

The Academic Learning Health System Scholars Program (aLHSSP) (T32 Postdoctoral Training Grant)

REQUEST FOR APPLICATIONS

The NIH-funded Academic Learning Health System Scholars Program (aLHSSP) postdoctoral training is designed to provide scholars with the methodological and professional skills to conduct research in the complex environments of health systems and to disseminate and implement the findings from such research into practice.

This two-year full-time postdoctoral training program provides a stipend, time for research, and full tuition support to pursue graduate school training, including an MS in Translational and Health System Science, with the guidance of a multidisciplinary mentoring team.

Applications are currently accepted on a rolling basis.

Eligibility

- The applicant must be a US citizen, noncitizen national, or permanent resident (Green Card holder) with holding a doctorate (MD, DO, PhD, PharmD, DNP or similar degree).
- Participants must devote 40 hours/week to the education and research activities associated with this program for the full training period (a small number of hours per week may be spent on clinical or other duties).
- Applicants with a previous T32 or similar appointment should inquire regarding eligibility.
- The program is committed to selecting a diverse pool of candidates, particularly with respect to NIH underrepresented status (under-represented minorities, disability status, disadvantaged status) and gender and to ensure that potential biases of our faculty, staff, and scholars, do not impact the hiring process.

Online Application

To formally apply for the aLHSSP, please follow the instructions provided below and fill out an online application in REDCap. Demographic data and other information requested help us provide summary information about the program to NIH.

Please provide the following documents and upload to the REDCap link below:

<https://redcap.wakehealth.edu/redcap/surveys/?s=3EECN39E49M3LERN>

Please use 11-point Arial font with 1" margins when completing the Personal Statement with Career Goals, Research Interests and Experience, Previous Research Experience and Health Equity Statement.

- **Curriculum vitae** — Provide your updated CV.
- **Personal Statement with Career Goals** (max. 1 page)
Briefly describe your long-term career goals and how this T32 program in academic Learning Health System Science will help you achieve them.
- **Research Interests and Experience** (max. 1 page)
Briefly describe areas of interest that address a pressing health system issue (e.g. improving patient outcomes, access to care, or healthcare costs) that you may want to pursue during the fellowship, and any previous research experience.
- **Health Equity Statement**
Provide a statement describing your commitment to diversity and health equity in research and the health system.
- **References**
Provide the contact information for (3) references to speak to your potential to successfully conduct the proposed program in Learning Health System Science.
- **Transcripts**
Please upload unofficial transcripts (official transcripts will be needed for graduate school admission).

Selection Process

Eligible applicants will be screened and reviewed by aLHSSP faculty. The top applicants will be invited to interviews.
