

Are you an active CHW ready to expand your knowledge and make a bigger impact on your community? The PREFER CHW Training Program is your chance to gain valuable skills in **genetics** and learn how to support your community in accessing genetic clinical services and research.

The PREFER CHW Training Program (*PaRtnEring to build understanding of gEnomics Responsibly*) is a virtual course where you will learn:

- How to collect and use family health history
- Navigate genetics resources
- Information about genetic conditions like hereditary cancers (breast, ovarian, colorectal) and sickle cell disease
- About ethical issues related to genetics research
