April 2022

Welcome to our e-newsletter!

Greetings -

We've experienced a busy few months here at the Institute with the launch of the Innovation Accelerator, an endeavor to help support innovation from research to commercialization for regenerative medicine start-ups and growth companies.

We are excited to share that the first tenant of ReMDO's Innovation Accelerator is BioMedInnovations (BMI), a company that focuses on innovative technologies that work toward solutions for tissue and organ perfusion and preservation. Their reduced scale mobile platform, known as recove™, will help the medical field transport donor organs further and for longer to help more patients. BMI is moving to the Regenerative Medicine Hub in Winston-Salem, NC, from Research Triangle Park's First Flight Center in Raleigh.

You can read more about these efforts below. Also, please note that the annual Regenerative Medicine Essentials course, which is again combining with the World Stem Cell Summit meeting in a combined, virtual platform, is set for **June**
