

Atrium Health
Wake Forest Baptist

The Amputation Rehab Program

The Amputation Rehab Program of Atrium Health Wake Forest Baptist, provides comprehensive, intensive, inpatient rehabilitation for patients age 13 and older who have limb loss as a result of illness, injury, or a disease process. The Program uses the latest technology, in combination with traditional, hands-on interventions, to ease the trauma resulting from amputation and to help individuals adapt both physically and emotionally to necessary lifestyle changes. The team's interdisciplinary approach to care ensures comprehensive and coordinated treatment so that patients reach their highest level of physical, emotional, and psychological ability. The Program also provides training programs to prepare patients and their families for rehab discharge, to help coordinate equipment needs and home modification, and to provide information on lifetime health and wellness resources.

Philosophy of Care

Each patient is unique, with specific needs, capabilities and potential. Therefore, each patient's treatment plan is individualized and modified as recovery progresses. The rehabilitation team, patient, and family/caregivers work together to set and achieve functional improvement goals.

The Care Team

The Program's success is attributed to its interdisciplinary team, which includes the patient, family members/caregivers, and professionals specializing in:

Rehab Medicine	Clinical Nutrition	Podiatry
Rehabilitation Nursing	Occupational Therapy	Pedorthic Services*
Clinical Psychology	Physical Therapy	Assistive Technology*
Neuropsychology	Speech Language Pathology	Prosthetics & Orthotics*
Social Work	Recreation Therapy	Renal Dialysis

*These services are provided by team members who are not directly employed, but who work very collaboratively with the Atrium Health Wake Forest Baptist Rehab Programs.

Scope of Services

- Board-certified physicians specializing in Physical Medicine and Rehabilitation (PM&R) direct the patient's plan of care on a daily basis.
- Rehabilitation Nursing is provided 24 hours a day, 7 days a week, including Virtual Patient Observation as appropriate.
- Each patient receives a minimum of 15 hours of therapy each week, including a combination of physical therapy, occupational therapy, speech therapy, and/or orthotics/prosthetics training. The types of therapy, intensity of therapy, and schedule are tailored to the needs of each patient. Therapy services are provided between 7AM and 5PM, Monday through Friday and on Saturdays as needed.
- Recreation therapy, clinical social work, neuropsychology, and assistive technology services are available 5 days a week, and are provided based on the needs of each patient.
- Each patient is assigned a Care Coordinator who acts as a liaison between patient, family/caregiver, rehabilitation professionals, and third party payers.
- Atrium Health Wake Forest Baptist provides all ancillary services including, but not limited to, Diagnostic Imaging, Laboratory, Pharmacy, Spiritual Care, and Respiratory Therapy.
- Consulting physician services for other specialties are provided, as needed.
- If services not available within Atrium Health Wake Forest Baptist are needed, referrals or consultations are made for these services, which may include, but are not limited to: orthotics and prosthetics, durable medical equipment, caregiver/family services, substance abuse counseling, vocational rehabilitation, rehab engineering, and driver's assessment and education.

Treatment Goals and Common Interventions

The ultimate goal is to return each patient to the highest level of independence possible, and in most cases, to return the patient to home. Specific treatment goals are individualized for each patient and may include:

- Maximizing function in:
 - Mobility
 - Activities of Daily Living (eating, grooming, dressing, bathing)
 - Bowel and bladder management
- Addressing sexuality and family issues
- Addressing cultural needs
- Disability adjustment and counseling and coping strategies
- Patient and family education for individualized needs
- Addressing the underlying cause of the amputation. Causes may include:
 - Diabetes
 - Peripheral vascular disease
 - Cardiac conditions
 - Trauma
- Addressing prevention of complications or further amputations. Areas of concern may include:
 - Skin care
 - Phantom sensation or phantom pain
 - Exercise tolerance
 - Prevention of falls
 - Medications
 - Depression
- Recommending healthy living practices for weight control and smoking cessation
- Assessing, fitting, and maintaining prosthetic devices
- Optimizing community integration and life roles through community outings, recreation therapy and use of assistive technology

Additional Services

The Assistive Technology Center, located on the campus of Atrium Health Wake Forest Baptist, is a partnership with the North Carolina Assistive Technology Program (NCATP) and is a demonstration center for assistive technology devices (AT).

The Amputation Program team includes a Certified Amputee Coalition Peer Visitor for peer mentoring. The Program also offers an Amputee Support Group, which gives patients with amputation and their families the opportunity to share information, discuss common problems, and learn from the experiences of others.

Demonstrated Excellence in Rehabilitation

The Amputation Program has been awarded accreditation from the Commission on Accreditation of Rehabilitation Facilities. CARF Accreditation means that Atrium Health Wake Forest Baptist's Amputation Rehab Program:

- is committed to excellence in rehabilitative care
- meets rigorous international standards of patient care and satisfaction
- is committed to helping each patient achieve their individualized rehabilitation goals
- constantly works to improve services and stays on the edge of rehabilitation techniques and technology
- surpasses communication expectations with referral and payer sources

Admission Criteria and Referrals

Patients admitted to the Amputation Rehab Program must have realistic rehabilitation goals that reflect the potential for gaining independence or achieving a higher function in self-care activities and mobility. Additionally, a patient must

- Be 13 years of age or older
- Require and be able and willing to participate in intensive physical, occupational and/or speech therapy (if indicated) at least 3 hours a day
- Have the need for more than one type of rehab therapy and have potential for functional improvement.
- Be medically appropriate for an inpatient hospital environment and have stable vital signs.
- Have a supportive social system and a defined, expected discharge destination to home
- Be able to breathe without the help of a mechanical ventilator at all times..

Atrium Health Wake Forest Baptist accepts payment from all major private insurance plans, worker's compensation, Medicare and Medicaid. The Program evaluates and verifies insurance coverage for each patient prior to admission. If the patient does not have insurance coverage for the Rehabilitation Program, the patient and/or family/caregiver will be notified and alternate payment plans or treatment options will be discussed. Any estimated financial responsibilities will be communicated to the patient and/or family. A listing of prices is available at <https://www.wakehealth.edu/Patient-and-Family-Resources/Billing-and-Insurance/Your-Health-Care-Costs>.

The Program welcomes referrals from many sources, including, but not limited to, physicians, short term acute care hospitals, rehab hospitals, nursing facilities, long term acute care hospitals, and home health agencies. To make a referral, call (336) 713-8500 or (888) 605-9568.

For additional information about the program, email Rehab4Life@wakehealth.edu. The Rehabilitation Programs at Atrium Health Wake Forest Baptist do not discriminate against individuals of varying age, disability, race/ethnicity, religion, gender, or sexual preference and strive to understand and be sensitive to these characteristics and to patient-specific preferences.

Amputation Rehab Program Patients – Calendar Year 2023

Number of patients:
55

Lower Extremity Amputations:
51 (93%)

Other amputation:
4 (7%)

71% were males
29% were females

Average Days in Program:
10.9

Hours of Therapy:
3.2 hours per day, 5 days a week

Age Group	Number of Patients
13-17	0
18-40	5
41-65	31
66-85	18
86-100	1

Patient Outcomes – Calendar Year 2023

Patients' ability to return home is a key outcome and expectation for rehabilitation programs. The Amputation Rehab Program returns a higher percentage of patients to home than other programs nationwide.

In 2023, 91% of the Program's patients returned home, compared to the national average of 87%. 5% of patients returned unexpectedly to a hospital setting.. 4% were discharged to a Long Term Care Facility for continued rehab and/or nursing care.

Functional Improvement Goals	% Patients Who Had Improved Function between Admission & Discharge	Average Improvement Between Admission and Discharge
Self-Care	95%	38%
Mobility	95%	54%

Patients' function is measured, or scored, at admission, during the stay, and at discharge. The table to the left shows the percentage of patients who demonstrated functional improvement and the average percentage improvement achieved between admission and discharge from the Program.

Amputation Program Patient/Family Satisfaction (Source: NRC)	% Positive	National Target % Positive
Would Recommend	94.0	79.0
Rate the Facility	88.0	78.1

What to Expect in Your Rehab Program

This page will give you an idea of what your rehab program may include. Please keep in mind that your rehab care team will complete a thorough evaluation after admission and develop a more detailed care plan based on your needs and your family's needs.

Name: _____ Diagnosis: _____ Rehab Physician: _____

Location: _____ Expected Days in Program*: _____ Expected Discharge: _____

Insurance Coverage: _____

On average, patients in the Amputation Program receive 93 minutes of physical therapy 84 minutes of occupational therapy, and 16 minutes of speech therapy per day, 5 days per week.

*Your days may differ because your stay will be tailored to your needs and adjusted throughout your stay to help you meet your goals. The number above is the average length of stay for other patients who have participated in an amputation rehab program.

Services		Treatment Goals
<input type="checkbox"/>	Rehabilitation Physician Services	Manage your medical condition to ensure your safety and progress toward your goals. Nurse practitioners, physician's assistants, medical students, and residents may work in close collaboration with your rehab physician. During your stay, physician orders will be responded to, with results, within 24 hours, unless otherwise specified.
<input type="checkbox"/>	Physical Therapy	Improve & maximize your mobility skills, safety, strength and endurance.
<input type="checkbox"/>	Occupational Therapy	Improve your ability to complete activities of daily living such as eating, dressing, bathing, toileting and home management; address sexuality issues related to impairment.
<input type="checkbox"/>	Speech Therapy	Improve your swallowing, communication and cognitive skills. (If needed)
<input type="checkbox"/>	Rehab Nursing	Manage your bowel and bladder control, address family issues associated with impairment and educate on care needs, including health and wellness. Our team will be asking you to assume more responsibility and independence the closer you get to discharge. This will make you and your family better prepared for your activities of daily living and resuming home life.
<input type="checkbox"/>	Nutrition Services	Educate and ensure proper nutrition during treatment.
<input type="checkbox"/>	Clinical & Neuropsychology	Help you and your family members with emotional and mental health challenges associated with temporary or permanent disability
<input type="checkbox"/>	Recreation Therapy	Educate you and your family on how to adapt to community environment after discharge and how to enjoy recreational activities safely
<input type="checkbox"/>	Care Coordination	Coordinate services with the care team, you, and your family members to ensure needs are met prior to discharge and any follow-up services are arranged
<input type="checkbox"/>	Orthotics and Prosthetics Care	Provide preshrinker, shrinker, limb guard, and custom fitting of orthotic. (If needed)
<input type="checkbox"/>	Other Needs	The Program is attentive to the specific cultural or other needs of each patient. Please let us know if you have any specific needs or requests

What to Expect During Your Stay

The following is a typical schedule for the first three days after admission to the Rehab Program.

Day One

- Arrive on the 3rd floor of the Sticht Center at assigned room.
- Nurse assesses your condition and needs upon arrival to the rehabilitation unit.
- Meet with the physician, social worker and nurses within the first 24 hours.
- Receive an assigned wheelchair for the rehab stay.
- Receive a tentative schedule for each therapy. Throughout your stay, you will receive regular updates on the scheduled times for each therapy service identified for your care plan.

Day Two

- Begin therapy evaluations and treatment, which could include physical therapy, occupational therapy, speech therapy and recreation therapy.

Day Three

- Working with you and your family, the Rehab team develops an individualized Plan of Care based on your condition and determines your functional status. The Plan of Care guides your treatment program. The rehab team reviews your progress toward your goals at least weekly. A family conference may be held for the care team to discuss the discharge plan with the family. Usually this is an in-person meeting, but some family members may attend by phone.

What to Expect During and After Discharge

Discharge dates are planned or set when continued hospitalization is no longer necessary, and/or when you and your family are adequately prepared and discharge destinations are finalized. Many activities must be completed prior to discharge.

For example:

- ✓ Your care team will make recommendations for equipment you will need at home or modifications that you will need to make at home for your safety and continued recovery.
- ✓ Your Care Coordinator will arrange for delivery of equipment.
- ✓ Your care team will determine if you need assistance from a home health agency, which includes nursing and/or therapy at home. Another option is outpatient therapy after your discharge. If the best option for you is home health, your Care Coordinator will give you a list of agencies to choose from near your home and arrange Home Health visits. If outpatient therapy is the best option for you, the Care Coordinator will set up appointments for outpatient therapy.
- ✓ Your care team will review all discharge instructions with you.
- ✓ The unit secretary will schedule follow-up appointments with your physician.

After discharge from the Inpatient Rehabilitation Program:

- Your rehabilitation journey will continue, and you may need additional resources to assist with lifestyle changes. During your stay, we will provide information about additional resources that are tailored to your individual needs. If you have additional needs or questions about community resources, please email: Rehab4Life@wakehealth.edu.
- You will receive an NRC survey to request feedback on your satisfaction with our services. Please note that you may receive 2 surveys — one for your stay in the acute hospital and a second one for your stay in our Rehabilitation Program.
- Prior to discharge, you will be asked how you prefer to be surveyed at 3 months after your discharge. We will either mail, email or phone you per your preference to answer this survey. Asking about your continued recovery after discharge helps us to improve our program and better prepare our patients for a successful return to home.

Resources for Your Continued Recovery

There are many other services within our health system and in your community that may assist in your continued recovery. The next two pages introduce some of the services and resources available through our organization, the local community, or national organizations focused on amputee services. We encourage you to call or visit the website for these organizations. However, please do not hesitate to ask us for more information on these services or for other providers or services in your community.

The **Amputee Coalition** is the nation's leading organization of limb loss, dedicated to enhancing the quality of life for amputees and their families, improving patient care and preventing limb loss. **The National Limb Loss Information Center** provides comprehensive information and resources free of charge. All of the information is reviewed by the Coalition's medical/scientific advisory committee of experts in the field of limb loss.

 888.267.5669
 www.amputee-coalition.org

MedlinePlus is a service of the US National Library of Medicine, **NIH National Institutes of Health**. This website includes educational resources and information on current research in the field of limb loss.

 www.nlm.nih.gov/medlineplus/limbloss.html

Peer support services are designed to provide amputees and their families with an opportunity to meet and talk with others who are successfully coping with amputation. Peer Support services can be provided in informal one-on-one sessions or in small groups. During the Rehab stay, Atrium Health Wake Forest Baptist may be able to offer a one-on-one session upon request. To learn more, please notify your recreation therapist.

After discharge, the following **local support group** is available. Winston-Salem: Live Again – Meets on the third Thursday of every month at the Sticht Center. For more information contact:

 Curt Wilson-336.655.6742
Email: Live.again@ymail.com

Driver Rehabilitation Services include clinical assessments of a person's visual, perceptual, cognitive, physical, and behavioral abilities as it relates to safe and independent driving due to aging, an illness or injury. Two local providers of these services are:

Atrium Health Wake Forest Baptist - Outpatient NeuroRehab

 336.716-8400

 www.driver-rehab.com

Driver Rehabilitation Services, P.A.

 888.888.0039 or 336.697.7841

Atrium Health Wake Forest Baptist's Assistive Technology Center is a partnership with the North Carolina Assistive Technology Program (NCATP) and is a demonstration center for assistive technology devices (AT). Assistive Technology or "AT" is any piece of equipment or device that a person with a disability uses to make every day living easier, to be more productive in the workplace or to be more independent. Therapists, consumers/patients, and family members can visit the center at Medical Plaza Miller to look at devices, have them demonstrated, and try them out. Many of the devices can be loaned out for short periods of time to try out in the environment of choice. For more information:

Contact: Paul Eklund

Resources for Your Continued Recovery

Atrium Health Wake Forest Baptist offers **MyWakeHealth**, a patient portal that gives patients unprecedented access to their health information, without the unnecessary burden of waiting. **MyWakeHealth** allows you to get answers to your medical questions from the comfort of your own home; schedule your next appointment or view details of your past and upcoming appointments; and access test results. For more information:

 www.mywakehealth.com

Orthotics and prosthetics not only improve an amputee's quality of life, but also may enable them to avoid surgery, shorten their hospital stay, and return to their communities and the workforce more quickly. Three local providers of these services are:

Hanger Prosthetics & Orthotics, LLC

 336.768.1933

 www.advancedpros.com/

Bio-tech Prosthetics & Orthotics

 336.768.3666

 <http://www.btpo.com/>

Restore POC

 336.765-2425

 <https://restorepoc.com/>

Tierney Orthotics and Prosthetics

 336.546.7165

 <https://tierneyoandp.com/>

The **Winston-Salem Mayor's Council for Persons with Disability** hosts free monthly meetings that are open to the public. Meetings are at 11:30 am on the second Tuesday of each month. For more information:

 336.245.5678

The Inpatient Rehabilitation Programs are pleased to offer a **Rehabilitation Resource Center** on the Inpatient Rehabilitation Unit in the Sticht Center.

If you need assistance finding additional resources in your community: Email Rehab4Life@wakehealth.edu.
