Data Sources

Maternal Health Summit

Atrium Health Wake Forest Baptist High Point Medical Center hosted a virtual Maternal Health Summit on October 12, 2021. Participants included representatives from community organizations including: the YWCA, Every Baby Guilford, Ready Ready, Foundation for a Healthy High Point, and Guilford Child Development. Community providers and hospital leadership were also involved in the summit. Several organizations had opportunities to share current initiatives and needs in the community. Feedback was collected on synergies, duplication of efforts, barriers and how to overcome them, and how HPMC can contribute to the success of partner organizations.

Synergies

- Ready Ready and the YWCA Doulas program – the Navigator with Ready Ready can help connect patients to the YWCA for the Doulas program.
- Programs available through Every Baby Guilford can be utilized by other outside agencies, ex: REI Trainings.

Duplications

- Home visiting space: Nurse-Family partnership, YWCA PAT Program, YWCA Healthy Beginnings. There are opportunities to serve as referrals to each other.

Barriers

- Misunderstanding the role of the doulas. How do doulas get certification and verification within the hospital?
- There is no coordinated list of services that is available to the community and specifically provided to patients in the hospital
- Hospital staff knowledge of community resources
- Lack of resources – transportation, childcare for prenatal visits
- Hospital transitions have challenged community connectivity. Ex. Women’s Health Navigators no longer a resource.
- Lack of marketing resources.

HPU Food Survey

In July of 2020, during the peak of Covid-19, High Point University’s Survey Research Center conducted a poll recording the food hardship rate in High Point, North Carolina at 31%. This suggests that nearly a third of High Point residents struggled to access food in the earlier months of the pandemic. During the following summer of 2021, the HPU Survey Research center conducted the poll again, including households that fall within High Point zip codes, as well as Archdale, Jamestown, and Trinity. This survey was developed with feedback from Atrium Health Wake Forest Baptist High Point Medical Center staff. Within the 27260-zip code, 26% of respondents reported experiencing times in the last 12 months in which they did not have enough money to buy sufficient food for their household.

Overall, though, results from the 2021 survey were positive. The food hardship rate had fallen to 14% in 2021 in the survey area, probably due to help from federal relief funds, a surge in private philanthropy, and individual responsibility. According to the survey, 14% of respondents did not have enough money to buy food that their family needed in the last 12 months, while 17% of survey participants reported having low or very low food security.

The US Census has also seen similar results with rates spiking during the pandemic and dramatically dropping as of recently. Cash-based government assistance has caused food hardship to fall nationally by over 40%. In High Point, many private philanthropic organizations increased their emergency relief funds during the pandemic and distributed 44% more meals in 2020. While 14% is a historic low for High Point, it is still higher than the national average. The High Point food alliance and the HPU Americorps Vistas are working to make more of a long-term difference if private organization funds drop back to historic levels.

The HPU Poll was conducted by live interviewers at the High Point University Survey Research Center calling on April 2 – June 20, 2021. The responses from greater High Point, NC, including Archdale, Jamestown, and Trinity came from adults representing 474 households with landline or cellular telephones. The survey has an estimated margin of sampling error of approximately 4.5 percentage points for all households. The Survey Research Center contracted with Dynata <https://www.dynata.com/> and recorded the responses in Qualtrics.

Community Feedback

We sent out a survey to key community members to obtain feedback on priority health needs. The survey was followed up with conversations to obtain additional information and included feedback from the High Point YWCA and the Foundation for a Healthy High Point. What we heard from the community was a need to focus on maternal and infant health outcomes, health equity and the broader impact of social injustice on health outcomes. We worked with the Guilford County Health Department to discuss health needs and obtain data that is included in this report.

Comments From 2020-2022 CHNA

All CHNA and Implementation reports along with county indicator tracking is available on the Atrium Health Wake Forest Baptist website- <https://www.wakehealth.edu/About-Us/Serving-Our-Communities/Needs-Assessments-and-Implementation-Reports>. No comments from the public have been received to date. All future comments will be incorporated into future CHNA and implementation strategies and reports.

Secondary Data Sources

Community Impact Dashboard

Secondary data used for this assessment were collected and analyzed with HCI's Community Dashboard — a web-based community health platform developed by Healthy Communities Institute and published on Atrium Health Wake Forest Baptist's community impact web site. The Community Dashboard brings non-biased data from multiple reputable, nationally recognized sources that are external to Atrium Health, such as the NIH, CDC, and Census Bureau. It includes over 100 community indicators covering over 20 topics in the areas of health, determinants of health, and quality of life. The data is primarily

derived from state and national public secondary data sources. The value for each of these indicators is compared to other communities, nationally or locally set targets, and to previous time periods.

The Community Impact dashboard allows users to access fourteen dashboards and three data agglomerations around health, social drivers of health, community needs, socioeconomic factors, and quality of life. With over 100 indicators, the dashboards allow for Atrium Health Wake Forest Baptist High Point Medical Center to compare its community indicators to state and national level standards, including Healthy People 2020 and 2030 goals. Each indicator may be derived from a unique data source; therefore, indicators are compared to values for which data are available.

Considering the service area of HPMC is well-represented by Guilford County alone, data from Guilford County was exclusively used in secondary analysis. When available, zip code or census level data was utilized for greater clarity in data analysis. Indicators were distilled into health topic areas of interest, and these were combined with primary level data and prioritized to form HPMC’s main health disparities of concern.

North Carolina State Center for Health Statistics, 2019 Leading Causes of Death

These statistics describe North Carolina’s total and cause-specific deaths at the state and county level. In addition, major site-specific cancer deaths and total infant deaths are tabulated and mapped. This edition includes the number of deaths and unadjusted death rates for 2019 and the number of deaths and unadjusted and age-adjusted death rates for 2015-2019.

In 2019, the following data was found relative to particular causes of death in Guilford County.

Selected Leading Causes of Death, All Residents, Guilford County, 2019

	Cause of Death	Deaths	Mortality Rate per 100,000
1	Cancer	932	173.5
2	Heart Disease	890	165.7
3	Dementia	282	52.5
4	Stroke	271	50.4
5	Other Unintentional Injuries*	284	52.9
6	Alzheimer’s Disease	217	40.4
7	Chronic Lower Respiratory Disease	203	37.8
8	Diabetes	163	30.3
9	Kidney Disease	126	23.5
10	Flu and Pneumonia	109	20.3
11	Motor Vehicle Injuries	74	13.8
12	Liver Disease	68	12.7
13	Homicide	62	11.5
14	Septicemia	61	11.4
15	Suicide	58	10.8
16	Parkinson’s Disease	43	8.0
17	HIV Disease	10	1.9
	Other Causes	888	NA
	Total 2019 Deaths from all Causes	4,741	862.7
	2019 Guilford County Population		537,174

*Other unintentional injuries primarily include unintentional poisonings, falls and other external causes of injury related deaths.

Healthy People North Carolina 2030

In parallel with the national Healthy People initiative run by the United States Department of Health and Human Services, the North Carolina Department of Health and Human Services (NC DHHS) has released Healthy North Carolina (HNC) goals at the beginning of each decade since 1990. HNC is a set of health indicators with 10-year targets designed to guide state efforts to improve health and well-being. Identifying key indicators and targets allows NC DHHS, the Division of Public Health (DPH), local health departments, and other partners across the state to work together toward shared goals. Overall, 21 health indicators were chosen across the topics of Social & Economic Factors, Physical Environment, Health Behaviors, Clinical Care, and Health Outcomes. The 21 health indicators were:

1. Individuals Below 200% FPL
2. Unemployment
3. Short-Term Suspensions
4. Incarceration Rate
5. Adverse Childhood Experiences
6. Third Grade Reading Proficiency
7. Access to Exercise Opportunities
8. Limited Access to Healthy Food
9. Severe Housing Problems
10. Drug Overdose Deaths
11. Tobacco Use
12. Excessive Drinking
13. Sugar-Sweetened Beverage Consumption
14. HIV Diagnosis
15. Teen Birth Rate
16. Uninsured
17. Primary Care Clinicians
18. Early Prenatal Care
19. Suicide Rate
20. Infant Mortality
21. Life Expectancy

Section IV: Identification & Prioritization of Community Health Needs

A comprehensive list of health indicators and disparities can be found in Appendix 1. The highest ranking health indicators (obtained from the Conduent site), those scoring between a 2.20-3.00 are listed below.

1. Breast Cancer Incidence Rate
2. Age-Adjusted Death Rate due to Prostate Cancer
3. Cancer: Medicare Population
4. Age-Adjusted Death Rate due to Homicide
5. Food Insecure Children Likely Ineligible for Assistance
6. Chronic Kidney Disease: Medicare Population
7. Osteoporosis: Medicare Population
8. Chlamydia Incidence Rate
9. Gonorrhea Incidence Rate
10. Heart Failure: Medicare Population
11. Single-Parent Households
12. Age-Adjusted Death Rate due to Influenza and Pneumonia
13. Infant Mortality Rate
14. Asthma: Medicare Population
15. Age-Adjusted Death Rate due to Diabetes
16. Age-Adjusted Death Rate due to Kidney Disease

Prioritization of Health Needs Process & Criteria

The Atrium Health Wake Forest Baptist Medical Center Community Health Benefit Council and partners utilized evidence-based data collection methodologies to listen to and engage community members to better understand their primary health needs including the Community-Based Participatory Approach (CBPA). CBPA is a methodology that emphasizes collaborative partnerships between community members, organizations, and academic researchers to help identify local knowledge, work through strategies to solve problems, and develop programs that have potential for sustainability within communities. Community conversations are effective ways to engage with communities when building relationships for program development. They are informal and serve to authentically engage members of communities, while generating local knowledge, promoting co-learning, and assisting with collaborative development of strategies. CBPA is characterized by:

- Problem identification: By providing input on key problems to be addressed, understanding of key issues;
- Design and planning: By helping to shape program aims and objectives, providing input on the program goals, and insight on the provision of culturally appropriate care; and
- Implementation: By participating in the design of the intervention and collaborating both formally and informally.

To address the community health needs identified in the Community Health Needs Assessment (CHNA), recommendations were prioritized on primary data and secondary data findings. In addition, feedback from the health system's Community Health Benefit council committee members and senior and executive leadership were taken into consideration. Feedback included leadership perspectives that provide further detail about the prioritized community health needs including current trends.

Prioritized Health Needs

The following health needs were prioritized for Atrium Health Wake Forest Baptist High Point Medical Center for 2022-2024:

1. Access to Care: with a focus on special populations, including women & children, as well as Medicaid/Medicare/Uninsured Populations, and those experiencing mental health and substance abuse disorders

Maternal and Child Health Populations

Maternal and child health has been identified as a prioritized health need in the HPMC community. Secondary data supports this:

The infant mortality rate in Guilford County is, overall, 8.4 deaths per 1,000 live births. This value is higher than state and national values (7.1 and 5.8, respectively) and does not meet the HP 2020 or 2030 goals (6.0 and 5.0, respectively). Infant mortality is most prevalent among the Black/African American, non-Hispanic population with a value of 13.3 deaths per 1,000 live births.

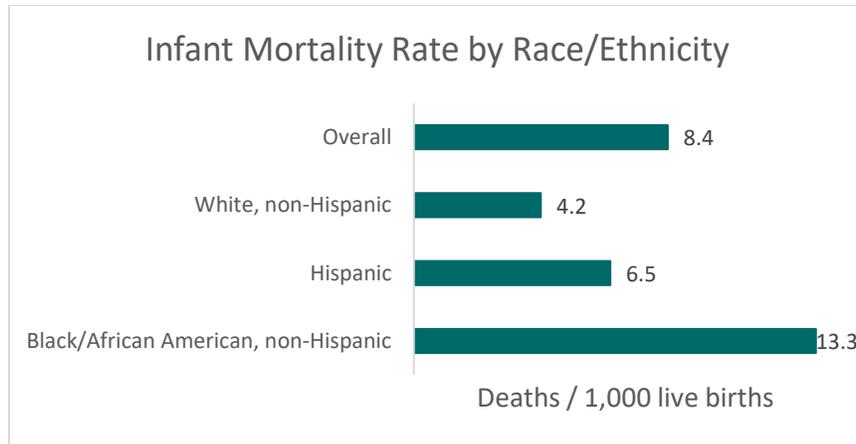

Figure 4: Infant mortality rates in Guilford County by race/ethnicity from 2014-2018, displaying values of 13.3 for Black/African American, non-Hispanic; 6.5 for Hispanic; 4.2 for White, non-Hispanic; and 8.4 overall (North Carolina State Center for Health Statistics, Vital Statistics).

High rates of infant mortality in Guilford County are accompanied by high percentages of preterm births and babies with low and very low birth weights. In Guilford County, 10.8% of births in 2018 were preterm—compared to state and national values of 10.4% and 10.0%, respectively. Guilford County did not meet the 2020 or 2030 HP goals of 9.4%.

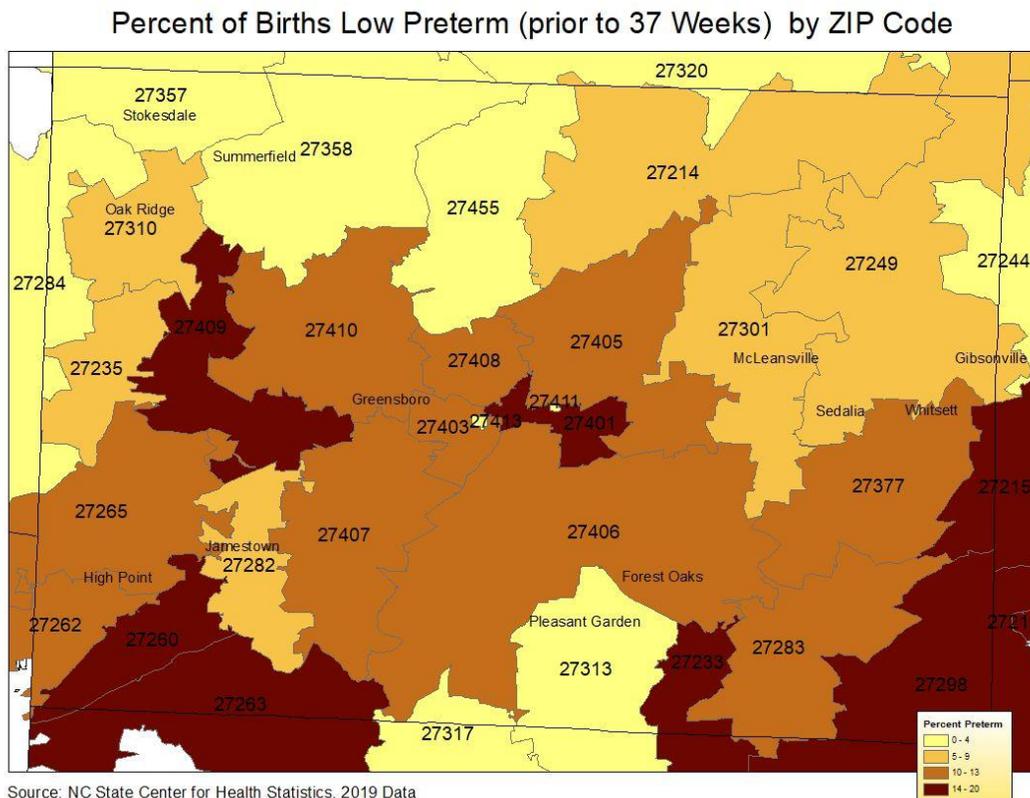

Figure 5: Guilford County map displaying percent preterm births. Darker red shades indicate a higher percentage of preterm births. Note the High Point area in the bottom left corner, with 27260 having 14-20% of births preterm. Compiled by Dr. Mark Smith, Guilford County Health Department.

Additionally, from 2014-2018, 9.8% of Guilford County babies were considered to be of a low birth weight (below 5 pounds, 8 ounces, compared to NC: 9.2%, US: 8.1%, HP 2020: 7.8%), and 1.9% of babies born were considered to be of a very low birth weight (below 3 pounds, 5 ounces, compared to NC: 1.7%, US: 1.4%, HP 2020: 1.4%).

Also of note are teen pregnancies, which vary across the county but are prevalent in urban High Point, as illustrated in this map:

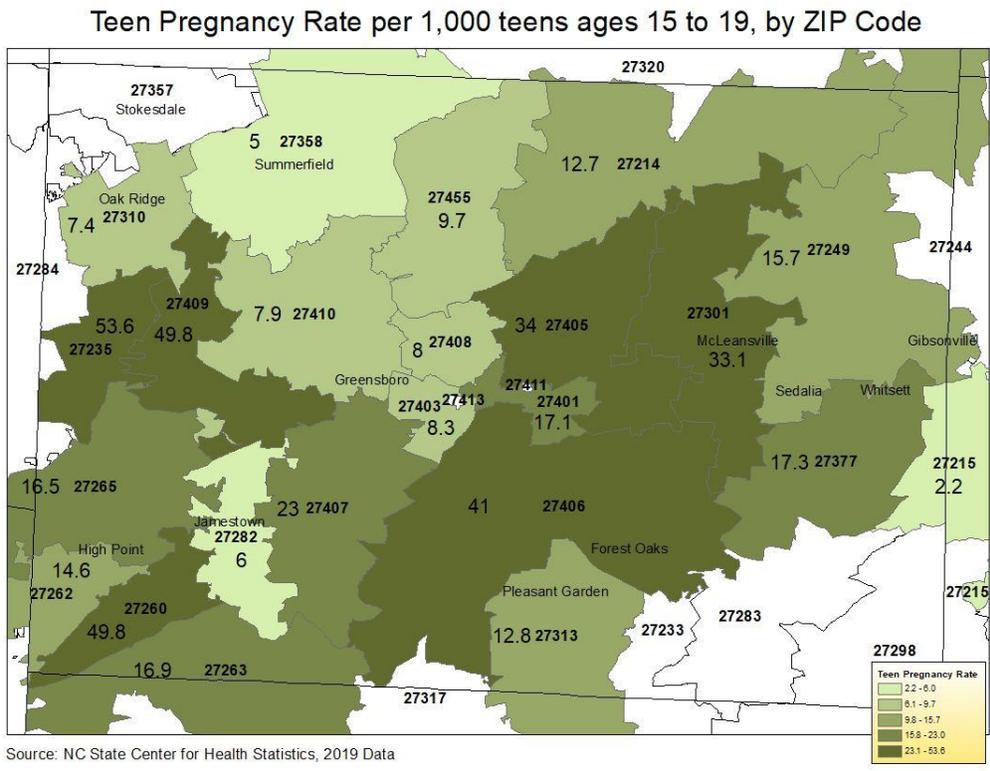

Figure 6: Teen pregnancy rates across Guilford County Zip Codes. 27260, in urban High Point (bottom left) has a teen pregnancy rate of 49.8%-- among the highest in the county. Compiled by Dr. Mark Smith, Guilford County Health Department.

Poverty among children is also an area of concern, with 23.0% of children in Guilford County living below the poverty level from 2015-2019. This value is higher than the NC value of 21.2% and US value of 18.5%. Young children face poverty as well, with 25.1% of Guilford County’s young children living below the poverty level (NC: 23.8%, US: 20.3%).

Behavioral Health and Substance Use Disorder Populations

North Carolina has a population of approximately 9.9 million people, making it the 10th most populated state in the nation. Close to 3.9% of adults in North Carolina (according to SAMHSA) live with serious mental health conditions such as schizophrenia, bipolar disorder, and major depression. Only 48.2% of adults with mental illness in North Carolina receive any form of treatment from either the public system or private providers (according to SAMHSA). The remaining 51.8% receive no mental health treatment. According to Mental Health America, North Carolina is ranked 33 out of the 50 states and Washington D.C. for providing access to mental health services (www.rtor.org). According to County Health Rankings, in 2020 Guilford County had 1,576 mental health providers, with a ratio of 340:1 population per mental health provider which can create a challenge when trying to access care.

Mental health and mental distress are of a particular concern in Guilford County. In 2018, 13.6% of adults suffered from frequent mental distress—considered to be 14 or more days of stress, depression, and emotional problems, out of the last 30 days (NC: 12.6%, US: 13.0%). Similarly, 13.4% of adults reported poor mental health for 14 or more days in the last month, which is higher than the US value of 12.7%. In the urban High Point Zip codes of 27260 and 27262, those values were 19.0% and 16.1%, respectively. Guilford County residents, on average, reported 4.5 days of poor mental health over the last 30 days (NC: 4.1, US: 4.1, NC 2020 goal: 2.8).

Behavioral health and substance dependency is a multi-dimensional concern. According to the CDC, nearly 841,000 people have died in the US since 1999 from drug overdose. Over 70% of US drug overdose deaths in 2019 involved an opioid. Overdose deaths involving opioids, including prescription opioids, heroin, and synthetic opioids (like fentanyl), have increased over six times since 1999. Overdoses involving opioids killed nearly 50,000 people in 2019, and nearly 73% of those deaths involved synthetic opioids. The death rate due to drug poisoning in Guilford County is 23.1 deaths per 100,000 population. This value is higher than the NC value of 22.3, the US value of 21.0, and continues to trend upwards.

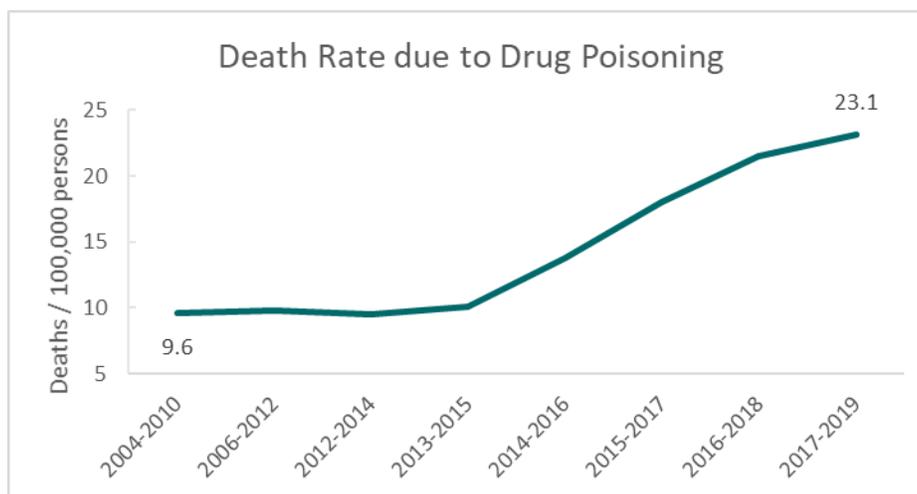

Figure 7. Death Rate due to Drug Poisoning in Guilford County. While this data does not specify the specific type of drug involved, it may point to the continuing opioid crisis in Guilford County. This rapid increase is a major point of concern (County Health Rankings, 2019).

Table 2. Opioid drug trends in Guilford County (NC DETECT).

As an area known historically for its tobacco production, smoking is common and is considered a large concern. Additionally, lung cancer age adjusted death rates in NC are high, with Guilford County being no different, and deaths due to drug poisoning are trending upward. Behavioral health and substance dependency are among the top concerns of this region, even beyond Guilford County.

In 2018 in Guilford County, 18.5% of adults smoked. While this value is in the best 50% of NC counties, it is still above the NC value of 17.9% and above the US value of 16.1%. Guilford County did not meet the HP 2020 goal of 12.0% and is not on track to meet the HP 2030 goal of 5.0%. In the Zip code 27260, in urban High Point, 28.3% of adults smoked in 2018.

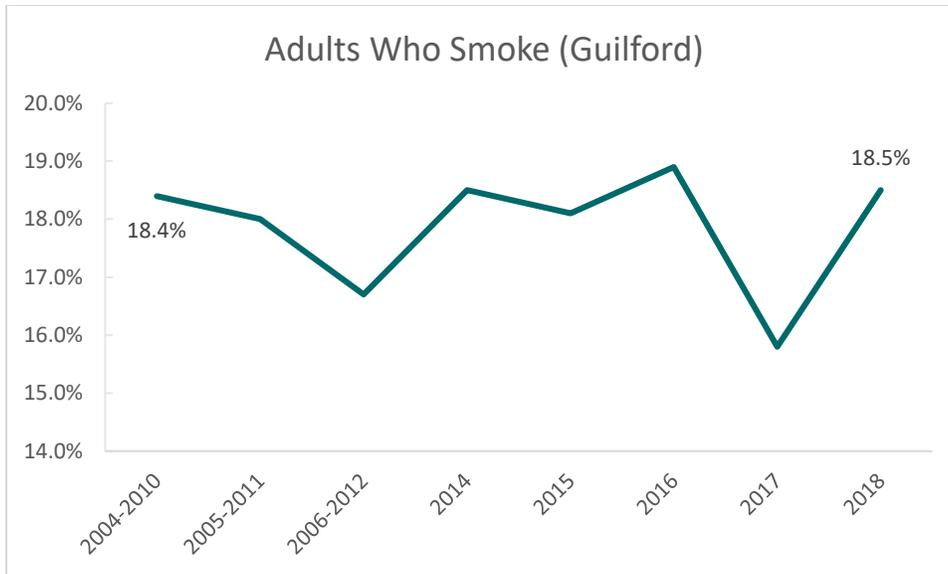

Figure 8. Adults who smoke in Guilford County from 2004-2018. Note that there were methodology changes in data collection in 2014 and 2018 (County Health Rankings, 2018).

The age-adjusted death rate due to lung cancer in Guilford County is 41.4 deaths per 100,000 population. This rate has continued to steadily trend downward from 2004 to 2017, when supporting data was released.

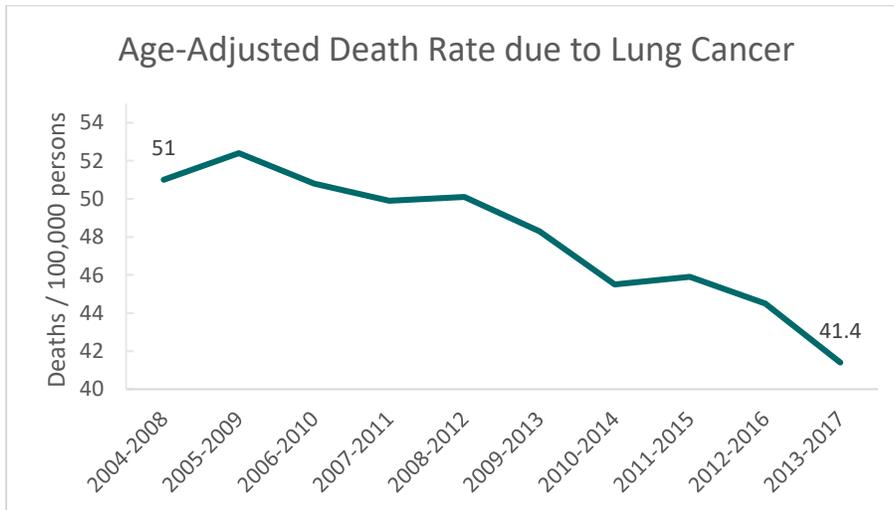

Figure 9. Age-Adjusted Death Rate due to Lung Cancer in Guilford County. There has been a steady decrease in this death rate over the period of 2004 – 2017 (National Cancer Institute, 2017).

Guilford County’s age-adjusted death rate due to lung cancer is below the NC value of 44.1 deaths per 100,000 population, but falls above the US rate of 38.5. Guilford’s value meets the HP 2020 goal of 45.5, but does not yet meet the HP 2030 goal of 25.1.

Age-adjusted death rate due to lung cancer does not display evidence of great disparity among racial groups.

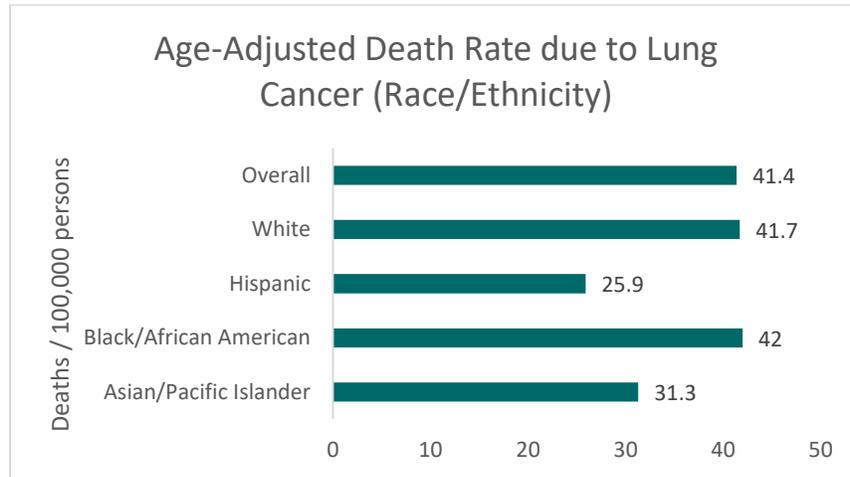

Figure 10. Age-Adjusted Death Rate due to Lung Cancer by Race/Ethnicity. Note the lack of significant disparity between White and Black/African American groups, and the low Hispanic value (National Cancer Institute, 2017).

Covid-19 vastly impacted mental health. In 2020, statewide data shows symptoms of depression and anxiety have tripled amid the pandemic, according to Victor Armstrong, executive director of the Division of Mental Health, Developmental Disabilities and Substance Abuse Services. North Carolina also has seen a 15% increase in emergency room visits for substance use and binge drinking. Contributing factors include uncertainty, isolation, loss and social determinants of health like housing and employment. In a typical year, 1 in 9 (11%) people reports symptoms of anxiety and depression disorders. With Covid-19 in place, as many as 1 in 3 (33%) North Carolinians have reported these symptoms. Mental health services and resources, including telehealth behavioral services, are critical during the Covid-19 pandemic. Nationwide, average anxiety severity scores increased 13% from August to December 2020 and then decreased 26.8% from December 2020 to June 2021. Similar increases and decreases occurred in depression severity scores.

Leadership perspective shared by Bryan Hatcher, LCSW, President, CareNet Counseling:

“National data indicates that on average 25% of the US population deals with a mental health struggle each day. The Covid-19 pandemic has exaggerated this metric through isolating, creating uncertainty, causing financial distress, and often providing no outlet from stressors that cause or elevate mental health issues. It is also recognized that socio-economic factors and adverse events across the lifespan tend to increase the intensity of mental health issues for individuals and communities, and that individuals and communities of color and/or living in poverty have less access to resources to address mental health issues. CareNet Counseling serves communities across the state of North Carolina by providing counseling, support and educational services to those in need. We intentionally seek to provide services in communities that are underserved, and we provide free and subsidized services to those with less resources in order to increase access and improve outcomes. During the Covid-19

pandemic, we have increased our use of telehealth services as a means of being available to those in need more quickly and with less risk of transmitting the virus.”

Medicaid, Medicare and Uninsured Populations

Perhaps one of the more challenging access issues in Guilford County is health insurance. In 2018, the CDC reported that 17.9% of adults aged 18-64 did not have health insurance of any kind. This compares to the US value of 12.2%, and does not meet the HP 2020 target of 0% uninsured adults. As with other health concerns in Guilford County, there are pockets of disparity. In 27260, 29.9% of adults had no health insurance. This is the highest percentage value for uninsured persons in Guilford County, and is in urban High Point. Thankfully, health insurance is gradually becoming more prevalent in Guilford County.

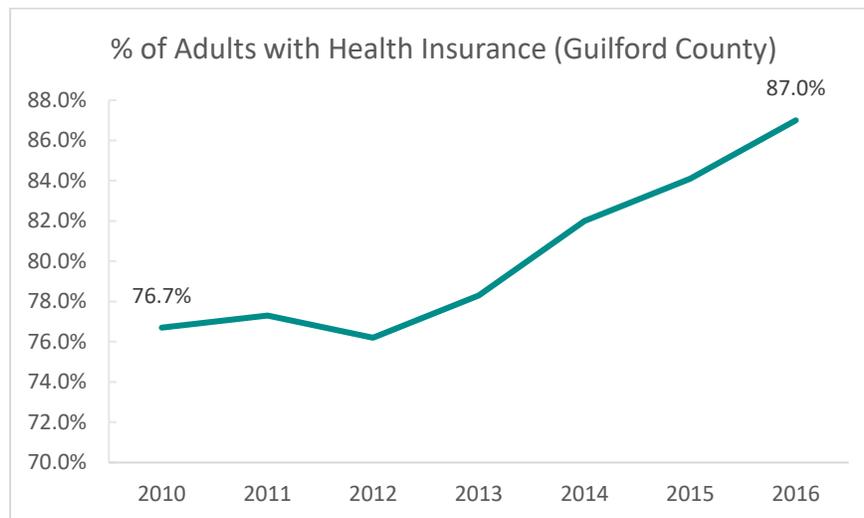

Figure 11. Adults with Health Insurance in Guilford County. Insured status continues to trend upwards (American Community Survey, 2019).

2. Social Drivers of Health Equity and Social Injustice: with a focus on food security and other social determinants of health

Health equity means increasing opportunities for everyone to live the healthiest life possible, no matter who we are, regardless of race, ethnicity, gender, age, education, or income level. In the United States, health gaps are persistent and many are increasing, due to persistent barriers in our society and culture. These barriers include the social determinants of health such as discrimination, poverty, lack of access to high quality jobs, education, housing, and other living environments. Increasing health equity leads to a healthier and more equitable society that contributes to well-being of individuals, families, communities, and the country as a whole.

Atrium Health Wake Forest Baptist’s social impact strategy has gained energy as the institution begins to confront its own pattern of racial exclusion that mirrors inequities in the broader community. Our social impact strategy is visible in the community benefit process, which now includes all facilities, including Atrium Health Wake Forest Baptist High Point Medical Center, in an operational team that monitors our collective impact across all communities with a focus on micro-geographies and sustained partners among non-profit, faith and business. As an academic medical center, many of our service lines (especially family medicine, pharmacy, care management and the ED) have been long involved with the people most affected by social inequity. These service lines welcome the increasingly coordinated social

3. Chronic and Emerging Disease Management/Prevention: with a focus on Cancer, Kidney Disease, Respiratory Disease, Diabetes

Data analysis for chronic conditions in Guilford County calls attention to several key issues. Cancer incidence, including breast cancer as well as tobacco use and lung cancer, hypertension, kidney disease, and respiratory diseases are of high concern, with particular need evident in the Medicare population.

Cancer

While the overall age-adjusted death rate due to cancer of any kind in Guilford County was trending downward and at a value of 156.4 deaths per 100,000 population in 2017, the death rate is 18.7% higher among males than females, and 13.24% higher in the Black/African American population than the overall death rate. The all cancer incidence rate in Guilford County in 2017 was 481.0 cases per 100,000 population, which was higher than the NC value of 468.4 and the US value of 448.7. All cancer incidence, similar to age-adjusted death rate, is more common among males. Incidence has gradually declined since 2004, and there seems to be parity among the Black/African American population and White population, with other race/ethnicities having less incidence of cancer.

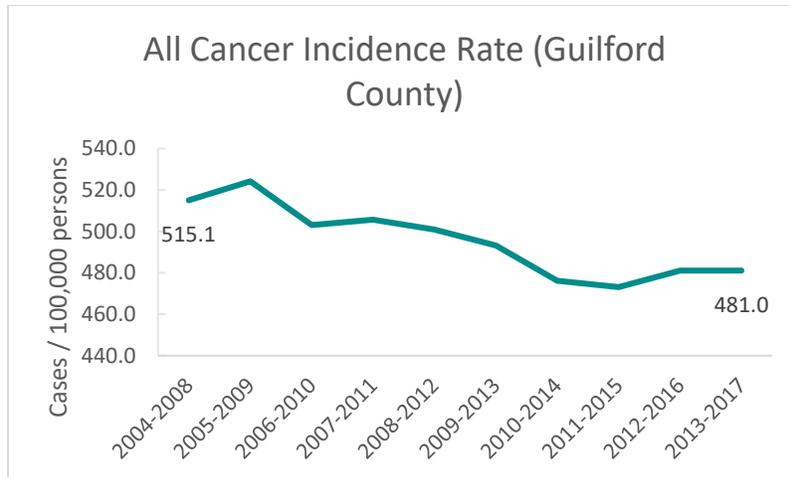

Figure 17. All Cancer Incidence Rate in Guilford County. There has been steady decline in the incidence of cancers, despite Guilford County falling behind NC and US values (National Cancer Institute, 2017).

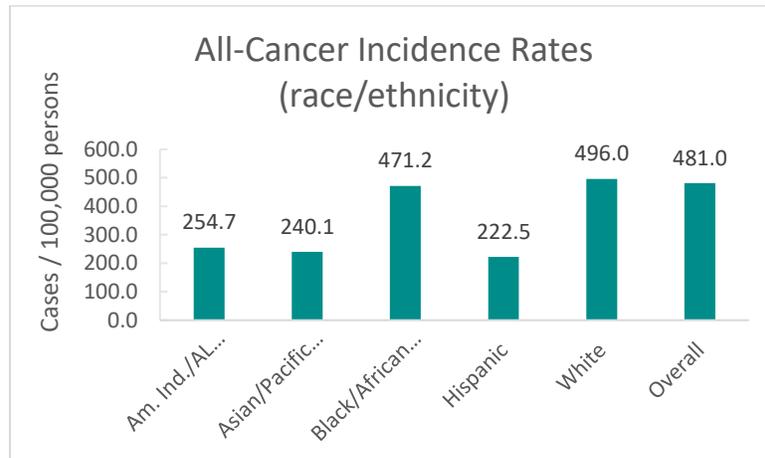

Figure 18. All Cancer Incidence Rates by Race/Ethnicity (National Cancer Institute, 2017).

Cancer among the Medicare population is significant in Guilford County, with 9.1% of the total Medicare population in 2018 having some form of cancer. This ranks Guilford County in the worst 25% of all NC and US counties. It falls above the NC value of 8.3% and the US value of 8.4%, and is trending upward.

Breast cancer, specifically, is of great concern in Guilford County. With a breast cancer incidence rate of 151.3 cases per 100,000 females, Guilford County incidence is much higher than the NC and US values of 134.0 and 125.9, respectively. Indeed, Guilford County is in the worst 25% of NC counties and US counties. Breast cancer incidence rates in Guilford County continue to trend upwards.

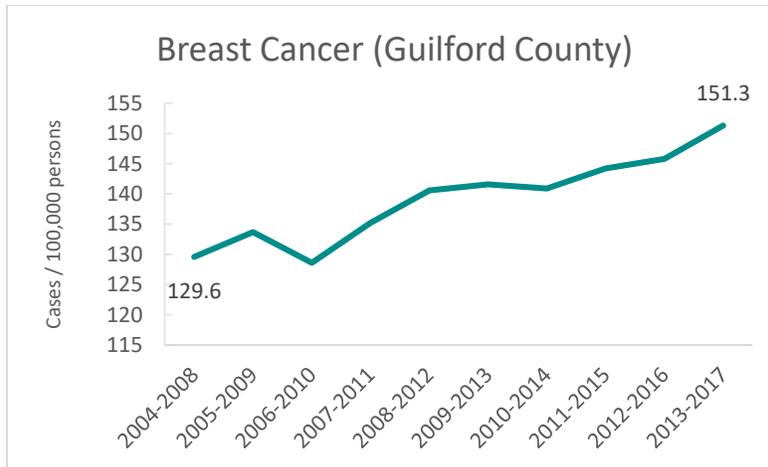

Figure 19. Breast Cancer Incidence Rates in Guilford County. Breast cancer continues to be an area of great concern (National Cancer Institute, 2017).

Mammography screening is a concern from a health care access perspective. Among women ages 50 – 74, 77.4% of women in Guilford County had a mammogram in the past two years according to 2018 data from the CDC. While this value is higher than the US value of 74.8%, it falls short of the HP 2020 target of 81.1%. In the Medicare population, 65.0% of women aged 67-69 in 2015 had received a mammogram in the last two years. This value is in the second worst quartile of NC counties, and falls well below the NC value of 68.1%. From 2011 to 2015, when this data was last reported by The Dartmouth Atlas of Health Care, there had been a downward trend in mammograms in this age population.

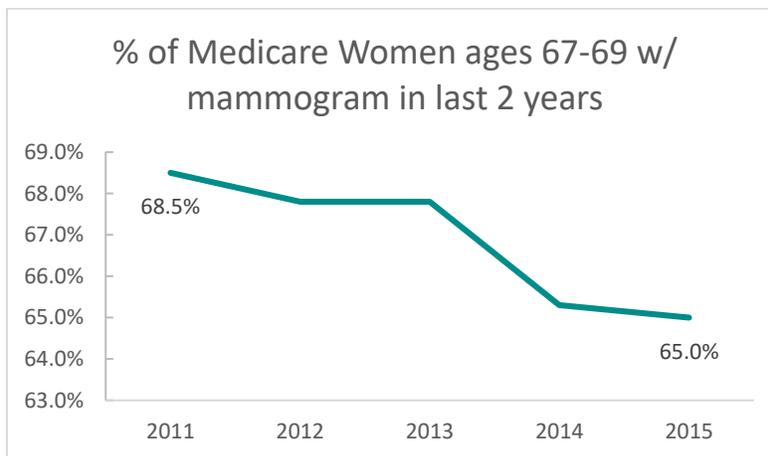

Figure 20. Mammography in Medicare Women ages 67-69 (The Dartmouth Atlas of Healthcare, 2015).

Kidney Disease

Also of great concern is the incidence of chronic kidney disease among the Medicare population. 28.1% of Guilford County’s Medicare population have been treated for chronic kidney disease, which compares poorly to the NC value of 25.1% and US value of 24.5%. Perhaps more alarming is the upward trend chronic kidney disease has taken among the Guilford County Medicare population.

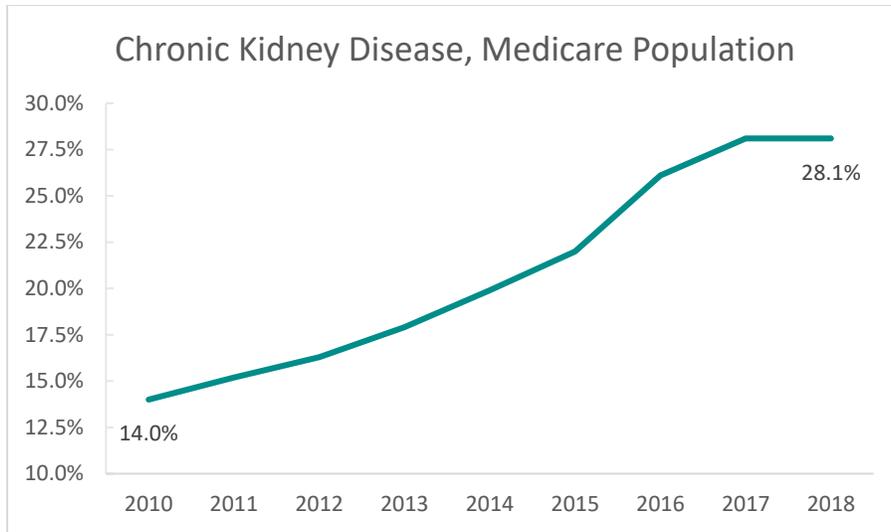

Figure 21. Chronic Kidney Disease among the Medicare population continues to trend upwards from 2010, according to CMS (CMS, 2018).

Respiratory Disease

Respiratory diseases, including COPD and asthma, tend to be more prevalent in Guilford County as well. 7.2% of adults in Guilford County in 2018 had been told at some point by a doctor that they had COPD, emphysema, or chronic bronchitis. That value compares to 6.9% of the US population. In the 27260 zip code, 11.0% of the population reported one of these diagnoses.

Among the Medicare population, 10.1% had COPD, emphysema, or chronic bronchitis in 2018. While this value falls below the NC and US values within the Medicare population of 12.0% and 11.5%, respectively, it is trending upward.

Within the Medicare population, asthma is also an issue in Guilford County. 5.3% of the Medicare population had been treated for asthma in 2018, according to CMS. This value has been trending upward slightly since 2010, when 4.3% of the Guilford County Medicare population had been diagnosed with asthma. In 2018, at the time the most recent data was collected, the 4.8% of the NC Medicare population was diagnosed with asthma, and 5.0% of the US Medicare population was diagnosed with asthma. Of all adults, beyond the Medicare population, 9.7% in Guilford County had asthma, compared to 9.2% of the US population.

Diabetes

In Guilford County, 10.1% of adults over 20 years of age have at some point been diagnosed with diabetes. This 2017 value represents a relatively stable trend over time, although it is higher than the NC value of 8.6%. Data stratifying diabetes diagnosis in Guilford County by race/ethnicity is not available from the CDC, however there appears to be no significant difference between men and women related to diabetic status.

While the percentage of persons over 20 with diabetes in Guilford County has remained steady, and Guilford County sits just below the mark for the top 50% of counties nationwide, the age-adjusted death rate due to diabetes is high. 24.0 deaths per 100,000 population is higher than the NC and US values of

23.8 and 21.3, respectively. Guilford County’s death rate due to diabetes has increased steadily and somewhat dramatically:

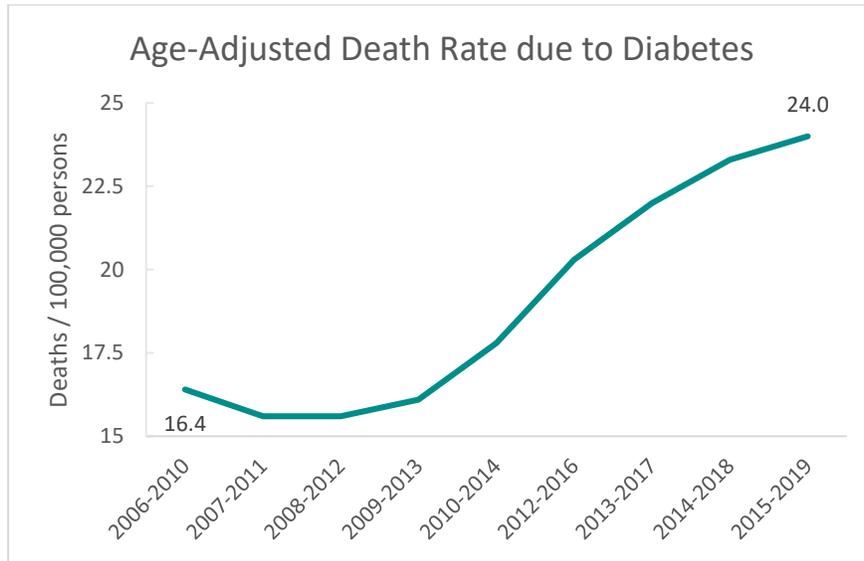

Figure 22. The Age-Adjusted Death Rate due to Diabetes in Guilford County has continued to rise, according to the North Carolina State Center for Health Statistics, Vital Statistics (2019).

While diabetes prevention is important, this data suggests that diabetes prevention and management should be a priority in Guilford County.

Within the Medicare population, 26.1% of people were treated for diabetes in 2018. This value is in the top 50% of NC and US counties, and falls below the NC and US values of 28.5% and 27.0%, respectively. Additionally, data from 2015 suggests that diabetic monitoring in the Medicare population is high. In 2015, 89.5% of Medicare-insured diabetic patients had had their blood sugar (HbA1c) tested in the past year.

Heart Disease

Heart disease and its related factors in Guilford County toe an interesting line across Medicare status—in general, heart disease is more prevalent within the Medicare population.

The CDC reports that in 2018, 6.9% of adults in Guilford County had been told by a health care provider they had coronary heart disease. This value is in the best 50% of NC and US values; however, it does rise above the US value of 6.8%. There is stratification within Guilford County. Two of the main zip codes of concern in urban High Point (27260 and 27262) reported values of 9.2% and 7.8%, respectively—among the worst of Guilford County.

The age-adjusted death rate due to heart attack in Guilford County was 48.4 deaths per 100,000 population. This is an encouraging value, as it represents a consistent downward trend from 2012, when the value was 64.2 deaths per 100,000. The outlook is not as positive when it comes to heart disease within the Medicare population.

In 2018, 14.9% of the Medicare population were treated for heart failure. This percentage represents a strong and steady increase since 2013, when the value was 12.3%. The 2018 value of 14.9% is above the NC and US values of 13.3% and 14.0%, respectively.

Interestingly, ischemic heart disease among the Medicare population is declining. In 2018, 23.1% of Medicare beneficiaries were treated for ischemic heart disease—below the NC and US values of 24.5% and 26.8%, respectively.

The CDC reports that in Guilford County, 80.5% of the population had their cholesterol checked in the last five years. This value is in the best 50% of NC and US counties, but falls below the US value of 81.5%. It also misses the mark of HP 2020, at 82.1%. In the Medicare population, hyperlipidemia (high amounts of fat in the blood) was reported by CMS in 2018 to be present among 45.8% of Medicare patients. This falls below the NC and US values of 48.8% and 47.7%, respectively.

Stroke

In 2018, the CDC reported that 3.7% of adults had been told by a healthcare provider they had a stroke. While this value is in the best 50% of NC and US counties, it is above the US value of 3.4%. In addition, within the Atrium Health Wake Forest Baptist service areas of Guilford, Forsyth, Davie, Davidson and Wilkes Counties, High Point's 27260 zip code has the highest percentage of adults who have experienced a stroke (6.0%).

In the Medicare population in 2018, 3.9% of people have been told by a healthcare provider they have had a stroke. This value is higher than the NC and US values of 3.7% and 3.8%, and represents a somewhat irregular trend upward from 2010, when the value was 3.6%.

Of note, as well, are the relatively high amounts of hypertension in Guilford County. In 2017, 34.3% of adults had been told they had high blood pressure (at or above 140/90 mm Hg), compared to the US value of 32.4%, the HP 2020 goal of 26.9%, and the HP 2030 goal of 27.7%. Hypertension in the Medicare population, at 57.7%, is higher than the US value of 57.2%, and has trended upward since its most recent low value of 56.1% in 2014.

77.1% of adults over 18 with high blood pressure report taking medications for this condition. High blood pressure is the top modifiable risk factor for stroke. This value is lower than ideal, and is in the worst 25% of counties in NC. It is above the US value of 75.8%.

COVID-19 Response Efforts

Efforts spanning 18 plus months throughout 2020 and 2021 included scenario planning, supply chain, and personal protective equipment (PPE) management and distribution, tremendous shifts in clinical work (e.g. access to elective surgeries/procedures, virtual care, hospitalist at home), vaccine planning and administration both for employees and our community, among other strategies. High Point Medical Center operated under our emergency management plan for most of this time period. We admitted over 1,200 patients with greater than 2,000 patients who tested positive.

In efforts to protect our staff and patients we took measures including limiting our entrances to two which have been staffed with screeners. These screeners check in visitors and screen for COVID-19. We have gone through multiple iterations of our visitor policy that continues to evolve today. We initially cancelled elective procedures and then developed a COVID-19 safe route to care for patients who needed elective procedures which includes COVID-19 testing prior to procedure.

We provided thousands of vaccines to employees and the community, making efforts to support local clinics and medical centers to ensure that their frontline staff were able to get the vaccine as soon as possible. We also focused on taking care of our team. COVID-19 has greatly impacted our community, our families and our employees. We have felt an outpouring of support from the community and for that we are grateful.

Community Needs that were not prioritized

While we acknowledge the importance of all community health needs in the Guilford County community, the hospital's resources and assets were best aligned to focus on the prioritized health needs addressed above. Community needs that were identified but not prioritized for the 2022 – 2024 CHNA are as follows: age-adjusted death rate due to homicide, sexually transmitted diseases and single parent households.

Atrium Health Wake Forest Baptist Medical Center leaders will continue to partner with community and non-profit organizations, including public health, other governmental agencies, and the broader community to help address these health needs. A comprehensive list of available resources to meet these needs are listed in Appendix 2.

Evaluation of Progress since Prior CHNA

Tracking progress on priority health needs identified in the last CHNA is an ongoing process that is documented annually. Ongoing review and evaluation of actions helps to inform the organization on the best use of resources for the next CHNA cycle.

A detailed table of the strategies and results for each priority health topic can be found in Appendix 3. Many of our intended strategies were derailed or altered due to the COVID-19 pandemic. We prioritized keeping our employees, patients and community safe and once available, supported vaccine clinics for our community with the goal of returning to our pre-pandemic services.

Sharing the CHNA and communicating priorities to stakeholders

It is vital that the broader community, including community-based organizations, the faith community, grassroots leaders, and members of resident-led initiatives, understand that the assessment can be a powerful tool when utilized effectively. This information will be shared with community members through multiple methods, including through the [Community Impact Website](#). To further expand our reach, when appropriate, we will partner with community organizations to disseminate the full report. Internal stakeholders with significant community partnership (e.g. High Point Regional Foundation, Philanthropy, and others) will also be invited to participate in learning opportunities. Internal communications and the Intranet will also serve as a platform to educate internal team members about the availability of the report and key findings. Several team members are also affiliated with community organizations through involvement on boards, committees, and other service positions. As such, it is expected that these individuals will continue efforts to publicize the CHNA and serve as an educational resource as opportunities arise to do so.

Appendix 2: Community Resource Bank

Community Resources

Alcohol and Drug Services

Alcohol and Drug Services (ADS) is a non-profit organization that works to reduce the impact of substance abuse through education and prevention. ADS is dedicated to helping children thrive, empowering families, supporting schools, and building communities. ADS serves 10 counties in North Carolina including Guilford County.

www.adsyes.org

Alcoholics' Home, Inc. (House of Prayer)

House of Prayer Inc. is a residential treatment center for adult males struggling with alcoholism. This faith-based center not only provides a spiritual treatment community, but they also have a partnership with a local thrift store that is open to the public. A fee of \$1,000 is required for residents with an income and \$500 for residents without an income in order to participate in the program. All potential participants will have to undergo an interview process and must have a valid Social Security number and photo ID.

<http://houseofprayernc.org/>

American Red Cross - Piedmont Triad Center

The Piedmont Triad Chapter of the American Red Cross serves a population of more than 1.6 million people in the Triad area which includes Alamance, Caswell, Davidson, Davie, Forsyth, Guilford, Randolph, Rockingham, Stokes, Surry and Yadkin Counties. The American Red Cross provides blood donation services, services to members of the armed forces, health and safety services, CPR & First Aid classes, disaster relief services, and volunteer services.

www.redcross.org

Arc of High Point

The Arc of High Point is committed to providing opportunities for individuals with intellectual and developmental disabilities to choose and realize their personal goals through advocacy and services. The Arc offers access to dental care and a variety recreation programs such as the creative arts painting class, stitching, the Wild & Free program, Heart & Soul choir practice, and the Aktion club.

www.arcofhp.org

<https://www.wakehealth.edu/Patient-and-Family-Resources/Support-Counseling-and-Continuing-Care/Support-Groups>

BackPack Beginnings

Backpack Beginnings delivers child-centric services to feed, comfort, and clothe children in need. This includes programs like food backpacks, comfort backpacks, food pantries, and clothing pantries which provides children with the extra resources they need.

www.backpackbeginnings.org

Barnabas Network

Guilford County's only furniture bank! They collect gently-used, donated household goods and furnishings for individuals transitioning from homelessness, fleeing abuse, recovering from flood or fire, or resettling as refugees.

<https://www.thebarnabasnetwork.org/>

Benevolent and Protective Order of Elks, Lodge No. 1155

A fraternal organization that is dedicated to veterans and the community. Programs include Adopt-A-Veteran, Freedom Grants, VA voluntary service, Camp Carefree, Giving back, Donate Life America, Hoop Shoot, Antlers Program, and a Drug Awareness Program.

www.hpelks.com

Big Brothers Big Sisters of the Central Piedmont

Big Brothers Big Sisters of the Central Piedmont's mission is to provide children facing adversity with strong and enduring professional supported one-on-one relationships that changes their lives for the better forever. To read more about the programs available for the children enrolled or to learn how to volunteer to be a Big Brother or Sister, visit the Big Brothers Big Sister website.

www.bbbscp.org

Boys & Girls Club of Greater High Point Inc.

The Boys & Girls Club of Greater High Point Inc. inspires and enables all young people, especially those from disadvantaged circumstances, to realize their full potential as productive, responsible, and caring citizens. Boys & Girls Club is a youth development organization serving school aged children, from the ages of 6 - 18, at five sites with after-school and summer programs.

www.hpclubs.org

Caring Services Inc.

Caring Services Inc's goal is to provide a holistic continuum of care to individuals who are ready to make a commitment to their recovery from mood-altering substances. Services include outpatient treatment, an intensive outpatient treatment program, veterans services, and DUI services.

www.caringservices.org

Children's Home Society of North Carolina

The Children's Home Society of North Carolina is a family-focused organization that specializes in adoption and fostering services, education and prevention programs, family preservation, and advocacy.

<https://www.chsnc.org/>

Consumer Credit Counseling Service

The Consumer Credit Counseling Service helps individuals and families avoid bankruptcy or foreclosure, achieve their financial goals, and regain a sense of financial well-being. The organization offers programs such as budget/credit counseling and workshops, debt management planning, housing counseling, reverse mortgage counseling, mortgage payment assistance, and student loan counseling.

www.thedebtdoc.com

Easter Seals UCP North Carolina and Virginia

Easter Seals UCP North Carolina and Virginia provides services like Applied Behavior Analysis, Assertive Treatment, Community Support, Employment Training, Mobile Crisis, sensABLE snacks, EMPOWER after school care/summer camp, Autism services, and Therapeutic Foster Care. Their mission is to provide supported employment for individuals with intellectual and development disabilities and/or mental health or substance abuse issues. Their services are specifically targeted for individuals aged 16 and up

www.eastersealsucp.com

Esther R. Culp Women's Center

The Esther R. Culp Women's Center is designed to meet the unique health needs and concerns of women in the community. The Women's Center offers programs, classes, and support groups for parents and children. The center has an open medical space for women of all ages which includes private waiting rooms, spacious classrooms for classes and meetings, and direct access to the childbirth suite and newborn nursery.

https://www.wakehealth.edu/Locations/Clinics/e/Esther-R-Culp-Womens-Center?utm_source=local&utm_campaign=google%20my%20business&utm_medium=organic

Faith Action International House

The Faith Action International House provides services to immigrants and refugee families from over 60 diverse nations. Such services include direct help with food, housing, and healthcare needs, as well as ID card obtainment.

<https://faithaction.org/>

Family Services of the Piedmont- Family Counseling Service

Family Service of the Piedmont offers a variety of counseling services. Professional therapists counsel individuals or families dealing with substance abuse, alcoholism, anger management, depression, anxiety, family stress, physical/sexual abuse, grief counseling, and marital problems. Clients without insurance are still able to receive primary, behavioral, and psychiatric care.

<https://www.fspscares.org/mental-service-substance-abuse/>

Fibro My Way

Fibro My Way's mission is to empower and educate people about fibromyalgia. In addition to their dedication to education and advocacy, this organization provides services and events like health fairs, workshops, exercise classes, job and disability assistance and caregiver support.

www.fibromyway.com

GO FAR (Go Out For A Run)

The GO FAR mission is to empower children through an innovative running program to achieve their goals and pursue healthy lifestyles. Some services include the running fitness program, The Great Pumpkin 5k Trail Run, and a 10 week comprehensive fitness program.

www.gofarclub.org

Goodwill Industries of Central North Carolina (Triad Goodwill)

The Triad Goodwill is an excellent resource for job training and preparation. They provide a variety of in-person and virtual services to help you locate job opportunities, obtain certifications/ licensures, prepare for interviews, create and review your resume, and overcome challenges to employment. They also offer online classes and training sessions, hiring and training events, and career counseling.

<https://www.triadgoodwill.org/>

Greater High Point Food Alliance

The Greater High Point Food Alliance (GHPFA) Strives to coordinate and improve the effectiveness of entities in the greater High Point area focused on alleviating hunger by providing and funding activities to distribute both community and food resources.

www.ghpfa.org

Grief Share Support Groups

Grief share offers support groups to help navigate through the grieving process. There are three different locations in High Point:

Community Bible Church: meets Tuesdays at 6:30 - 8:30 PM; 336-423-4965

Hayworth Wesleyan Church: meets Mondays at 10:00 - 11:00 AM; 336-454-4563

Mitchell's Grove United Methodist Church: meets Tuesdays at 6:30 - 8:00 PM; 336-905-5942

https://www.griefshare.org/countries/us/states/nc/cities/high_point

Growing High Point / Growdega

Growing High Point strives to transform under-resourced neighborhoods by building a resilient and vibrant local food system in the city of High Point. They engage and empower the community through their programs with an entrepreneurial focus such as their community gardens, urban farming initiatives, apiary and beekeeping apprenticeship program, the food hub, and the Growdega mobile grocery store.

<https://growinghighpoint.org/>

Guilford Child Development Center

Guilford Child Development helps young children and families in Guilford County reach their full potential. Guilford Child Development can provide services like their Nurse-Family partnership program, Learning Together Family literary program, healthy pregnancy and parenting classes, childcare assistance, adult education and employment, and child and adult food care program.

www.GuilfordChildDev.org

Guilford Community Care Network

The Guilford Community Care Network (GCCN) assures access to affordable healthcare options and provides health education through their programs and services for low-income, uninsured adults in Guilford County. Also offers adult dental access program which provides dental services to uninsured residents in Guilford County.

<https://guilfordccn.org/>

Habitat for Humanity

Habitat for Humanity of High Point, Archdale, and Trinity brings people together to build homes, communities, and hope. In addition to coordinating volunteer opportunities, Habitat of High Point has a retail store selling donated household items and building materials on North Main Street called "ReStore".

www.habitathp.org

Helping Hands High Point Inc

Appendix 3: Current Community Strategies

Healthy Eating, Active Living		
Activity	Partnerships	Outcomes
Utilize screening tool built into electronic medical record to screen patients for food insecurity focusing specifically on the 27260 zip code.	FaithHealth	Clinical Nutrition using screen to provide education and resources to patients as appropriate. Continue to encourage utilization of screen and accessibility in EMR.
Collaborate with various agencies to determine additional resources and to assess needs throughout Greater High Point.	Greater High Point Food Alliance (GHPFA)	Implemented a food pantry in Hayworth Cancer Center to support our patient going through cancer treatment.
Host a weekly farmer's market May- October, accepting EBT.	High Point Farmer's Market	Cancelled the last two years due to COVID
Provide Community Resource Guide to patients from GHPFA	GHPFA	Guide is updated regularly and provided by the hospital to patients through Social Work, Clinical Nutrition and Pastoral Care. It helps to inform patients of food resources once they leave the hospital.
Provide health education through the Millis Regional Health Education Center		Generally over 6000 participants annually. COVID constraints limited in person education, but the health educators developed online tools to provide to schools to support health education.
Provide scholarships for low income residents participating in the Cardiac or Pulmonary Rehab programs at the HPMC Fitness Center		The Heartstrides program supports about 200 participants per year.
Provide education and health screening programs at community events including the High Point Farmers Market.	High Point Farmer's Market	Participation has been limited due to COVID.

At the Transitional Care Clinic provide follow up and medication services for up to 90 days after discharge. Attempts to link patient with a PCP for ongoing care.		In FY20 the TCC had 1791 visits, 60% uninsured and \$152,646 written off in charity care.
Provide in kind services and funding to the Community clinic of High Point.	Community Clinic of High Point	For FY21: Community Care Clinic of High Point referrals-\$2,301,666.32
Provides free mammograms and PAP smear to women who qualify for the program.	North Carolina Breast and Cervical Cancer Control Program	nurse practitioner and NA (paid for by hospital) part of the program; under and uninsured patients can get screening and then if there is a finding additional services are covered under Medicaid; State provides \$325 per case to cover screening; per patient stipend caps after a certain level of patients and then paid from LoveLine. Target of 320 participants
LoveLine: Funds the cancer transportation program, medication assistance and other services for cancer patients.	High Point Regional Foundation	Serves about 100 participants annually
Respond to specific requests from the community for educational programs and events.		Through the Fitness Center six in person sessions were held in 2020 and then had to convert to Facebook live sessions with over 50 posted.
Hayworth Cancer Center Food Pantry	Greater High Point Food Alliance (GHPFA)	Provides food to oncology patients participating in out LoveLine program. Initiated during COVID as a way to safely provide food to a vulnerable population.

Maternal and Child Health		
Activity	Partnerships	Outcomes
Mommy & Me and Prenatal Classes provided at HPMC. Information provided through physician offices.		Mommy & Me classes on hold due to Covid since March 2020. No update when classes will resume. Face to face prenatal classes have also been on hold since March 2020 due to COVID but virtual classes online are available.
Women's Health Department Manager to serve on the Board of Guilford County Every Baby Guilford	Guilford County Every Baby Guilford	Nurse manager does serve on the board of directors for Every Baby Guilford (Formerly Guilford County Coalition on Infant Mortality)
Lactation Coalition participation	Guilford County Health Department; WIC	Our Lactation Consultants, participate monthly with the Guilford County Breastfeeding Alliance.. Both were panelists on World Breastfeeding Extravaganza for 2021. HP hosted the 2020 Breastfeeding Extravaganza (Hosts every other year). This event is open to pediatricians, obstetricians, IBCLCs, RNs, SWs, community health workers (anyone who works with pregnant or lactating women. The Lactation Consultants offer outpatients consultations. Medicaid and most insurance pay for this outpatient service.
Doula Program	YWCA	Initiated in 2021, provides Doulas services to pregnant woman participating in the YWCA program

Behavioral Health		
Activity	Partnerships	Outcomes
A weekly support program is provided by RHA Behavioral Health for patients admitted to HPMC.	RHA	We have 1 RHA peer support specialist who provides these services Mon-Fri 8am – 12pm on our Inpatient BH Unit. During this time, she interacts with and supports about 30 patients per month. Her interactions are individual and group based. She is also part of our daily treatment team meetings to discuss patient needs and discharge plans.
Collaborate with RHA Behavioral Health to connect patients with a peer support program to improve outcomes once a patient is discharged including assistance getting to appointments, meetings, supporting efficient discharge planning and prevent readmissions.	RHA	Current Peer Support Specialist started in July and has connected 90 of the patients she has interacted with. About 18 patients are connected with improved discharge outcomes per month.
Collaborate with community partners to improve access to Opioid Treatment; including, pregnant women.	Caring Services, ADS, Family Services	Utilize partnerships to connect patients with needed resources.
Collaborate with community partners to create a resource map for Mental Health services. Give Resource list/map to patients.		Utilized as a resource for patients with continued updates
Pay for medications at discharge and 1 refill for patients in need.	Family Services of the Piedmont and Community Clinic	FY20 Medications at D/C = 69 @ \$1,137.57 FY21 Medications at D/C = 105 @ \$2,800.12 Stub Bud through Nov Meds at D/C = 121 @ \$5,221
Provide bus tickets for d/c patients		FY20 Transportation Support = \$2,179.00 FY21 Transportation Support = \$2,137.80 July 2021 - Sept Transport Support = \$1,167

Social Determinates of Health		
Activity	Partnerships	Outcomes
Participate in the Guilford Apprentice Program (GAP) in collaboration with Guilford Technical Community College to provide students with a path to obtain an associate's degree while completing an apprenticeship program. We will accept two students the first year in engineering and supply chain with the plan to grow in the future through the development of a health care track.	GAP	HPMC has provided support for the program for the last 3 years and has accepted their first student in 2021.
Utilize FaithHealth to educate the community on the services that they can provide with an initial focus on the 27260 zip code with the goal of increasing the utilization of the FaithHealth program in our community and by our patients.	FaithHealth Connectors	FaithHealth will work to engage and inform Faith Communities of the opportunities available to support patients and community clients. Proactively, FaithHealth will connect with Neighborhood Associations and other agencies to determine what support can be provided to them as they work to improve the health of the community
Utilize FaithHealth resources to connect with our heart failure patients at high risk for readmission to provide resources needed.	FaithHealth Connectors	FaithHealth will continue to attend the meetings devoted to heart failure patients and will work to help by providing scales and other needed equipment to patients
Fully utilize Financial Access Policies (Charity Care) at High Point Regional and Regional Physicians practices. Expand financial assistance screening to maternity patients.		over \$6 million in charity care provided in FY21
Provide tuition reimbursement for employees.		Additional options for tuition assistance were added in 2021
Career Coaching through the Path Program.		Coaching for students who serve as volunteers

Provide jobs that pay a livable wage.		Living wage adjustments have been made for employees over the past several years bringing our current minimum to \$15/hr.
Transitional Care Clinic.		Provides follow care for high-risk patients up to 90 days after discharge.
Project SEARCH is an international high school transition program that is a unique, business-led, one-year, school-to-work program that takes place entirely in the workplace. The goal for each student participant is competitive employment. The Project SEARCH model involves an extensive period of training and career exploration, innovative adaptations, long-term job coaching, and continuous feedback from teachers, job coaches, and employers.	Project SEARCH	Provides real-life work experience combined with training in employability and independent living skills to help youths with significant disabilities make successful transitions from school to productive adult life.
Community Clinic - monthly lab bill paid through hospital lab department. Lab services provided through Quest		Monthly expenses of about \$10,000. Ensures that the Community Clinic has the resources needed to care for vulnerable patients in our community.
Cab vouchers to transport patients home		This provides a way for our patients to get safely home and not have to attempt to walk or utilize public transportation
flu shots for community events		Multiple events hosted to support community Flu vaccinations.
