ACCREDITATIONS & APPROVALS
Carolinas College of Health Sciences is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate and baccalaureate degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097 or call 404-679-4500 for questions about the accreditation of Carolinas College of Health Sciences. Normal inquiries about the college, such as admission requirements, financial aid, academic program, etc., should be addressed directly to Carolinas College of Health Sciences.

The college is also approved by the North Carolina State Approving Agency for Veterans Benefits.

Carolinas College also holds programmatic accreditation and/or approvals from the following:

The Radiologic Technology and the Radiation Therapy programs are accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT)
20 N. Wacker Dr., Suite 2850
Chicago, IL 60606
312-704-5300, jrcert.org

State Reciprocity Agreements
The SACSCOC approved Carolinas College to offer distance education programs in 2014. Higher education institutions must be authorized to offer distance education programs and/or courses in states other than their own. Admission to a program or course is dependent on Carolinas College’s ability to secure authorization from the applicant’s state of residence.

On April 11, 2017, the National Council for State Authorization Reciprocity Agreements (NC-SARA), approved institutional participation for Carolinas College. To learn more about NC-SARA, please visit their website at nc-sara.org.

Carolinas College will seek recognition by the American Board of Registration of Radiologic Technologists (ABRET) for the Neurodiagnostic Technology certificate program and will pursue accreditation through the Commission on Accreditation of Allied Health Education Programs for the associate degree in Neurodiagnostic Technology. The Associate Degree Nursing (ADN) program is approved by the North Carolina Board of Nursing and accredited by the Accreditation Commission for Education in Nursing (ACEN)
3390 Peachtree Rd. NE, Suite 1400
Atlanta, GA 30326
404-975-5000, acenursing.org

American Council on Education
Association for Institutional Research
Carolinas Association of Collegiate Registrars and Admissions Officers
Consortium of Hospital-Affiliated Colleges and Universities
Council for Advancement and Support of Education
Council for Higher Education Accreditation
National Association of College and University Business Officers
National Association of Collegiate Admission Counseling
National Association of Student Financial Aid Administrators
National League for Nursing
National Student Nurse Association – Sustaining Member
Phi Theta Kappa – National Honor Society for Two-Year Colleges

ABOUT THE COLLEGE
Carolinas College admits qualified applicants without regard to race, color, age, religion, gender, sexual orientation, gender identity, national origin, veteran status, disability, genetic information or any other basis prohibited by law. Concerns or inquiries regarding the application of Title IX regulations may be directed to Sandra Harvey, dean of administrative and financial services and Title IX coordinator at 704-648-2155. The college does not discriminate in the administration of educational policies, admission policies, financial aid policies and other college administered programs.

Carolinas College is in compliance with the Clery Act of 1990. The campus safety policies and the safety and security report are available on the college’s website. The college is in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act, and students or applicants with a qualified disability may contact the student success coordinator for more information.

Vision
Carolinas College of Health Sciences will be the first and best choice for healthcare education.

Mission
The mission of Carolinas College of Health Sciences is to transform lives by educating, engaging and empowering professionals for an evolving healthcare environment.

Core Values
CARING
COMMUNITY
EQUITY
INTEGRITY
TEAMWORK

Student Achievement
The college maintains specific objectives and measures for each of the above commitments as well as for each program and division of the college. These outcome measures comprise our institutional effectiveness plan, available on the college website in the About Us section under Institutional Information. For more information about our graduation rates, the median debt of students who complete our programs and other important information, please visit the Institutional Information section of our website.

HISTORY OF THE COLLEGE
The Early Years
The roots of Carolinas College of Health Sciences date back to the early 1940s when Charlotte Memorial Hospital, now Atrium Health Carolinas Medical Center, provided hospital-based nursing and allied health training. Anchoring the college’s history was the Charlotte Memorial Hospital School of Nursing and the Charlotte Memorial Hospital School of Medical Technology, which has been in continuous existence since 1942.

During these early years, the Charlotte-Mecklenburg Hospital Authority (CMHA) responded to the growing healthcare industry and the need for a highly skilled workforce by opening the School of Radiologic Technology in 1955 followed by the School of Surgical Technology.

The College Today
Carolinas College of Health Sciences offers high-quality, innovative healthcare programs led by experienced industry professionals.

Student Success
The college offers personalized education and support for students with disabilities. The Office for Disability Services provides reasonable accommodations and supports for eligible students. Students who believe they may qualify are encouraged to contact the Office for Disability Services directly.

The Early Years
The roots of Carolinas College of Health Sciences date back to the early 1940s when Charlotte Memorial Hospital, now Atrium Health Carolinas Medical Center, provided hospital-based nursing and allied health training. Anchoring the college’s history was the Charlotte Memorial Hospital School of Nursing and the Charlotte Memorial Hospital School of Medical Technology, which has been in continuous existence since 1942.

During these early years, the Charlotte-Mecklenburg Hospital Authority (CMHA) responded to the growing healthcare industry and the need for a highly skilled workforce by opening the School of Radiologic Technology in 1955 followed by the School of Surgical Technology.

FUTURE DIRECTIONS
The college envisions expanding its educational offerings to meet the needs of healthcare professionals and the healthcare industry. This includes opportunities for continued education and workforce development. The college remains committed to providing high-quality education and support to students within a caring and inclusive environment.
Responding to the emergence of community colleges and the increasing number of nursing programs, the Charlotte Memorial Hospital School of Nursing closed in 1967. However, 20 years later, realizing the need for registered nurses would exceed the number being educated in the community, CMHA, now Atrium Health, reestablished the School of Nursing in the late 1980s.

**The Foundation for a New College**

The application to establish a new nursing program was submitted to the North Carolina Board of Nursing in 1990. Initial approval status was granted in May of 1990 and the first students were admitted in the fall of the same year. The college was originally located on Morehead Street on the campus of Carolinas Medical Center. Full approval status was granted and the first class graduated in 1992.

In December 1993, CMHA Board of Commissioners passed a resolution to incorporate the CMHA School of Nursing and to appoint a separate board of directors. Degree-granting authority was provided by the Hospital Authority Act (NC General Statute 113E-23 (a) (31)) and was delegated to the college by the CMHA Board of Commissioners.

In May 1994, the college moved into the newly renovated Rankin Education Center on Blythe Boulevard on the campus of Carolinas Medical Center. Seeking to become more than a school of nursing, the foundation for a new college was set in 1995 when the CMHA School of Nursing received initial accreditation by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to offer associate degrees. This regional accreditation was reaffirmed in 2020 and will be reviewed again in 2030. In 1995, there were 146 students enrolled at the CMHA School of Nursing.

**Expanding the College**

In July 1996, the CMHA School of Nursing Board of Directors changed the name of the school to Carolinas College of Health Sciences and approved plans to incorporate other healthcare programs. The existing hospital-based programs in Radiologic Technology and Surgical Technology joined the college in August 1996 and the Medical Technology program joined in January 1997. In 1999, the college began offering Nurse Aide I and Phlebotomy training, Nurse Aide II was offered for the first time in 2006. These three programs formed the original core of the continuing education department, opened in 2007. In 2007, there were 511 students enrolled at Carolinas College.

To increase access to nursing education, Carolinas College expanded the role of general education and created the General Studies Pre-Nursing program in 2002. Originally a certificate program designed to provide a pathway into nursing, in 2011, the college developed a degree program in General Studies with a Pre-Nursing track. A Pre-Radiologic Technology track was added in August 2014.

In a partnership with Carolinas Medical Center’s Pre-Hospital Medicine Department, the Emergency Medical Sciences program was started in 2003 offering paramedic education. This program was discontinued in 2008. In that same year, the board of directors approved the expansion of radiologic sciences by creating a program in Radiation Therapy. The first radiation therapy students were admitted in August 2009.

In 2011, the Medical Technology program became the Medical Laboratory Science program. Also in 2011, the college added Anesthesiology Technology and a degree program in Surgical Technology. In 2013, the first Histotechnology students were accepted, and in 2014, the college received approval to offer fully online distance education programs. In 2011, there were 424 students enrolled at Carolinas College.

In 2015, as space on the college campus became more challenging, the Histotechnology program moved into vacant space on the campus of Atrium Health-Mercy. Looking to place more emphasis on programs and services focused on the future workforce needs of Atrium Health and the greater healthcare community, the college closed the Surgical Technology program and graduated the last class of surgical technologists in May 2018. In 2018, the college also closed the continuing education department, including the Nurse Aide I and II programs, and transitioned the Phlebotomy program to Clinical Laboratory Sciences. The remaining continuing education programs were transferred to the Charlotte Area Health Education Center (AHEC). In 2019, there were over 600 students enrolled at Carolinas College.

**Continued Growth**

In 2017, Carolinas College received approval from SACSCOC to confer baccalaureate degrees. Approval was also received to offer the first baccalaureate degree program, the Bachelor of Science in Nursing designed for licensed nurses (RN-BSN), which was the college’s first fully online degree program. The program first enrolled students in August 2018 and the first cohort of students graduated in May 2020. Following the board of director’s approval to expand into Neurodiagnostic Technology in 2018, the college received permission to create this program. The first students enrolled in January 2020. Enhancing the opportunity for continued growth, Carolinas College relocated to a new and larger facility in December 2019.

Looking to the future, Carolinas College is poised to grow strategically with the needs of Atrium Health, particularly in the areas of clinical laboratory sciences, health sciences, nursing, and diagnostic and imaging sciences.

**Accolades**

Carolinas College continues to prepare graduates to exceed state and national certification testing benchmarks and excel at graduating students into healthcare roles.

- **2010**
  - Washington Monthly – #3 two-year college in the nation (first-ever national ranking)

- **2011**
  - StateUniversity.com – best two-year college in the nation

- **2012**
  - StateUniversity.com – best two-year college in the nation

**2015**

- WalletHub.com – 95th percentile among all community colleges for quality and value

- **2017**
  - Forbes – top 30 trade colleges in the country
  - Nursing Schools Almanac – #9 associate degree nursing program in the nation
  - Victory Media – designated a STEM JobsSM approved college

- **2018**
  - Forbes – top 30 trade colleges in the country
  - Zippia.com – best junior college in North Carolina for job placement and highest earning graduates

- **2019**
  - RNCareers.org – #14 associate degree nursing program in North Carolina

- **2020**
  - NursingDegreeSearch.com – best associate degree nursing program in North Carolina
  - NursingDegreeSearch.com – #7 best associate degree nursing program in the Southeast
  - Universities.com – #9 radiologic technology program in North Carolina
  - RNCareers.org – #13 associate degree nursing program in North Carolina
  - RegisteredNurse.org – #14 associate degree nursing program in North Carolina

- **2021**
  - College Factual – #8 best college for non-traditional students in North Carolina
  - Nursing Schools Almanac – #9 associate degree nursing program in North Carolina
  - TopRN-BSN.com – #4 nursing school in Charlotte

**For More Information:**

- Visit the official website of Carolinas College of Health Sciences at [www.carolinascoll.edu](http://www.carolinascoll.edu)
- Contact the admissions office for further details or to schedule a tour.

**Accreditation:**

Carolinas College of Health Sciences is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award associate, bachelor’s, and master’s degrees. Contact the Commission on Colleges at 800.252.9555 for information about the accreditation status of this college.

For more information, visit the website: [www.sacscoc.org](http://www.sacscoc.org)
Admission to the College

Carolinas College of Health Sciences seeks applicants who, on the basis of supportive data and in the judgment of admissions and faculty reviewers, appear to be able to complete an educational program offered by the college. Generally, admission to all programs is competitive with the most qualified applicants offered the limited number of spaces. The college considers all applicants without regard to race, color, age, religion, gender, sexual orientation, gender identity, national origin, veteran status, disability, genetic information, or any other basis prohibited by law.

GENERAL ADMISSION REQUIREMENTS

Applicants to Carolinas College must meet certain criteria to be considered for admission. Students entering clinical healthcare programs have access to patients and patient records at contracted clinical sites. For this reason, applicants are screened for criminal background and employment records that may indicate problematic behaviors. The following may preclude students from being admitted to the college:

- Having been charged with or convicted of certain misdemeanors or felonies.
- Owning money to the college.
- Being ineligible for clinical placement.

Due to limited resources to support international students and a focus on providing healthcare professionals for the greater Charlotte area, the college does not authorize requests for temporary visas. Proof of legal residency may be required. International students who are accessing student visas. All offers of admission are contingent upon successful completion of all pre-enrollment requirements. Students placed on the alternate list are notified as space becomes available.

Admission Requirements by Program

Admission to the following programs is competitive and offered on a space-available basis. To be considered for admission, applicants must submit an online college application form, the application fee, and all necessary items required by the specified deadline published on the website. Some programs have an ongoing application review. These programs will be noted on the college’s website under Admissions/Deadlines.

Clinical Laboratory Sciences

Histotechnology and Medical Laboratory Science

The general admission criteria for the Histotechnology and Medical Laboratory Science programs include:

- Official transcripts from all post-secondary institutions attended demonstrating an earned (by program start date) baccalaureate degree preferably in biology, chemistry, or related science field. Applicants who are attending an institution with an affiliation agreement, using a fourth year to earn a certificate in histotechnology or medical laboratory science, must submit official undergraduate transcript(s) during their third year or immediately prior to application.
- Cumulative GPA of 2.50 or above and science/math GPA of 2.50 or above.
- Official college transcripts must demonstrate completion of the required prerequisite courses (see program specifics below) with a grade of “C” or above.
- Three Carolinas College reference forms from college instructors, college advisors or employers. References must be from individuals who reside in the United States.
- Interview with college faculty (scheduled with most competitive applicants after submitting application, transcripts and references).

Applicants to either program who hold an international baccalaureate degree must take at least 12 semester hours of science coursework at an accredited U.S. baccalaureate academic institution before their application can be considered. The program chair will determine acceptable courses. All international transcripts must be evaluated by a recognized evaluating agency which will verify the U.S. baccalaureate degree equivalency.

Additional Histotechnology admission criteria include:

- Minimum of 30 semester credit hours of biology and chemistry (must include credits in both) by date of application.
- Minimum of 3 semester credit hours of college algebra or higher-level math are required by date of application.
- Prerequisite/Required courses of microbiology*, anatomy/physiology* and organic chemistry (or biochemistry*) must be completed by program start date.

*These prerequisite/required courses must have been completed within seven years of the program start date. Applicants will be asked to update their coursework if they were completed more than seven years before the program start date.
Additional Medical Laboratory Science admission criteria include:

- Minimum of 16 semester credit hours in biology by date of application. Required courses include microbiology, microbiology lab and immunology to be completed by program start date. Genetics, molecular biology and anatomy/physiology are highly recommended.
- Minimum of 16 semester credit hours in chemistry by date of application. Required courses include organic chemistry or biochemistry to be completed by the program start date.
- Minimum of 3 semester credit hours in statistics to be completed by the program start date.

*These prerequisite/required courses must have been completed within seven years of the program start date. Applicants will be asked to update their coursework if they were completed more than seven years before the program start date.

Admission to Non-Credit Laboratory Science Courses

The Clinical Laboratory Sciences department also offers non-credit courses that lead to eligibility for certification in phlebotomy and blood bank technology. Enrollment in these courses is on a space-available basis and requires an online college application, payment of tuition and other information listed below.

Phlebotomy

- Minimum high school GPA of 2.0 required.
- Locally administered assessment test with a score of 14 or higher.

Specialist in Blood Bank Technology/Transfusion Medicine

- Official college transcripts from a U.S. accredited baccalaureate program.
- Minimum college GPA of 2.50.
- Proof of current ASCP certification (MLS, MT or BB).
- Minimum of two years full-time blood bank-related experience.
- Proof of current employment in a blood center, transfusion service or blood bank-related field.
- Two Carolinas College reference forms (one from current supervisor).
- After admission to the program, applicant must:
  - Identify a qualified mentor who has agreed to provide assistance and guidance.
  - Submit “Mentor Agreement Form” along with mentor’s curriculum vitae.
  - Secure clinical sites (blood center, transfusion service and reference lab).
  - Submit clinical affiliation “Memo of Understanding” for each clinical site.

Diagnostic and Imaging Sciences

Radiation Therapy

The admission criteria for the Radiation Therapy program include:

- Official transcripts from all post-secondary institutions attended demonstrating a combined cumulative GPA of 2.5 or higher and completion of an associate degree or higher.
- Official transcript indicating enrollment in or an earned associate degree or equivalent diploma from a JRCERT-accredited radiography or nuclear medicine technology program.
- Three completed Carolinas College reference forms.
- Verification of eight hours of clinical observation in a radiation therapy department prior to the college interview.
- Interview with college faculty (scheduled with most competitive applicants after review of application and transcripts).

Radiologic Technology

The general admission criteria for the Radiologic Technology program include:

- Official high school transcript verifying graduation or equivalent. Minimum 2.5 cumulative GPA for math and science courses.
- Official transcripts from all post-secondary institutions attended with a combined cumulative GPA of at least a 2.5.
- Official SAT or ACT test score report with a minimum 900 (SAT) or 19 (ACT). Copies of official score reports and scores reported on an official transcript will be accepted. For the SAT, only the critical reading and math scores are considered in calculating the minimum requirement. For the ACT, the composite score is used. The SAT/ACT requirement is waived for applicants holding a baccalaureate degree or higher.
- Interview with college faculty (scheduled with most competitive applicants after review of applications and transcripts).

Additional admission criteria for entry via the Pre-Radiologic Technology pathway include:

Students seeking guaranteed admission via the General Studies Pre-Radiologic Technology pathway who earn an overall GPA of 3.21 in the following four courses will receive guaranteed admission to the Radiologic Technology program: BIO 168, BIO 169, and two General Studies courses (excluding HLC 102). Guaranteed admission must be earned in three consecutive semesters. Students must also complete a four-hour observation in a radiology-related area and submit a personal reflection evaluation form and an observer evaluation form. A post-clinical shadowing conference will be scheduled following the observation.

Bachelor of Science in Medical Imaging

The general admission criteria for the Bachelor of Science in Medical Imaging (BSMI) program include:

- Official transcripts from all post-secondary institutions documenting a combined cumulative GPA of 2.5 or higher.
- Copy of current, unencumbered certification or licensure from one of the following: ARRT, ARDMS, NMTCB or equivalent.

Neurodiagnostic Technology

The admission criteria for the Neurodiagnostic Technology program include:

- Official high school transcript verifying graduation and college preparatory coursework. Applicants with fewer than 24 hours of college credit must have a minimum high school GPA of 2.0. Applicants with a GED must submit 24 semester hours of college credit with at least nine semester hours in math and science.
- Official transcripts from all post-secondary institutions attended demonstrating a combined cumulative GPA of 2.0 or higher.
- Official individual total TEAS score of 58.7 or higher.
Admission to Non-Degree Courses

Computed Tomography

- Official transcripts from all post-secondary institutions attended demonstrating a combined cumulative GPA of 2.5 or higher and completion of an associate degree or higher.
- Official transcript indicating enrollment in or an earned associate degree or equivalent diploma from a JRCERT-accredited radiography or nuclear medicine technology program.

Mammography

- Official transcripts from all post-secondary institutions attended demonstrating a combined cumulative GPA of 2.5 or higher and completion of an associate degree or higher.
- Official transcript indicating enrollment in or an earned associate degree or equivalent diploma from a JRCERT-accredited radiography program.

Health Sciences and General Studies

The general admission criteria for the General Studies program include:

- Official high school transcript or equivalent verifying graduation and college preparatory coursework.
- Official transcripts from all post-secondary institutions attended with a combined cumulative GPA of at least 2.0.
- Official transcript(s) must demonstrate completion of any prerequisite coursework.
- Official SAT or ACT test score report with a minimum 900 (SAT) or 19 (ACT). Copies of official score reports and scores reported on an official transcript will be accepted. For the SAT, only the critical reading and math scores are considered in calculating the minimum requirement. For the ACT, the composite score is used. The SAT/ACT requirement is waived for applicants holding a baccalaureate degree or higher.

Bachelor of Science in Health Sciences – Healthcare Simulation Specialization

Admission criteria for the Bachelor of Science in Health Sciences – Healthcare Simulation Specialization include:

- Official high school transcript or equivalent verifying graduation and college preparatory coursework.
- Official transcripts from all post-secondary institutions attended with a combined cumulative GPA of at least 2.5.
- Official SAT or ACT test score report with a minimum 900 (SAT) or 19 (ACT). Copies of official score reports and scores reported on an official transcript will be accepted. For the SAT, only the critical reading and math scores are considered in calculating the minimum requirement.

Admission criteria for the SIM certificate option include:

- Official transcripts from all post-secondary institutions attended demonstrating an earned (by program start date) baccalaureate degree.
- Cumulative GPA of 2.50 or above.

Healthcare Simulation Certificate

Admission criteria for the Healthcare Simulation certificate include:

- Official transcripts from all post-secondary institutions attended demonstrating an earned (by program start date) associate degree.
- Cumulative GPA of 2.50 or above.

Nursing

Associate Degree Nursing

There are two pathways for admission to the Associate Degree Nursing (ADN) program:

- Direct admission to the ADN program
- Conditional admission to the ADN program through the Pre-Nursing pathway

The ADN Admissions Committee will determine to which pathway the applicant is admitted when the admission decision is made.

The general admission criteria listed below is the same for both pathways:

- Official high school transcript verifying graduation and college preparatory coursework. Applicants with fewer than 24 hours of college credit must have a minimum high school GPA of 2.5. Applicants with a GED must submit 24 semester hours of college credit with at least nine semester hours in math and science.
- Official individual total TEAS score at the 50th percentile rank or higher of the national mean.

Admission as a Non-Degree Seeking General Studies Student

There is an opportunity for students to take courses in a non-degree seeking student status. Courses are on a space-available basis only.

To apply, applicants must submit the following:

- Official high school transcript, GED equivalency OR college transcript (with 12 credit hours of completed coursework)
- Official transcript(s) must demonstrate completion of any prerequisite coursework

Students taking courses in the non-degree seeking status are limited to a maximum of 12 credit hours while in that status and are not eligible for financial aid.

Admission as a Non-Degree Seeking General Studies Student

There is an opportunity for students to take courses in a non-degree seeking student status. Courses are on a space-available basis only.

To apply, applicants must submit the following:

- Official high school transcript, GED equivalency OR college transcript (with 12 credit hours of completed coursework)
- Official transcript(s) must demonstrate completion of any prerequisite coursework

Students taking courses in the non-degree seeking status are limited to a maximum of 12 credit hours while in that status and are not eligible for financial aid.
The general admission criteria for the program include:

- Bachelor of Science in Nursing GPA, all pre-enrollment requirements including the NC Nurse Aide Registry, CPR, all pre-requisite courses and the progression policy will apply (described in the Academic Information Records section of this catalog). The actual start date for the Nursing program is based on the successful completion of the courses at the required criteria for full admission is met, a written agreement maintained in their permanent academic record and cannot be changed once classes begin. Only the first attempt in each course will be considered and once the criteria for full admission is met, the progression policy will apply (described in the Academic Information Records section of this catalog). The actual start date for the Nursing program is based on the successful completion of the courses at the required GPA, all pre-enrollment requirements including the NC Nurse Aide Registry, CPR, all pre-requisite courses and space availability.

### Final Pre-Enrollment Requirements

- Official transcripts from all post-secondary institutions attended with a combined cumulative GPA of at least 2.5.
- Official SAT or ACT test score report with a minimum 900 (SAT) or 19 (ACT). Copies of official score reports and scores reported on an official transcript will be accepted. For the SAT, only the critical reading and math scores are considered in calculating the minimum requirement. For the ACT, the composite score is used. The SAT/ACT requirement is waived for applicants holding a baccalaureate degree or higher.
- Applicants who previously attended a nursing program will not be considered for admission if they were unsuccessful in two or more nursing classes, or the same nursing class twice. Withdrawals from nursing courses are considered unsuccessful attempts.

Additional admission criteria for entry as a Transfer from another nursing program include:

- Applicants wishing to transfer nursing courses to Carolinas College may apply to the Nursing program and must meet all requirements listed above. The most recent nursing course must have been completed within one year and applicants must not have been unsuccessful in two or more nursing courses or unsuccessful in the same course twice. Withdrawals from nursing courses are considered unsuccessful attempts. Prior to enrollment, successful completion of NUR 100, BIO 168 and MAT 101 is required. Additional courses may be required. After admission to the Nursing program, the applicant would then petition for advanced standing (transfer credit for nursing coursework). A skills check will also be required.

Conditional admission criteria for entry via the Pre-Nursing pathway include:

- Students who receive conditional admission via the General Studies Pre-Nursing pathway must complete 14 credit hours at Carolinas College within two semesters and earn an overall GPA of 3.21. The 14 credit hours must be from the General Studies courses in the Nursing master curriculum (excluding NUR 100/HLC 102) and must include BIO 168 and BIO 169 (eight credit hours). The incoming student will identify the two additional courses after transfer credit has been awarded. The courses will be identified in advance of enrollment in a written agreement maintained in their permanent academic record and cannot be changed once classes begin. Only the first attempt in each course will be considered and once the criteria for full admission is met, the progression policy will apply (described in the Academic Information Records section of this catalog). The actual start date for the Nursing program is based on the successful completion of the courses at the required GPA, all pre-enrollment requirements including the NC Nurse Aide Registry, CPR, all pre-requisite courses and space availability.

### Clinical Laboratory Sciences – Phlebotomy

- Return signed admission confirmation form and non-refundable $200 deposit.
- Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
- Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
- Submit official transcripts for final grades in any in progress coursework noted on the application and/or graduation from programs in progress at the time of the application.
- Receipt of verification of eligibility for clinical placement.
- Verify compliance with all essential functions of the program.
- Complete the Test of Essential Academic Skills (TEAS).
- Complete the Smarter Measure Learning Readiness Indicator.

### Final Pre-Enrollment Requirements

All offers of admission are sent by email and are contingent upon successful completion of the pre-enrollment requirements listed below.

- Official transcripts from all post-secondary institutions attended with a combined cumulative GPA of at least 2.5.
- Official SAT or ACT test score report with a minimum 900 (SAT) or 19 (ACT). Copies of official score reports and scores reported on an official transcript will be accepted. For the SAT, only the critical reading and math scores are considered in calculating the minimum requirement. For the ACT, the composite score is used. The SAT/ACT requirement is waived for applicants holding a baccalaureate degree or higher.
- Applicants who previously attended a nursing program will not be considered for admission if they were unsuccessful in two or more nursing classes, or the same nursing class twice. Withdrawals from nursing courses are considered unsuccessful attempts.

Conditional admission will be granted to ADN students upon acceptance to the ADN program at Carolinas College or selected institutions with whom Carolinas College has an articulation agreement, students in their last semester of enrollment in any ADN program, or recent ADN graduates. Students receiving conditional admission must maintain their unencumbered RN license within their first semester of enrollment in upper-level nursing courses to receive full admission and progress in the curriculum.

### Admission to Non-Credit Nursing Course

The Nursing program offers a non-credit course that leads to eligibility for certification in nurse aide. Enrollment in this course is on a space-available basis and requires an online college application, payment of tuition and other information listed below. Prior to the start of classes, incoming nurse aide students must demonstrate eligibility for clinical placement including a criminal background check and drug screen.

### Nurse Aide I

- Official high school transcript verifying graduation or equivalent.

### Bachelor of Science in Nursing

The general admission criteria for the Bachelor of Science in Nursing (RN-BSN) program include:

- Official transcripts from all post-secondary institutions attended with a combined cumulative GPA of 2.25 or higher and proof of graduation from an accredited diploma or associate degree nursing program.
- Copy of current, unencumbered RN license.
- Completion of the following courses, or their equivalent, prior to or while concurrently enrolled in the program:
  - English Composition (3 credits)
  - Human Anatomy & Physiology with lab (8 credits)
  - Microbiology with lab (4 credits)
  - College Math (3 credits)
  - Introduction to Psychology (3 credits)
  - Developmental Psychology (3 credits)
  - Introduction to Sociology (3 credits)
  - 100-level Humanities Elective (3 credits)
  - General Education Elective (3 credits)

- Conditional admission will be granted to ADN students upon acceptance to the ADN program at Carolinas College or selected institutions with whom Carolinas College has an articulation agreement, students in their last semester of enrollment in any ADN program, or recent ADN graduates. Students receiving conditional admission must maintain their unencumbered RN license within their first semester of enrollment in upper-level nursing courses to receive full admission and progress in the curriculum.

### Admission to Non-Credit Nursing Course

The Nursing program offers a non-credit course that leads to eligibility for certification in nurse aide. Enrollment in this course is on a space-available basis and requires an online college application, payment of tuition and other information listed below. Prior to the start of classes, incoming nurse aide students must demonstrate eligibility for clinical placement including a criminal background check and drug screen.

### Nurse Aide I

- Official high school transcript verifying graduation or equivalent.

### Final Pre-Enrollment Requirements

All offers of admission are sent by email and are contingent upon successful completion of the pre-enrollment requirements listed below.

- Official transcripts from all post-secondary institutions attended with a combined cumulative GPA of 2.25 or higher and proof of graduation from an accredited diploma or associate degree nursing program.
- Copy of current, unencumbered RN license.
- Completion of the following courses, or their equivalent, prior to or while concurrently enrolled in the program:
  - English Composition (3 credits)
  - Human Anatomy & Physiology with lab (8 credits)
  - Microbiology with lab (4 credits)
  - College Math (3 credits)
  - Introduction to Psychology (3 credits)
  - Developmental Psychology (3 credits)
  - Introduction to Sociology (3 credits)
  - 100-level Humanities Elective (3 credits)
  - General Education Elective (3 credits)
- Conditional admission will be granted to ADN students upon acceptance to the ADN program at Carolinas College or selected institutions with whom Carolinas College has an articulation agreement, students in their last semester of enrollment in any ADN program, or recent ADN graduates. Students receiving conditional admission must maintain their unencumbered RN license within their first semester of enrollment in upper-level nursing courses to receive full admission and progress in the curriculum.

### Admission to Non-Credit Nursing Course

The Nursing program offers a non-credit course that leads to eligibility for certification in nurse aide. Enrollment in this course is on a space-available basis and requires an online college application, payment of tuition and other information listed below. Prior to the start of classes, incoming nurse aide students must demonstrate eligibility for clinical placement including a criminal background check and drug screen.

### Nurse Aide I

- Official high school transcript verifying graduation or equivalent.

### Final Pre-Enrollment Requirements

All offers of admission are sent by email and are contingent upon successful completion of the pre-enrollment requirements listed below.

- Official transcripts from all post-secondary institutions attended with a combined cumulative GPA of 2.25 or higher and proof of graduation from an accredited diploma or associate degree nursing program.
- Copy of current, unencumbered RN license.
- Completion of the following courses, or their equivalent, prior to or while concurrently enrolled in the program:
  - English Composition (3 credits)
  - Human Anatomy & Physiology with lab (8 credits)
  - Microbiology with lab (4 credits)
  - College Math (3 credits)
  - Introduction to Psychology (3 credits)
  - Developmental Psychology (3 credits)
  - Introduction to Sociology (3 credits)
  - 100-level Humanities Elective (3 credits)
  - General Education Elective (3 credits)
Clinical Laboratory Sciences – Specialist in Blood Bank Technology
• Return signed admission confirmation form and non-refundable full course fee.
• Verify compliance with all essential functions of the program.

Diagnostic and Imaging Sciences – Radiation Therapy
• Return signed admission confirmation form and non-refundable $200 deposit.
• Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
• Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
• Submit official transcripts demonstrating completion of required prerequisite courses with a “C” or better. Grades in AP, IB or honors courses will be considered individually. College-level algebra or equivalent is required for the Radiation Therapy program.
• Receipt of official transcripts for final grades in any in progress coursework noted on the application and/or graduation from programs in progress at the time of application.
• Submit verification of current ARRT certification (card or certificate copy)
• Submit documentation of current Basic Life Support for Healthcare Providers certification from an approved American Heart Association course with an expiration date on or after one year of study.

Diagnostic and Imaging Sciences – Radiologic Technology
• Return signed admission confirmation form and non-refundable $200 deposit.
• Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
• Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
• Receipt of official transcripts for final grades in any in progress coursework noted on the application and/or graduation from programs in progress at the time of application. High school-level algebra and biology are required for the NDT program.
• Submit documentation of current Basic Life Support for Healthcare Providers certification from an approved American Heart Association course with an expiration date on or after one year of study.

Diagnostic and Imaging Sciences – Neurodiagnostic Technology
• Return signed admission confirmation form and non-refundable $200 deposit.
• Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
• Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
• Receipt of official transcripts for final grades in any in progress coursework noted on the application and/or graduation from programs in progress at the time of application.
• Submit documentation of current Basic Life Support for Healthcare Providers certification from an approved American Heart Association course with an expiration date on or after one year of study.

Diagnostic and Imaging Sciences – Radiologic Technology
• Return signed admission confirmation form and non-refundable $200 deposit.
• Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
• Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
• Submit official transcripts demonstrating completion of required prerequisite courses with a “C” or better. Grades in AP, IB or honors courses will be considered individually. High school-level algebra, biology and chemistry are required for Radiologic Technology.
• Receipt of official transcripts for final grades in any in progress coursework noted on the application and/or graduation from programs in progress at the time of application.
• Submit documentation of current Basic Life Support for Healthcare Providers certification from an approved American Heart Association course with an expiration date on or after one year of study.

Diagnostic and Imaging Sciences – Radiologic Technology
• Return signed admission confirmation form and non-refundable $200 deposit.
• Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
• Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
• Submit official transcripts demonstrating completion of required prerequisite courses with a “C” or better. Grades in AP, IB or honors courses will be considered individually. High school-level algebra, biology and chemistry are required for Radiologic Technology.
• Receipt of official transcripts for final grades in any in progress coursework noted on the application and/or graduation from programs in progress at the time of application.
• Submit documentation of current Basic Life Support for Healthcare Providers certification from an approved American Heart Association course with an expiration date on or after one year of study.
• Receipt of verification of eligibility for clinical placement.
• Verify compliance with all essential functions of the program.
• Complete the Smarter Measure Learning Readiness Indicator.

Diagnostic and Imaging Sciences – Neurodiagnostic Technology
• Return signed admission confirmation form and non-refundable $200 deposit.
• Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
• Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
• Receipt of official transcripts for final grades in any in progress coursework noted on the application and/or graduation from programs in progress at the time of application.
• Submit documentation of current Basic Life Support for Healthcare Providers certification from an approved American Heart Association course with an expiration date on or after one year of study.
• Receipt of verification of eligibility for clinical placement.
• Verify compliance with all essential functions of the program.
• Complete the Smarter Measure Learning Readiness Indicator.
Diagnostic and Imaging Sciences – Computed Tomography and Mammography

- Return signed admission confirmation form and non-refundable $200 deposit.
- Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
- Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
- Receipt of verification of eligibility for clinical placement.
- Verify compliance with all essential functions of the program.

Bachelor of Science in Medical Imaging (BSMI)

- Return signed admission confirmation form and non-refundable $200 deposit.
- Receipt of official transcripts for final grades in any ‘in progress’ coursework noted on the application.
- Submit verification of current ARRT, ARDMS, NMTCB or equivalent certification.
- Prior to clinical education course enrollment:
  - Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
  - Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
  - Submit documentation of current Basic Life Support for Healthcare Providers certification from an approved American Heart Association course.
  - Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement).
  - Receipt of official transcripts for final grades in any in progress coursework noted on the application.
  - Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
  - Verify compliance with all essential functions of the program.
  - Receipt of verification of eligibility for clinical placement.
- Submit verification of placement on the NC Nurse Aide I registry. To be placed on the registry, applicants must have completed an accredited Nurse Aide I course and passed the Nurse Aide I exam. This requirement must be met by the deadline set on the New Student Onboarding page.
- Submit documentation of current Basic Life Support for Healthcare Providers certification from an approved American Heart Association course with an expiration date on or after one year of study.
- Receipt of verification of eligibility for clinical placement.
- Verify compliance with all essential functions of the program.
- Complete the Smarter Measure Learning Readiness Indicator.
- Satisfactorily complete sterile dressing, medication administration and a physical assessment without coaching (ADN nursing – transfer only).

Health Sciences and General Studies

- Return signed admission confirmation form and non-refundable $200 deposit.
- Submit immunization records to the admissions office indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
- Submit official transcripts demonstrating completion of required prerequisite courses with a “C” or better. Grades in AP, IB or honors courses will be considered individually. High school-level biology and chemistry are required for the ADN program.
- Receipt of official transcripts for final grades in any in progress coursework noted on the application and/or graduation from programs in progress at time of application.
- Verify compliance with all essential functions of the program.
- Complete the Test of Essential Academic Skills (TEAS).
- Complete the Smarter Measure Learning Readiness Indicator.

Nursing – Associate Degree Nursing (ADN)

- Return signed admission confirmation form and non-refundable $200 deposit.
- Complete a health assessment and baseline drug screen through Atrium Health (students who are Atrium Health teammates are exempt from this requirement). The health assessment includes submission of immunization records to Atrium Health indicating current and complete compliance with NC Administrative Code (10A NCAC 41A.0401) as amended in 1994.
- Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
- Submit official transcripts demonstrating completion of required prerequisite courses with a “C” or better. Grades in AP, IB or honors courses will be considered individually. High school-level biology and chemistry are required for the ADN program.
- Receipt of official transcripts for final grades in any in progress coursework noted on the application and/or graduation from programs in progress at the time of application.
- Complete the online criminal background authorization form (students who are Atrium Health teammates are exempt from this requirement).
- Submit verification of eligibility for clinical placement.
- Verify compliance with all essential functions of the program.

Readmission

Readmission

A student seeking to return to a program following a withdrawal or dismissal, except after an approved leave of absence, must apply to be readmitted. The student submits the progression/readmission application packet with a non-refundable application fee to the dean of student affairs and enrollment management. It is recommended that students complete a program within 150% of normal completion time. A dismissed or withdrawn student is eligible for readmission to the same program only one time. If a student has been away from a program for 12 or more months, they must reapply through the regular admissions process.
A student applying for readmission to the college must reenter no later than one year from the last successfully completed applied course. Applied courses (e.g., Nursing, Radiologic Technology, Neurodiagnostic Technology) must be repeated if the length of time between successful completion of a course and readmission to a consecutive course exceeds one calendar year or if substantial curriculum changes have occurred. Students applying for readmission into the first course in a healthcare program must do so by the published deadlines for that start date, otherwise, the deadline for applying for readmission is generally three months prior to the anticipated start date.

Applicants for readmission known to be in default on a student loan or owing money to the college will not be considered for readmission nor will those ineligible for clinical placement with Atrium Health. A student may be readmitted to a program only once. Readmitted students who are unsuccessful in any subsequent master curriculum course will be academically dismissed and ineligible for readmission into their current program. A student dismissed from a clinical program can opt to complete the General Studies associate degree program.

Applications for readmission are reviewed by the Academic, Progression and Graduation (APG) Committee, with decisions based on the following:

- Interview with the APG Committee (required for students who were dismissed, if requested by the APG committee for students who withdrew or on an APG-approved leave of absence).
- Academic and administrative experience at the college.
- Exit information provided by the program chair, faculty, student success coordinator, and/or others, related to factors that may have led to the withdrawal/dismissal of the student (e.g., progression paperwork).
- Actions taken to remedy problems that interfered with prior success, if relevant.
- Anticipated probability of success upon reentry.
- Space availability.

Additional aspects of progression and readmission are addressed in program-specific sections of this catalog.

Transfer and Advanced Standing Credit

The college recognizes knowledge and competence attained through formal, non-formal and non-traditional approaches to learning. The director of student records and information management will evaluate the transcripts of all applicants who accept their offer of admission for advanced standing credit. All advanced standing credit will be considered transfer credit, will not earn a grade and will not be used to compute the grade point average. Comparable courses with grades of “C” or better from institutions with US Department of Education or Council for Higher Education Accreditation approval, advanced placement examinations, SAT scores, CLEP scores and/or challenge examinations may be considered for credit. “Comparable courses” are those which are similar in breadth, depth and content to those at Carolinas College and are taught by faculty members with similar qualifications. To request consideration for additional transfer credit not awarded initially, students must submit the Transfer Credit Evaluation Request Form along with the course description and course syllabus for each course where credits were received from non-regionally accredited institutions or not initially believed to be equivalent at Carolinas College coursework. Challenge testing is approved and administered by the General Studies program chair. Time limitations may apply for transfer credit. All transfer and advanced standing credit must be completed before entering the college, with the exception of those entering as non-degree seeking. Students may not be dually enrolled in another institution for the purpose of receiving transfer credit. Students must complete 25% of required program credits at Carolinas College. Students can receive a maximum of 75% of the total coursework required for graduation from any program through advanced standing or transfer credit. All requests for evaluation for advanced standing credit must be completed within a student’s first semester of enrollment.

ESSENTIAL FUNCTIONS

The following are examples of activities which a student is required to perform in order to be successful in the specific program. Reasonable accommodations in meeting the essential functions may be provided upon request.

General Studies, Health Sciences, and Nursing (ADN & RN-BSN)

- Critical thinking ability sufficient for clinical judgment, ability to organize responsibilities, identify cause - effect relationships and make decisions. Collect, organize and analyze data and clearly communicate in verbal and written form. Manage time and systemize actions to complete tasks.
- Interpersonal abilities sufficient to interact with individuals, families and groups from a variety of social, emotional, cultural and intellectual backgrounds. Ability to establish rapport with patients, families and healthcare team members.
- Communication abilities sufficient for interaction with patients, family, faculty, staff, physicians and other healthcare professionals in verbal and written form. Ability to effectively read and comprehend technical and professional materials and to follow oral and written instruction.
- Ability to initiate patient education, to interpret and document patient actions and to initiate appropriate responses.
- Physical abilities sufficient to walk, bend, push, pull, lift, balance and maneuver in small places; maneuver heavy equipment; lift, carry and balance items weighing up to 50 pounds individually or additional weight with assistance; full range of body motion; gross and fine motor abilities sufficient to provide safe and effective care; endure long hours of standing, walking and sitting.
- Tactile, auditory and visual acuity sufficient for physical assessment; to observe and monitor patient responses; to perform palpation functions; to perform therapeutic interventions and to interact in clinical, lab and classroom environments.

Histotechnology and Medical Laboratory Science

- Physical abilities sufficient to move from room to room, maneuver in small places, reach and bend and sit and stand for prolonged periods performing moderately taxing continuous physical work. Ability to stoop, reach and lift 50-pound loads.
- Gross and fine motor abilities sufficient to manipulate, maneuver, adjust and control small objects with coordination, such as tissues, forceps, glass slips, and coverslips (Histotechnology); phlebotomy equipment to collect blood specimens from patients (Medical Laboratory Science); and efficiently and accurately operate laboratory equipment, control and adjust laboratory instruments, manipulate a computer keyboard and calculate, record and transmit laboratory information.
- Visual abilities sufficient to distinguish color, consistency, depth and density of biological specimens and reagents, employ a clinical grade microscope to discriminate fine differences in structure and color in microscopic specimens and read calibration lines on pipettes, laboratory instruments, graphs displayed in print and on a video monitor.
- Critical thinking abilities sufficient to demonstrate rational judgment, organize tasks and responsibilities, make logical decisions and analyze data and reports. Recognize and safely work with hazardous materials, infectious biological specimens and equipment.
- Communication abilities sufficient to communicate effectively and efficiently in English; read and comprehend technical and professional materials; accurately follow oral and written instructions in performing laboratory tests; communicate with faculty, students, staff, physicians and other healthcare professionals in oral and written formats; independently prepare research papers and present reports; and take paper, computer and laboratory practical examinations.
Radiation Therapy, Radiologic Technology, Neurodiagnostic Technology, Computed Tomography, Mammography, and Bachelor of Science in Medical Imaging

- Critical thinking ability sufficient for sound judgment; sufficient problem-solving skills to perform duties in a timely manner; ability to organize responsibilities; ability to identify cause-effect relationships and make decisions; ability to manage time and systemize actions to complete tasks; ability to collect, organize and analyze data; ability to recognize potentially hazardous materials, equipment and situations and proceed safely.
- Interpersonal ability sufficient to interact effectively and sensitively with individuals, families, and groups from a variety of socioeconomic, cultural, emotional, racial, religious and intellectual backgrounds; ability to establish rapport with patients, families and healthcare professionals.
- Communication ability sufficient for interaction with patients, family, faculty, staff, physicians and other healthcare professionals in verbal and written form; ability to read and comprehend technical and professional materials and to follow oral and written instruction; ability to clearly and concisely convey instructions and assess comprehension and ability to recognize and respond appropriately to non-verbal cues.
- Physical ability sufficient to endure long hours of walking and standing; routinely walk, bend, push, pull, lift, stoop, kneel, squat, balance and maneuver in small places; maneuver heavy equipment; ability to lift 20 pounds over the head; lift, carry and balance items weighing up to 50 pounds individually or additional weight with assistance; possess a full range of body motion; coordination and muscular control; ability to reach and operate overhead equipment.
- Gross and fine motor skills sufficient to manipulate equipment and to provide safe and effective care; ability to manipulate a computer keyboard.
- Hearing sufficient to adequately perceive and interpret audio signals from equipment and alarms, and to respond to patient questions or comments.
- Visual acuity to work in dim lighting and distinguish colors; ability to view computer monitors for extended periods.
- Tactile ability sufficient for physical assessment, to observe and monitor patient responses, to perform palpation functions, to perform therapeutic interventions, to manipulate and position patients and to interact in clinical, lab and classroom environments.
- Olfactory senses sufficient to smell or detect smoke, chemicals and electrical hazards.

Phlebotomy

- Critical thinking ability sufficient to organize responsibilities and make decisions.
- Interpersonal abilities sufficient to interact with individuals from a variety of backgrounds.
- Communication abilities sufficient for interaction with others in verbal or written form.
- Physical abilities sufficient to move about freely and maneuver in small spaces.
- Gross and fine motor abilities to manipulate phlebotomy equipment to collect specimens.
- Visual ability sufficient to discern colors and perform phlebotomy procedures.

Specialist in Blood Bank Technology/Transfusion Medicine

- Critical thinking abilities sufficient to demonstrate rational judgment, organize tasks and responsibilities and make logical decisions.
- Interpersonal abilities sufficient to interact with individuals from a variety of backgrounds.
- Communication abilities sufficient to communicate effectively and efficiently in English and read and comprehend technical and professional materials.
- Gross and fine motor abilities to manipulate required laboratory equipment.
- Visual ability sufficient to discern colors and perform designated procedures.

Nurse Aide I

- Critical thinking ability sufficient to organize responsibilities and make decisions.
- Interpersonal abilities sufficient to interact with individuals from a variety of backgrounds.
- Communication abilities sufficient for interaction with others in verbal or written form.
- Physical abilities sufficient to walk, bend, push, pull, lift, balance and maneuver in small places; maneuver heavy equipment; lift, carry and balance items weighing up to 50 pounds individually or additional weight with assistance; full range of body motion; gross and fine motor abilities sufficient to provide safe and effective care; endure long hours of standing, walking and sitting.
- Tactile, auditory and visual acuity sufficient for physical assessment; to observe and monitor patient responses; to perform palpation functions; to perform therapeutic interventions and to interact in clinical, lab and classroom environments.
Tuition and Fees

Carolinias College of Health Sciences maintains the following tuition and fee schedule.

<table>

Note: Certain programs and courses may have additional fees. Medical insurance is available on a per-semester basis payable directly to the insurance provider. See student affairs office for details.

Refund Policy

The tuition refund policy is applied to students who officially withdraw for any reason and is based on the date the written withdrawal is submitted to student affairs. This policy applies to all standard academic terms. Student fees, application fees and the admissions deposit are not refundable. When a student officially withdraws, the College will refund tuition according to the following schedule:

- Prior to the first day of the term, 100% of tuition and course fees will be refunded. (Does not apply to non-credit classes.) Fees associated with the admission process such as application fees, background check fees and tuition deposits are not refunded.
- During the first week of class, 90% of tuition is refunded
- After the first week of class up to 10% of term, 50% of tuition is refunded
- Between 11% and 25% of term, 25% of tuition is refunded
- After 25% of term, no refund

Students dismissed from the college or a course will not be eligible for a refund.

Tuition will be retained for non-credit classes when an enrolled student does not officially withdraw within two business days prior to the class start date. Background check fees are not refunded.

A separate refund policy will apply to Title IV Federal Financial Aid. When a refund is due to the Department of Education due to unearned financial aid, that amount will be deducted from any tuition refund owed to the student.

FINANCIAL ASSISTANCE

The college administers financial aid without regard to race, color, age, religion, gender, sexual orientation, gender identity, national origin, veteran status, disability, or any other basis prohibited by law. The goal of student financial assistance is to provide resources to students who without such funding would otherwise be unable to attend Carolinas College. Financial assistance can be in the form of federal loans and grants, state and other sources of loans and grants, and scholarships.

HOW TO APPLY FOR FINANCIAL AID AT CAROLINAS COLLEGE

All students who attend Carolinas College must complete the Free Application for Federal Student Aid (FAFSA) form whether they intend to use federal financial aid to pay their expenses or not. Data collected in the FAFSA form is used in the awarding process for loans, grants, and scholarships. In order to receive maximum consideration for all available financial aid programs, the FAFSA should be filed by April 15 prior to each
academic year for which a student wishes to be considered for financial aid. The standard academic year is August – July each year. When submitting the FAFSA form, students must request that it be sent to: Carolinas College FAFSA school code: 031042

TYPES OF FEDERAL FINANCIAL ASSISTANCE

The majority of financial aid that is awarded is in the form of federal loans and grants.

Federal Pell Grants are awarded to eligible undergraduate students who have not earned a bachelor’s or professional degree. Eligibility is based on the FAFSA results, need, and the number of credit hours in which the student is enrolled. The federal government limits the total semesters a student can receive the Federal Pell Grant. The Federal Pell Grant does not have to be repaid.

A Federal Supplemental Educational Opportunity Grant (FSEOG) is for undergraduate students with exceptional financial need; that is, students with the lowest EFC with priority given to students who receive Federal Pell Grants. FSEOG is a need-based grant that does not have to be repaid.

Federal Work Study provides part-time jobs for undergraduate, graduate and professional students with financial need allowing them to earn money to help pay education expenses. The program encourages community service work and work related to the student’s program(s) of study. This program helps students to lower their potential loan debt.

William D. Ford Federal Direct Loans

The William D. Ford Federal Direct Loan program provides low interest loans for students and parents to help pay post-secondary education expenses. The lender is the U.S. Department of Education rather than a bank or other financial institution.

In 2013, Congress passed, and the president signed, the Bipartisan Student Loan Certainty Act, which ties federal student loan interest rates to financial markets. Under this act, interest rates will be determined each June for new loans being made for the upcoming award year, which runs from July 1 to the following June 30. Each loan will have a fixed interest rate for the life of the loan.

There are three types of William D. Ford Federal Loans

Direct Subsidized Loans are for students with demonstrated financial need, as determined by the FASFA. No interest is charged while a student is enrolled in school at least half-time. For first-time borrowers after July 1, 2013, there is a “maximum eligibility period” (measured in academic years) of 150% of the published length of the program(s) that can receive Direct Subsidized Loans. The time limit does not apply to Direct Unsubsidized Loans or Direct PLUS Loans.

Direct Unsubsidized Loans are not based on financial need. Interest is charged during all enrollment periods and the loans are available to undergraduate and graduate students.

Direct Plus Loans are low-interest loans for parents of dependent students and graduate students. Interest is charged during all enrollment periods beginning on the date of the loan’s first disbursement. Approval is subject to a credit check to determine credit worthiness. Parents may apply online at studentloans.gov and will also use their FSA ID number from the FASFA to electronically sign the application, and if approved, the Parent Loan Agreement (Master Promissory Note).

Dependent student whose parents are ineligible for a Direct Plus Loan may be eligible to receive additional Direct Unsubsidized Loan funds.

Fees and Rates Associated with Direct Loans

Loan Origination Fees

Most federal student loans have loan fees that are deducted proportionately from each loan disbursement that is received. This means the money received will be less than the amount that was borrowed. For information on current interest rates and origination fees associated with these federal loans please visit: studentloans.gov.

Academic Year Loan Limits as Determined by Federal Guidelines

Dependent Students (except students whose parents are unable to obtain PLUS Loans)

- First-Year Undergraduate Annual Loan Limit
  - $5,500 – No more than $3,500 of this amount may be in subsidized loans.
- Second-Year Undergraduate Annual Loan Limit
  - $6,500 – No more than $4,500 of this amount may be in subsidized loans.
- Third Year and Beyond Undergraduate Annual Loan Limit
  - $7,500 – No more than $5,500 of this amount may be in subsidized loans.
- Subsidized and Unsubsidized Aggregate Loan Limit
  - $31,000 – No more than $23,000 of this amount may be in subsidized loans.
Independent Students (and dependent undergraduate students whose parents are unable to obtain PLUS Loans)

- First-Year Undergraduate Annual Loan Limit
  $9,500 – No more than $3,500 of this amount may be in subsidized loans.

- Second-Year Undergraduate Annual Loan Limit
  $6,500 – No more than $4,500 of this amount may be in subsidized loans.

- Third-Year and Beyond Undergraduate Annual Loan Limit
  $12,500 – No more than $5,500 of this amount may be in subsidized loans.

- Subsidized and Unsubsidized Aggregate Loan Limit
  $57,500 for undergraduates – No more than $23,000 of this amount may be in subsidized loans.

Academic Level Classification

The following criteria are used to define the student’s undergraduate academic level:

<table>
<thead>
<tr>
<th>Total Credits Earned</th>
<th>Academic Level</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-29</td>
<td>First-Year or Freshman</td>
</tr>
<tr>
<td>30-59</td>
<td>Second-Year or Sophomore</td>
</tr>
<tr>
<td>60-89</td>
<td>Third-Year or Junior</td>
</tr>
<tr>
<td>90+</td>
<td>Fourth-Year or Senior</td>
</tr>
</tbody>
</table>

OTHER TYPES OF FINANCIAL ASSISTANCE

Private Education Loans, also known as Alternative Education Loans, help bridge the gap between the actual cost of education and the limited amount the government allows students to borrow in its programs. Private loans are offered by private lenders and there are no federal forms to complete. When completing an application for a Private Education Loan, Carolinas College may be listed as Charlotte Mecklenburg Hospital Authority. Please note these loans usually have higher interest rates and repayment terms.

Veteran’s Benefits

Carolinas College is approved to administer Veterans Affairs (VA) benefits through the North Carolina State Approving Agency. Carolinas College is a veteran-friendly college and seeks to ensure that veteran students are successful. Veteran’s benefits are available for eligible students enrolled in qualified programs. Please visit benefits.va.gov for more information.

For students receiving VA educational benefits, the college will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or require the student to borrow additional funds due to a delay in the disbursement of funding from the VA under Chapter 31 or 33.

The Carolinas College VA Certifying Officials are:
- Cynthia Peace – Cynthia.Peace@CarolinasCollege.edu
- Paige Levesque – Paige.Levesque@CarolinasCollege.edu

Student Emergency and Assistance Fund

Through generous donations of Carolinas College alumni, constituents and teammates, funds are available to award those experiencing financial hardship due to emergency or catastrophic situations.

These funds are awarded through financial aid as scholarships and do not have to be repaid.

To be considered for assistance, a student needs to submit an application for the Carolinas College Student Emergency & Assistance Fund. All students are eligible to apply for these funds.

Atrium Health Education Forgiveness Loan

Students enrolling in eligible programs are given the opportunity to receive an Atrium Health Education Forgiveness Loan. Loan amounts vary by program. Students receiving this funding pay it off by working in a qualifying position for which they received funding within an eligible Atrium Health location. Students who do not complete the program or fail to repay the service obligation must repay the loan with interest. Students cannot be in default on a federal loan. Students must also complete all required Atrium Health Education Forgiveness Loan documentation.

Eligible programs include:
- Histotechnology
- Medical Laboratory Science
- Neurodiagnostic Technology
- Nursing (ADN & BSN)
- Radiation Therapy
- Radiologic Technology

For more information please visit teammates.atriumhealth.org/careers/career-development-center/educational-assistance/loan-forgiveness-programs

Scholarships

Funds from the Atrium Health Foundation, local individuals, businesses, and organizations are made available to students each year in the form of scholarships. The online scholarship application is open March 15 – April 15 of each year. Students will receive an email announcement each year when the scholarship application opens. Students will be considered for all scholarships for which they are eligible based on the donor’s criteria. Scholarship criteria may include academic achievement (merit) and/or financial need. Additional information may be obtained from the financial aid office.

+ TABLE OF CONTENTS
Scholarship amounts are subject to the availability of funds.

North Carolina Forgivable Education Loan for Service Program (FELS)
Established by the North Carolina General Assembly in 2011, the Forgivable Education Loans for Service program provides financial assistance to qualified students enrolled in an approved education program and committed to working in critical employment shortage professions in North Carolina. For the 2020-2021 academic year, eligible degree programs may be found by clicking the link below. The North Carolina State Education Assistance Authority provides administration for the program. For more information please visit: cfnc.org/FELS.

North Carolina Need-Based Scholarship Program
Created by the 2011 North Carolina General Assembly, this is a need-based program for NC residents attending an institution of higher education located in North Carolina. For more information please visit: cfnc.org/NBS.

THE FINANCIAL AID AWARDING PROCESS
Most financial aid is awarded based on need. The amount of an award varies depending upon the student’s verified financial need. Financial aid will only be awarded to students who meet the federal and state eligibility requirements.

Information provided on the FAFSA and the amount of funds available for distribution determine the award amount.

- Need is determined by subtracting the resources of the student and the Expected Family’s Contribution (EFC) from the total cost of attendance based on the student's program(s) of study.
- The total financial aid awarded cannot exceed the published cost of attendance.
- The total cost of attendance is determined by the financial aid office and may include tuition, fees, room and board, books, transportation, and miscellaneous expenses.
- The award may include a combination of funds from loans, grants and scholarships.

Financial aid awards from loans, grants and scholarships are applied to the cost of attending Carolinas College and are generally credited directly to the student’s account.

Federal financial aid cannot be used to pay for repeats of courses already successfully completed at Carolinas College or courses outside the student’s program(s) of study.

A student borrowing loans for the first time at Carolinas College must complete the Loan Agreement (Master Promissory Note) and Loan Entrance Counseling. Both documents can be found online at studentloans.gov. Students must use their FSA ID number from the FAFSA to electronically sign the Master Promissory Note. Students are encouraged to complete the Financial Awareness Counseling that can also be found online at studentloans.gov. For the school selection, Carolinas College is listed as Charlotte Mecklenburg Hospital Authority.

Each year, students are notified of their financial aid award with a letter posted to their account in SONIS, Carolinas College’s student information system. Students are required to accept, deny or modify (lower the amount) their award electronically.
SATISFACTORY ACADEMIC PROGRESS FOR FINANCIAL AID – MANITAINING ELIGIBILITY FOR FEDERAL AID

The federal Satisfactory Academic Progress (SAP) standard for financial aid is different than the institution’s standard by the same name to establish a student’s academic standing at Carolinas College. Students must meet the federal SAP standard to maintain eligibility for federal financial aid. Satisfactory academic progress is measured once at the end of each semester for all degree and diploma programs. Students who withdraw or take an approved leave of absence will have satisfactory academic progress measured upon their notification of intent to return and before re-enrolling.

The Financial Aid director will review students who receive financial aid to determine their eligibility to continue to receive financial aid based on both qualitative and quantitative criteria.

Qualitative Criteria
1. Undergraduate students must maintain a 2.0 cumulative GPA.
2. Only the grade obtained for a repeated course will be used in determining GPA and is considered the final grade.

Quantitative Criteria
1. Hours Attempted: 67% of the total credit hours attempted must be successfully completed. Hours attempted include transfer hours accepted, hours for courses that are repeated, hours from course withdrawal, hours for courses failed, and hours for courses successfully passed.
2. Maximum Time Frame: Federal regulations limit the maximum time frame to no more than 150% of the published length of the program as measured in credit hours.
   a. Example of the 150% rule is:
      Program requires 72 credits/students are eligible up to 108 attempted credit hours. 
      72 credits x 150% = 108 credit hours attempted.

All enrollment periods, including those in which students did not receive financial aid, are evaluated to determine if the student meets the quantitative and qualitative standards. For students who change programs/majors, only the credits attempted and accepted by the registrar toward the new major will be included in the calculation of Satisfactory Academic Progress.

Students not meeting either the qualitative or quantitative criteria for Satisfactory Academic Progress will be notified and placed on financial aid probation for the next term. If the student has not regained eligibility after completion of the probationary term, they will not be eligible for financial aid until they are able to re-establish satisfactory academic progress.

APPEALS

If a student is determined to be ineligible for financial aid due to failure to meet the Satisfactory Academic Progress standard after the probationary term, the student can appeal the decision.

Decisions regarding financial aid continued eligibility (except the 150% rule) may be appealed in writing to the dean of student affairs and enrollment management. The appeal must be in writing and must include:
1. Student’s name
2. The last 4 digits of the Social Security number
3. Facts upon which the appeal is based
4. A statement of why the student failed to meet the SAP requirements and what has changed to allow the student to be successful

Bases for an appeal can include, but are not limited to:
1. Extended illness or hospitalization of the student
2. An accident which incapacitates the student for an extended period of time
3. Death or extended illness of an immediate family member
4. Unusual financial/work related situations

Students will be notified of the appeal decision within two weeks of receipt of the written appeal request. If the appeal is approved, the student will be considered on SAP probation and will receive available financial aid for one additional semester only. If the appeal is denied, the student is ineligible to receive financial aid until they meet all of the SAP requirements. Satisfactory Academic Progress probation is only granted one time per student.

RETURN OF TITLE IV FUNDS

Title IV funds and state funds are awarded to a student under the assumption that the student will attend school for the entire period for which the assistance is awarded. When a student withdraws, the student may no longer be eligible for the full amount of Title IV and state funds that the student was originally scheduled to receive. If a recipient of a Title IV grant, loans funds, and/or state funds withdraws from the college before the 60% point of the term, a portion of the awarded funds must be returned to the federal aid program after calculation of the return to Title IV funds. This may result in a balance on the student’s account. Students should consult with financial aid in advance when considering withdrawal or a leave of absence from the college.
Facilities

Carolinas College is the primary occupant of the 56,007-square-foot building located at 2110 Water Ridge Parkway, Charlotte, NC 28217. The building houses classrooms, laboratories, offices and common space for students and teammates. Students have access to Atrium Health-owned housing located near the Atrium Health Carolinas Medical Center (CMC) campus, have parking on the CMC campus in the MMP Deck and rotate through clinical experiences at CMC and other hospitals.

Bookstore

As a service to students, faculty and staff, the college contracts with an online bookstore. Textbooks, supplies and course-related materials are available. The online bookstore is accessible through a link on the college’s learning management system.

Skills Labs

Most of the college’s programs have a dedicated or shared lab available to students and faculty during and outside class time, allowing for learning experiences and the practice of skills.

Carolinas Simulation Center

Carolinas College provides its students and faculty access to Carolinas Simulation Center, a globally recognized, multidisciplinary education center. The center is accredited by both the American College of Surgeons as a Comprehensive Education Institute and the Society for Simulation in Healthcare in the areas of assessment, research, teaching/education and systems integration. It is one of only a few centers in the world with dual accreditation, distinguishes the center as a regional leader in providing simulation-based healthcare education. Carolinas Simulation Center is available to college faculty members for teaching specific skills and clinical situations in a simulated environment and to students for the practice of skills, critical thinking, communication and teamwork.

Library

The college contracts with the Charlotte Area Health Education Center (AHEC) Library located on the campus of Atrium Health Carolinas Medical Center (CMC) to provide comprehensive information and library services to students and faculty members. The library is an 11,500-square-foot facility providing print and digital media and reference materials as well as multiple computer stations, audio-video viewing rooms and conference rooms. Wi-Fi enabled meeting and quiet study spaces are available 24 hours a day, seven days a week via ID badge access. The library’s collection is organized according to the National Library of Medicine’s classification standards. In addition to the traditional library services, students and faculty members have full access to the AHEC Digital Library (ADL) providing more than 7,000 full-text journals, e-books and robust databases. The ADL is available from any computer with internet access, either on or off campus.

Computer Lab

The college computer lab is open 24 hours a day, seven days a week to all students. Additional computers for student use are available in designated student study rooms, the student commons area and at the Charlotte AHEC Library. Guidelines for use are available in the Acceptable Use of Information Technology policy.

Food Service

A canteen is available 24 hours a day, seven days a week offering hot and cold foods and a variety of snacks and drinks. Additional food options are available within easy driving distance of the college. Restaurants less than a mile away from the new campus include: Jersey Mike’s Subs, Panera Bread, Chipotle, Jocks & Jill’s Sports Grill, Anita’s Mexican Grill, Einstein Bros. Bagels, Nana’s Soul Food, Salsanta’s Fresh Cantina, Hibachi Express & Grill and Coffey Creek Cafe. On the CMC campus are two cafeterias (one at Carolinas Medical Center, one at Carolinas Rehabilitation Hospital), a Panera restaurant (at Carolinas Medical Center), a Chick-fil-A restaurant (Medical Center Plaza) and a Starbucks (Morehead Medical Plaza). Microwaves and refrigerators are also available at the college for student use.

Safety

For the safety and security of all students and personnel, students are expected to wear their name badge above the waist and clearly visible at all times when on campus, report unsafe conditions immediately and wear appropriate personal protective equipment (PPE) as needed. Students arriving on campus without an ID badge are required to secure a temporary badge from the front desk. The new student onboarding process and orientation will include instruction on HIPAA, corporate compliance, blood-borne pathogens, fire safety, handling hazardous materials, reporting injuries or accidents and maintaining a safe environment. Annual safety continuing education is required of all students in clinical or laboratory science programs.

Throughout the year, tests of the emergency notification system, the fire alarm system and the emergency evacuation plan are conducted. All students are expected to participate. For tests of the emergency notification system, a text message will be sent to students who have opted into the text service and an email will be sent to the official college email address. Findings on all emergency drills will be used to improve processes.

Security

A security officer will be stationed in the lobby of the building from 7:30 am – 4:30 pm, Monday – Friday. Atrium Health’s Corporate Security is available to provide assistance with security issues and concerns at the college. Additionally, the Water Ridge Office Park has on-site security.

Student Right-to-Know/Clergy Act

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act) is a federal law which requires all colleges that participate in federal financial aid programs to keep and disclose information about crime on and near their respective campuses. The Carolinas College Safety and Security Report includes statistics for the previous three years concerning reported crime that occurred on campus, including certain off-campus buildings owned or controlled by Atrium Health and on public property within or immediately adjacent to campus. The report also includes institutional policies concerning campus safety, such as alcohol and drug use, crime prevention, crime reporting and sexual assault.

Emergency Response Plan

The college’s Emergency Response Plan includes policies, procedures and organizational structure for response to emergencies that are of a magnitude likely to cause a significant disruption to the functioning of all or portions of the college. A copy of the plan can be accessed through the Business Office. In the event of a long-term emergency (e.g. pandemic, etc.) operational protocols and processes may be altered to adjust for the specific event (e.g. remote work, online classes, simulated or virtual clinicals and labs, etc.) and policies may be altered or adapted to allow maximum flexibility for teammates and students and limit the impact of the event on student and/or academic progress.

Emergency Alert System

Carolinas College maintains an emergency alert text system for timely notification of events that may affect the operation of the college. Faculty, staff and students can opt in and out of this service by notifying the dean of student affairs and enrollment management. Notifications are sent by text, email
Inclement Weather

Inclement weather (hurricanes, snowstorms, ice storms, etc.) may necessitate the delay or closing of the college. In the event of inclement weather or short-term emergencies, the safety of students and teammates is the college’s first consideration. Any changes in the college’s operating hours due to inclement weather will be communicated to faculty, staff and students through: 1) the emergency text alert system (for those who have opted in), 2) email, 3) the learning management system, 4) updated front desk greeting at (704) 355-5051, and 5) activation of the Emergency Alert System at (704) 446-7854.

Fire Procedures

In the event of fire, smoke or burning smell, personnel and students should:

- Remove any persons from immediate danger. If a room fire occurs, close the door after persons are removed.
- Pull fire alarm. Fire alarm boxes are located at each exit.
- Advise those around to evacuate.
- Dial 911 and report the location of fire or smoke and your name.
- Evacuate the building through the nearest exit and gather in designated safe areas outside of the building.
- Do not reenter the building until given an “all clear” signal.

Transportation and Parking

Student parking is located on Beam Road. Students may park in the lot adjacent to the building after business hours and on weekends. Students are provided access to parking on the campus of Carolinas Medical Center in the MMP Deck. Students who do not park in the designated student parking areas without documented permission may be fined, ticketed, and towed. Ultimately, parking violations may be found to constitute a violation of the college’s community standards policy. Students are responsible for their own transportation to the college and to clinical sites.

Student Affairs and Services

The mission of the Department of Student Affairs is to facilitate and provide reliable student services in a caring environment throughout the education process from application through graduation, regardless of location or course delivery method. Student affairs staff are committed to providing excellent support leading to an exceptional enrollment experience, successful program completion, and personal and professional development. This is accomplished through the following services and benefits.

STUDENT ORGANIZATIONS AND ENGAGEMENT

The opinions and ideas of students are highly regarded by the faculty, staff and administration of the college. Student participation in the life of the college and in the decision-making process is encouraged through student organizations, college committees and other opportunities for involvement.

Student Leadership Council (SLC)

The dean of student affairs and enrollment management convenes a meeting each semester with the student leaders of the college including student organization officers. In addition to the leaders of the recognized student organizations, program leadership identify a representative(s) to serve on the SLC. This ensures fluid communication and transparency, provides students a voice in college decision-making and informs the dean of the current concerns, ideas and issues facing the students. The SLC also informs student programming and activities. The dean of student affairs and enrollment management is available to hear student concerns and/or respond to student inquiries.

American Association for Men in Nursing (AAMN)

The purpose of AAMN is to provide a framework for nurses, as a group, to meet, to discuss and influence factors that affect men in nursing. AAMN is comprised of more than 1,100 members across the U.S. and includes practicing RNs, nursing students, retired nurses, nursing instructors and others. Our goal is to introduce the opportunities available in the nursing profession to students and to offer support and guidance for those who are working towards becoming RNs and to those who have fully become RNs. The Greater Charlotte Chapter of AAMN is one of more than 50 chapters at universities, hospitals, and local regions nationwide. The chapter offers great opportunities to network with others who are pursuing the same goals and dreams.

Minority Student Association

The Minority Student Association represents the interests of underrepresented minority health sciences students. Its purpose is to support, encourage, and advocate for minority students in their interactions with all students and teammates, promote a more
inclusive and diverse environment on campus, and serve as a collective voice for minority students as they navigate an evolving healthcare environment.

Phi Theta Kappa
Phi Theta Kappa (PTK) is an international honor society founded to recognize and encourage scholarship among two-year college students. PTK provides opportunities for the development of leadership and service, for an intellectual climate for the exchange of ideas and ideals, for lively fellowship among scholars and for stimulation of interest in continuing academic excellence. Membership criterion is a cumulative GPA of 3.25 or better after completion of 12 semester hours of coursework in a two-year program leading to an associate degree. A cumulative GPA of 3.0 is required for continued membership. Induction into the Beta Zeta Sigma Chapter of PTK occurs in the fall, spring and summer semesters.

Student Ambassadors
Student ambassadors serve the college as new student orientation representatives and in other outreach and service capacities. This student organization is committed to finding opportunities to represent the college within Atrium Health and in the community at-large to grow awareness of the college. This organization also contributes to programming and activities to bolster student engagement.

Student Nurses Association
Nursing students are encouraged to participate in the Student Nurses Association (SNA). Through participation, students grow professionally as they collaborate with other local chapters and the state and national associations. The nursing program chair appoints a nursing faculty member to serve as the advisor. The faculty advisor guides the SNA activities within the framework of the purpose, goals, policies and procedures of the college. Membership fee is required.

College Committee Structure
Standing college committees provide a means for students to function in an effective, democratic manner in the decision-making process for planning, implementing, and evaluating activities and programs within the college. Students serve as voting members on (at minimum) the following committees: Academic and Curriculum; Academic, Progression and Graduation (APG); Safety, Teaching and Learning; and Nursing Curriculum.

STUDENT SERVICES

Health Screenings
All students admitted to programs requiring clinical or laboratory access to patients are required to receive clearance by Teammate Health, which will include an immunization review, drug screen and Tuberculin Skin Test (TST) as a part of the onboarding process. Please refer to the New Student Onboarding Page for more details. Once enrolled, students are required to be in compliance with Atrium Health’s annual vaccination and TST requirements.

Counseling
Confidential professional counseling is available to all enrolled students through Atrium Health’s Employee Assistance Program (EAP) (704-355-5021) and through the Spiritual Care Department (704-355-2218). Services or referrals are available for academic problems, stress management, family, spiritual or other matters. Confidential advising is available through the dean of student affairs and enrollment management and the student success coordinator.

Student Success
Carolinas College is committed to the success of each student. Student success is a shared responsibility between the college and the student. One of the ways in which Carolinas College demonstrates its commitment is through offering student success services. Services include providing academic resources including tutoring, study skills, test-taking, stress and time management resources. Additional services include job placement information on PT/PRN opportunities for students while enrolled and employment opportunities upon graduation by working collaboratively with Atrium Health’s New Grad Center and Human Resources.

Advisement
All students enrolled in credit programs or in General Studies courses are assigned a faculty advisor upon acceptance to the college. Students may request an appointment any time questions arise during the educational program or for advice on course planning and registration. A minimum of one meeting with one’s advisor per semester, either in-person or electronically, is expected and required in order for a student to register for the next semester. Clinical Laboratory Sciences students are not required to meet with their advisor prior to registration.

Individuals with Disabilities
Student success is of the highest priority at Carolinas College. Specific questions concerning the essential functions of a program should be referred to the student success coordinator. Students with a qualifying disability who need reasonable accommodations to meet a program’s essential functions should request accommodations through the office of the student success coordinator upon admission to the college. Students will be directed to complete a request form and to support the request with appropriate documentation. Based on the submitted documentation, a determination will be made regarding reasonable accommodations and communicated to the student. If the student disagrees with the determination, they can request a secondary review. The dean of student affairs and enrollment management, the provost and a representative from the academic program will then evaluate the request to determine the appropriate accommodations to provide, if any.

Student Email
Students are provided a college email address while they are enrolled in courses that is used for all official and emergency notifications. Students are expected to check this email on a regular basis or forward it to an account that they regularly use. Knowledge and compliance with the Acceptable Use of Information Technology policy and Access to Information Technology policy are expected.

Computer and Technology Requirements for Students
The college provides access to computers on campus as described in the facilities section of the catalog. However, students are also required to have access to devices for personal use outside of the devices on
campus. The devices for personal use must meet the minimum requirements listed below:

**Students are required to own a personal device.** Personal devices must meet the hardware and software requirements listed below (Tablets, such as iPads or Surfaces, and Chromebooks, or similar, netbooks, are not acceptable):

- Operating system (one of the following) with updates enabled:
  - Windows: Windows 10 is required (Windows 10 S and Windows 10 N are not compatible). Need to check version of Windows on your computer?
    - Log in to your personal computer and do the following:
      - Press the windows key + R
      - Type winver in the search box and hit enter or OK
  - Mac: OS Mojave or Catalina are required:
    - To see the current macOS, click here: macOS
    - For Catalina compatibility and install click here: Catalina
    - If the device is not compatible with Catalina try Mojave here: Mojave
  - Broadband Internet Connection (DSL, cable, satellite)
  - 2 GB of RAM
  - 32 GB free hard drive space
  - Software
    - Modern internet browser (Chrome, Safari, Edge)
    - Office 365 for Education (provided by college)
    - Adobe Acrobat Reader
    - Java
    - Modern antivirus program (for example: Windows Defender)
    - Modern media Player
    - Webcam, Microphone and course-specific software
    - 32 GB free hard drive space
    - Broadband Internet Connection (DSL, cable, satellite)
    - 2 GB of RAM

To ensure students have access to affordable pricing for personal devices, two different discounted vendor options are available, in addition to local retailers:

- **HP Direct:**
  - Visit hpdirect.com/employee/Atrium_Health
  - SIGN UP as New Customer and Complete initial First/Last/Email/Password to Create HP.com account. Validate not a robot, click SIGN UP button at bottom

- **ThinkEDU:**
  - Visit thinkedu.com
  - Select items you wish to purchase.
  - EPP landing page for Atrium Health loads. With Atrium and the customer name listed
  - You will be directed to the discount storefront and will view strike thru pricing noted for each qualifying product. Discounts are auto applied and no codes are required unless there is an additional promotion received from the weekly consumer HP.com emails which you must opt in to receive.

Students are then responsible for acquiring access to any required specialized software or hardware, either through the college computer lab or off-campus. Students are responsible for knowing how to operate their chosen computer system and the required software packages. Computer skill training is available through the academic support team upon request. The college is not responsible for maintaining students’ personal computers. Students should understand and comply with the Acceptable Use of Information Technology policy and Access to Information Technology policy.

**Intellectual Property**

Intellectual property is an important asset to the Carolinas College educational community and the college seeks to uphold the highest standards of clear institutional direction regarding ownership, compensation, copyrights and use of the revenue derived from such property. Additionally, the college wishes to ensure that best current practices are modeled in delineating the legal rights to products of the mind and the intended or unintended access to such property. For this reason, Carolinas College chooses to default to Atrium Health’s equivalent policy: Ownership and Commercialization of Intellectual Property (ADM 240.07) and this policy will apply to all Carolinas College staff, faculty and students. It addresses all categories of intellectual property and related issues such as ownership, governance and dissemination of intellectual property. The policy is available to staff and faculty through the Atrium Health Policy Manual and is accessible to students through the student affairs office.

**EPP landing page for Atrium Health loads, With Atrium and the customer name listed**

**2. ThinkEDU:**

- Visit thinkedu.com
- Select items you wish to purchase.
- Create account, entering Carolinas College of Health Sciences in the College field.
- Once your college status is verified (which should not require anything additional on your part), your order will be processed.

**Software**

- Modern internet browser (Chrome, Safari, Edge)
- Office 365 for Education (provided by college)
- Adobe Acrobat Reader
- Java
- Modern antivirus program (for example: Windows Defender)
- Modern media Player
- Webcam, Microphone and course-specific software
- 32 GB free hard drive space
- Broadband Internet Connection (DSL, cable, satellite)
- 2 GB of RAM

**Community Standards**

The policies and procedures of the college establish standards of professional conduct such that each member of the college community has the freedom to pursue academic and curricular activities in an educational context of healthy, responsible, ethical and respectful behavior.

**Disruptive Behavior**

Disruptive behavior includes, but is not limited to, inappropriate behavior, sleeping in class or clinical failure, failure to turn off cell phones or other electronic devices or violating computer restrictions. Course faculty have the right to remove a student from the classroom or a clinical experience for disruptive behavior and/or to refer the matter to the dean of student affairs and enrollment management for investigation and potential disciplinary action.

**Tobacco Use**

Carolinas College and Atrium Health are committed to promoting clean and healthy environments. Carolinas College and all Atrium Health-owned or leased property (including vehicles), parking lots, decks, stairwells and outside areas next to building entrances and exits have been designated as tobacco-free areas. Carolinas College abides by Atrium Health’s Tobacco-Free Workplace policy (HR-S-12) which defines tobacco products as any form of tobacco, including, but not limited to, cigarettes, electronic cigarettes, vapor sticks, cigars, pipe tobacco, chewing tobacco and snuff. Use of these products is prohibited while on the Carolinas College campus, in clinical training sites and all Atrium Health facilities as defined above. Violations of this policy will be adjudicated as stated in policy HR-S-12. For a student, any violation is considered academic misconduct. The student is subject to counseling up to, and including, removal from the program.
Drug & Alcohol Use

Carolinas College students and teammates are expected to comply with Atrium Health’s Drug and Alcohol Use policy (HR-4.08). Carolinas College and Atrium Health want team members to be secure that their working environment is safe. To provide this safety and high team member performance, alcohol or illegal drugs cannot be in a student’s body while training in the clinical setting or on the Carolinas College campus. Students taking prescription and non-prescription drugs that may affect their ability to perform assigned duties must report this to the faculty member. The use of illegal drugs or alcohol during scheduled school hours or the possession of illegal drugs or alcohol on campus at any time will result in disciplinary action including, but not limited to, counseling, EAP referral, or dismissal from the college.

Following the initial baseline drug screen required of all new clinical or laboratory science students, additional drug and alcohol tests may be conducted randomly or for cause to ensure compliance. Failure to comply with a request for drug or alcohol testing is treated as a positive test. A positive test will result in suspension of clinical access, which may negatively affect progress in the program. If a positive test is within the first 90 days of enrollment, the student will be dismissed. Students enrolled more than 90 days with positive tests will be referred to Teammate Health and/or the Employee Assistance Program (EAP) for case management to include assessment for treatment needs and any referrals. However, a student’s continued enrollment is subject to the Clinical Access and Eligibility policy. Students may be allowed to return to class and clinical based on cooperation and treatment assessment after consultation between Teammate Health, EAP and the dean of student affairs and enrollment management. A student who is allowed to return to class or clinical will be dismissed for a subsequent positive drug or alcohol test. Students dismissed due to drug or alcohol violations may not be readmitted earlier than one year from the semester in which dismissal occurred.

Charges, Convictions or Sanctions

Carolinas College students and teammates are expected to comply with Atrium Health’s Charges, Convictions or Sanctions policy (HR-5.19). Carolinas College and Atrium Health want to provide the best educational and clinical training experiences and environments. An essential element of this is creating an environment where faculty, staff and students feel safe. If a student receives a criminal charge, conviction, or a sanction, this potentially creates a safety and security issue in the educational and clinical training environment. For that reason, students are to report, in writing, any criminal charge, conviction or sanction to the dean of student affairs and enrollment management by the next calendar day. If a copy of the charge, conviction or sanction is not available that day, the student is to provide it within five (5) calendar days to the dean of student affairs and enrollment management. Examples of offenses to be reported may include, but are not limited to: violence, injury to another person, communicating threats, damage to property, sexual offenses, drug offenses, driving while intoxicated (DWI) or driving under the influence (DUI), theft, fraud, including writing fraudulent checks.

Sanctions can include temporary suspension from class, letter of warning, disciplinary counseling, action plan, loss of clinical access or dismissal. Sanctions up to and including development of an action plan may be imposed by the dean of student affairs and enrollment management. A student who is allowed to return to class or clinical will be dismissed for a subsequent positive drug or alcohol test. Students dismissed due to drug or alcohol violations may not be readmitted earlier than one year from the semester in which dismissal occurred.

Psychological Impairment

Students are expected and required to be in appropriate mental condition to perform assigned tasks or to participate in class, lab or clinical activities. College personnel rely upon the expertise of professionals with Teammate Health and the Employee Assistance Program regarding degree of impairment, treatment and an assessment of readiness to return to school.

Intimidation and Harassment

The college prohibits and will not tolerate acts of intimidation, sexual harassment or abuse. Such behaviors violate the privacy and dignity of individuals and are a violation of federal and state laws. Intimidation includes, but is not limited to, actions or speech that causes another person to believe his or her personal safety or personal property may be at risk or harm.

Harassment of any kind will not be tolerated. Harassment relating to race, sex, religion, ancestry, ethnicity, age, sexual orientation, gender identity, veteran status or any other protected status is inconsistent with the college’s commitment to create and maintain an educational environment that is safe and responsible and that supports and rewards achievement on the basis of ability and performance.

All students, faculty, and staff are required to complete Title IX training on an annual basis. Complaints of sexual harassment will be investigated by the college’s Title IX coordinator, Ms. Sandra Harvey. Ms. Harvey can be reached at Sandra.Harvey@CarolinasCollege.edu or at 704-355-5586.

Other complaints of intimidation and harassment will be investigated by the dean of student affairs and enrollment management, Anthony Brooks. To file a complaint, Mr. Brooks can be reached at Anthony.Brooks@CarolinasCollege.edu or (704) 355-5585.

Weapons

Atrium Health, under North Carolina law (NCGS Section 14-415.23(a)), has adopted an ordinance prohibiting the possession of firearms or other weapons on campus. This prohibition is posted on all buildings including 2110 Water Ridge Parkway, which houses Carolinas College of Health Sciences. The possession of firearms and other weapons on campus will result in immediate administrative dismissal from the college.

Dress Code

Students are considered part of the patient care team, so it is important to project a respectful, professional, competent image to Atrium Health teammates, patients and fellow students. To project a professional image, to standardize expectations and to be consistent with Atrium Health standards, students are expected to follow the specific standards of appearance outlined below.

College-issued identification badges will be worn at all times at chest level or above with the student’s picture clearly visible.

On the college’s campus, students are expected to dress modestly and in good taste, including but not limited to:

- No tank tops.
- No exposure of midriff.
- No low-cut shirts or blouses.
- Shorts should be no more than three inches above the knee.
- Undergarments should be worn but not visible.
- No profanity, slanderous or disrespectful images or language, or promotion of inflammatory causes.
- No pajamas or slippers.

The following general dress code must be adhered to while in the clinical environment for scheduled coursework or participating in activities in the Carolinas Simulation Center:

- The official college-approved uniforms must be worn. Uniforms must be clean and wrinkle-free.
- Pant length is the top of the shoe.
- Dress length is no shorter than the middle of the knee.
- Only white or teal jacket or required personal protective equipment (PPE) may be worn over the uniform.
- No exposure of cleavage or chest hair. Students may wear white or black undershirts (short- or long-sleeved) or tank tops with no visible logos under uniforms. Clinical Laboratory Sciences student undershirts must match shoes and socks.
• Undergarments are to be worn, but should not be visible, with no visible logos.
• Clean and polished shoes that are only leather or leather-style are required. Shoes are to have a solid top surface and closed toes.
  ○ Clinical Laboratory Sciences students: No clogs are permitted.
  ○ Nursing and Clinical Laboratory Sciences students: Must wear white or black shoes.
  ○ Radiologic Technology students: Must wear white shoes.
• Socks or hosiery covering the ankles are to be worn at all times.
  ○ Clinical Laboratory Sciences students: Socks must be white or black to match shoe color.
  ○ Radiologic Technology students: Socks must be white.
• Nails longer than ¼ inch past the free edge of the nail, acrylic or other artificial nail tips may not be worn by anyone providing direct patient care because they increase risks of transferred bacteria to patients. Clear or light-colored nail polish may be worn but may not be chipped.
• Makeup must be light with natural colors only.
• Hair is to be clean, dry, neat, and controlled. Extremes in hairstyle and hair-color are not acceptable.
• Hair (short or long) that falls toward the face when the head is bent must be pulled away from the face with a plain band, clip, or barrette (no hair bows). Other head ware is not to be worn unless for approved religious or medical reasons.
• Any facial hair is to be clean and well-groomed.
• Perfume, cologne, or strong scents must not be worn.
• Jewelry and other accessories are to be conservative and are not to interfere with the performance of job duties or cause a safety risk for the student, patient or others.
  ○ One ring or one wedding set may be worn on either hand.
  ○ Studs are the only permissible piercing jewelry. Up to two earrings may be worn per ear. No other visible body piercings are permitted.
  ○ No other jewelry may be worn except medic alert jewelry or a watch. Radiologic Technology students are required to wear a watch with seconds displayed.
• Tattoos are to be smaller than one inch in diameter. They must not be unpleasant or potentially unpleasant to our patients, visitors or other team members. Otherwise, tattoos are to be completely covered. Examples of potentially unpleasant tattoos include designs that are violent, threatening, sexual or that deface religious symbols.

For unscheduled but authorized, official student business in a clinical setting, such as researching an assignment or protocol, students may wear the college uniform as described above, or a college-approved white lab coat worn over business casual clothes.
• Business casual attire is modest, clean, and neat.
• No jeans, shorts, or sandals are permitted.

Other hospital-approved scrubs or uniforms are permissible in appropriate departments or clinical situations.

For visiting a patient care facility in an unofficial capacity, such as using the cafeteria or attending a meeting or a workshop, students should follow business casual guidelines. No jeans, shorts or sandals are permitted and clothing must be modest, neat and clean.

Students who make inappropriate clothing or accessory choices will be counseled by their faculty member, program chair or by the dean of student affairs and enrollment management and may be sent home with a recorded class or clinical absence to change into acceptable attire. Repeated violations will result in counseling or disciplinary measures up to and including dismissal from the program and the college.

Communication Devices

The college allows the responsible use and possession of cell phones, cameras, smart watches, and other personal communication devices. Users of these communication devices must be sensitive to the needs, sensibilities, and rights of other people. The following actions are prohibited:

1. Utilizing these devices for the purposes of photographing test questions, accessing the internet to see test answers or other forms of academic misconduct.
2. The unauthorized recording (audio or video) or photography (via any device) of anyone (students, faculty, staff, patients, families, etc.) without their consent is not permitted. Any device incorporating a camera must be turned off and out of sight in any area in which an individual has a reasonable expectation of privacy.
3. Any use of cell phones that is disruptive of functions of the college, specifically in classrooms and laboratories. Phones must be on vibrate mode or turned off and out of sight in classrooms, computer laboratories, science laboratories, the AHEC Library and other academic settings and in all clinical settings unless approved by the instructor. Communication devices may be used in clinical areas only in accordance with applicable clinical policy. No communication devices will be allowed during quizzes, tests or exams.
4. Any use of personal electronic devices in the clinical setting is prohibited, unless approved by the faculty member.

Acceptable Use of Technology

Carolinas College offers an array of information technology resources for student and teammate use in support of the college’s mission. Users are expected to exercise common sense in the use/handling of all technology and associated information. Users must understand and comply with the Acceptable Use of Information Technology policy and guidelines provided by the college and Atrium Health. Electronic communication should be professional and appropriate. User IDs and passwords are assigned as the primary means for authenticating access to technology resources. Users may not share their username(s) or password(s) with any other person and must be diligent in protecting them from exposure (e.g., changing the password every 90 days, log off devices when leaving a workstation).

All college policies and codes of conduct are applicable to the electronic environment as they apply in all other college settings. These resources include authenticated access to college electronic services, including: access to college-owned computers and electronic devices; local and internet network access; electronic devices; electronic mail (e-mail); phone service and voice mail; licensed software; electronic media content; library electronic resources; videoconferencing and other network-based services. The College has established standards and policies for the acceptable use of these resources and expects users to be familiar with and honor them.

The college recognizes participation in social media sites (Facebook, Twitter, LinkedIn, YouTube, etc.) is significant and can be used in positive ways to build community on and off campus. The college encourages responsible user participation in social networks. Students and teammates shall not use the college email address for creating social media accounts or posting information on such platforms regardless of privacy settings. Speaking on behalf of or representing the college without permission is not permitted. College teammates are strongly cautioned against extending or accepting “friend” or other “following” requests from students. Users should not publish, post or release information that is considered confidential or not public. Teammates are not to use or disclose student information in social media. It is also generally not acceptable to post pictures of students or teammates without their permission. The college reserves the right, but has no obligation, to monitor social media interactions. If the college deems content to be inappropriate, the user is responsible for removing that content within 24 hours of notice.
Gifts
Gifts from students given to a college teammate in their working role are allowed if:
• The gift cannot or cannot appear to influence a decision of the teammate; and
• The gift is low in value (under $25 as advertised); and
• The gift is not cash or a gift card.
Students may not accept gifts from patients.

CODE OF STUDENT CONDUCT
Students are expected to abide by college policies and federal, state and local laws. When behavior violates one of these tenets, students can expect the college to respond deliberately and appropriately. The Code of Student Conduct serves as the basis for student behavior and places responsibility for abiding by this code on the student. Consistent with the mission of the college, the disciplinary process seeks to educate students about responsible and appropriate behavior.

Students have the right to:
1. Be evaluated on established grading criteria identified in each syllabus, not on opinions or conduct in matters unrelated to academic standards, unless that conduct is in conflict with standards of professional conduct or violates college or clinical facility policy.
2. Freedom of expression, inquiry and assembly subject to reasonable and nondiscriminatory college rules and regulations.
3. Inquire about and propose improvements in policies, regulations and procedures affecting the welfare of students through the Student Leadership Council, individually with college administrators, and in writing through the process outlined in the Complaints and Appeals policy.
4. Privately confer with college personnel concerning a personal grievance. If the outcome is not satisfactory, the student may proceed to the next person in the organizational chain, to the dean of student affairs and enrollment management, and finally to the college president, to seek resolution.
5. Review their official school record and to request nondisclosure of certain information per college policy.

Students accept the responsibility for:
1. Reading the College Catalog and Student Handbook and knowing, understanding and acting in accordance with college policies and all applicable regulations and laws.
2. Promoting the highest standards of ethical conduct. Students are expected to demonstrate honesty and integrity in academic, clinical and administrative matters.
3. Completing their academic curriculum properly. Program chairs, advisors and student affairs personnel will counsel students, but it is the final responsibility of students to know and meet program completion requirements.
4. Adhering to Atrium Health’s Workplace Violence Prevention policy (HR 5.18). As such, students are responsible for:
   ◦ Respecting the rights of others and treating all with respect and dignity. Disruptive behavior, intimidation or harassment will not be tolerated. Disruptive behavior includes, but is not limited to, inappropriate behavior, sleeping in class or clinical, failure to turn off cell phones or other electronic devices or violating computer restrictions. Intimidation includes, but is not limited to, action or speech that poses a significant danger or threat of harm to person(s) or to property. Harassment relating to race, sex, religion, ancestry, ethnicity, age, sexual orientation, veteran status or disabling condition is inconsistent with the college’s commitment to create and maintain a safe educational environment.
   ◦ Maintaining healthy and professional physical and emotional behaviors that do not compromise the learning and/or clinical environment, including compliance with appropriate treatment or counseling within a reasonable period of time.
   ◦ Refraining from possessing firearms or other weapons. Possession of firearms or weapons is prohibited on campus. The use or possession of firearms while on campus or in a clinical facility will result in immediate dismissal.
5. Maintaining the ability to perform the essential functions of the program and to participate in class, lab and clinical activities.
6. Reporting, in writing to the dean of student affairs and enrollment management, any charges, convictions, pleas of no contest or prayer for judgment of a criminal offense. Charges of a criminal offense must be reported, in writing, by the next internship, field, or clinical study day after the charges are filed. If a copy of the charge/conviction or sanction is not available that day, the student is to provide it within five (5) calendar days to the dean of student affairs and enrollment management. Students are subject to the detail of the Atrium Health policy (HR 5.19) Charges Convictions or Sanctions, as an agreement of the corporate services contract.
7. Refraining from the use of alcohol, illegal drugs and other substances which may adversely affect performance while on campus. The use or possession of alcohol or illegal drugs while on campus or in a clinical facility will result in immediate dismissal. Use of tobacco products is prohibited on campus. Students are subject to the detail of the Atrium Health policy Tobacco-Free Workplace policy (HR 5.12) as an agreement of the corporate services contract.

8. Refraining from the use of all tobacco products while on campus. Students are subject to the detail of the Atrium Health policy Tobacco-Free Workplace policy (HR 5.12) as an agreement of the corporate services contract.

9. Respecting and guarding the confidentiality of all patients/patient information in compliance with the Health Insurance Portability and Accountability Act (HIPAA) privacy regulations.

10. Complying with all standards and guidelines outlined in the Carolinas College and Atrium Health Acceptable Use of Technology policies. Maintaining communication with the college and keeping on file with the registrar's office a current address and phone number.

Allegations and Sanctions

Perceived violations of the Code of Student Conduct can be reported by any member of the college community to the dean of student affairs and enrollment management, who is responsible for investigating the allegations and determining a course of action. The investigation may include interviewing witnesses and other involved parties and reviewing other evidence submitted in support of the allegation. In all cases, the accused student will be informed of the charges and will have the opportunity to respond or explain. The investigation and course of action may lead to the following:

- The allegation has no merit and is subsequently dropped.
- The allegation has merit and is administratively handled by the dean of student affairs and enrollment management.
- The allegation has merit and is referred to the Academic, Progression and Graduation (APG) Committee for a formal hearing.

Sanctions may be imposed individually or in combination with other sanctions and may begin at any stage of the continuum depending on the offense. Sanctions up to and including suspension may be imposed by the dean of student affairs and enrollment management or provost in consultation with the program chair. Dismissal will be made only by Academic, Progression and Graduation Committee (APG) action or when policy mandates (e.g. drug and alcohol violation, firearms violation). The following sanctions are listed in order of severity and represent a standard, but not all-inclusive, response to allegations of merit:

- **Temporary dismissal from class:** This sanction can be imposed by course faculty on any student who exhibits disruptive behavior. The faculty member may report this behavior to the dean of student affairs and enrollment management for further action.
- **Letter of warning:** This sanction provides official notification of a violation and informs students that continued violations may result in further sanctions.
- **Disciplinary counseling:** This sanction assures the opportunity for constructive counseling with qualified professionals suggested by the dean of student affairs and enrollment management. This sanction may include an alcohol or drug assessment based on the alcohol/drug policy.
- **Action plan:** This sanction defines corrective measures and a time frame for meeting the measures.
- **Suspension:** This sanction temporarily removes the student's access to the campus and/or clinical areas pending the outcome of an APG hearing. APG can maintain a suspension for a specified period of time as a sanction.
- **Dismissal:** This sanction separates the student from the college permanently or for a specified time frame. Students may reapply for admission, as eligible.

**ACADEMIC INTEGRITY**

Academic integrity is a key value of a credible academic community based on honesty and responsibility. The college's reputation and that of its teammates, students and graduates depends on the institutional commitment to academic integrity. All members of the college's community are responsible for creating and maintaining a positive learning and working environment that supports academic integrity. Teammates of the college and all enrolled students are expected to demonstrate academic integrity. Thus, all work created for the college by members of its community must be completed by the individual to whom the work was assigned without unauthorized assistance of any kind.

Faculty members are expected to:

- Understand and comply with this policy.
- Comply with copyright law in the use of others’ words, images and other creative works.
- Clearly communicate the importance of and standards for academic integrity to students, along with course expectations and potential consequences for violations.
- Set reasonable standards for academic integrity in their classes that are clearly defined within the Academic Integrity Statement in course syllabi.
- Clearly communicate information about the use of a plagiarism prevention service in evaluation of student assignments in the Academic Integrity Statement in course syllabi.
Staff are expected to:

• Understand and comply with this policy in execution of all college work-related projects and assignments.
• Comply with copyright law in the use of others’ words, images and other creative works in all college work-related projects and assignments.
• Check written works that are to be published by the college with the college’s plagiarism detection and prevention service to ensure all published work is original.
• Clearly communicate information about academic integrity to others as appropriate.
• Provide clear instructions for work projects and assignments to students and other college teammates.
• Monitor student and other teammate compliance with the academic integrity policy.
• Report violations of the academic integrity policy to the appropriate supervisor.
• Treat students with respect throughout any investigations, hearing or appeal process.

HONOR CODE

It is expected that all students promote amongst themselves the highest standards of ethical conduct. Each student is responsible for maintaining, upholding and promoting respect, honesty, ethical behavior, fairness and responsibility, both at the college and in the clinical setting. The Honor Code serves as the basis for student behavior and places responsibility for abiding by the code on the student. Violation of the academic integrity guidelines outlined in the Honor Code will subject a student to disciplinary action, up to and including administrative dismissal without eligibility to be readmitted. Academic integrity violations include, but are not limited to:

1. Cheating – Offering, providing, requesting or accepting unauthorized support or assistance in completion of any task, project, academic assignment or test. The use or attempted use of any unauthorized information, material or assistance in completing any assigned task, project, assignment or test. Having another person perform one’s assignments without instructor permission. Collaborating with others on assignments if contrary to stated rules.
2. Plagiarism – Representing the ideas, language or created work of another person or persons as one’s own or as the college’s own. (See Academic Integrity policy, Appendix C for specific definition and examples). This includes violation of copyright law.
3. Self-Plagiarism/Multiple Submission – Copying portions of any original assignment for credit and submitting them as original work in more than one course without prior approval of the course instructor and/or duplicating submission of a prior original work without proper citation and reference of that prior work.
4. Falsification/Fabrication – Falsifying information or fabricating information, data, citation or reference or in completion of any project or academic assignment. Falsification or fraudulent alteration of academic or college records. Falsifying patient records or communicating false information about clinical care of clinical experiences.
5. Interference – Intentional interference with or alteration or destruction of another person’s project, assignment or examination.
6. Complicity – Knowingly collaborating in or facilitating any of the above actions or assisting in the creation of a paper, project or other creative work that another person then presents as his or her own project, assignment or test.

Allegations and Sanctions

The alleged level of honor code violation will be determined by the program chair and the faculty/staff member after meeting with the student and presenting the charges and upon consultation with the provost and dean of student affairs and enrollment management.

1. Level I Violations — These are accidental or inadvertent violations of academic integrity that may be caused by carelessness, lack of knowledge, lack of training or other human error. Examples of this level of violation include but are not limited to failure to provide appropriate citation without dishonest intent, unauthorized collaboration with another student on an assignment, inappropriate or incorrect paraphrasing or misunderstanding of the rules of the academic assignment.
2. Level II Violations — These are intentional, more serious violations of academic integrity that often involve premeditation or planning and clearly dishonest intent on the part of the student that may be documented in witnessed verbal or written communication. Examples of this level of violation include but are not limited to substantial plagiarism, copying or using unauthorized materials or devices, unauthorized collaboration on or having a substitute take an exam, making up or falsifying evidence or data, actively facilitating dishonesty by another student, or a repeat of Level I or II violations.

Level I violations may be properly handled and remedied by the program chair and the faculty member. Level I sanctions include, but are not limited to, required participation in an educational experience on ethics or academic integrity, a make-up assignment to replace the original assignment, a reduced grade on the assignment, a failing grade on the assignment or a combination of sanctions.
Additional examples of unsafe practices may include, but are not limited to:

- Preparation for client care and/or poor decision-making skills that can lead to life-threatening safety violations.
- Acting appropriately on information that a majority of students at the same level would recognize as important to their program of study for unsafe clinical practices. Unsafe clinical practice is defined as a failure to assess or act appropriately on information that a majority of students at the same level would recognize as important to their client's safety and well-being.
- Doing so in a manner that would recognize as important to their client's safety and well-being.
- Doing so in a manner that would recognize as important to their client's safety and well-being.

Students enrolled in clinical programs receive HIPAA education upon admission, annually via continuing education modules (ACE Modules), in the classroom and through routine education provided in the monthly college newsletter.

Clinical Safety

The faculty in clinical programs provide learning opportunities so that students can develop and demonstrate competence in the skills necessary to practice in their profession. The student is expected to contribute to the safety and well-being of the patient/client and practice in the clinical setting in a safe and responsible way towards him/herself, clinical professionals and the environment. Students may be disciplined and/or dismissed from a program of study for unsafe clinical practices. Unsafe clinical practice is defined as a failure to assess or act appropriately on information that a majority of students at the same level would recognize as important to their client's safety and well-being. In addition, unsafe clinical practice may be the result of poor judgment, inadequate preparation for client care and/or poor decision-making skills that can lead to life-threatening safety violations.

Additional examples of unsafe practices may include, but are not limited to:

- Exhibiting behavioral problems that result in unsafe clinical practices.
- Failing to maintain the confidentiality of patient information.
- Failing to respect the privacy of patients.
- Failing to follow established policies and procedures for patient care.
- Failing to follow the Code of Conduct.
- Failing to maintain the confidentiality of patient information.

When a safety infraction occurs:

1. The instructor will discuss the issue/event with the student and determine whether the student will remain in the clinical setting.
2. The instructor will notify the clinical coordinator and/or program chair of the incident.
3. For minor infractions, the instructor (and clinical coordinator or program chair, if necessary) will meet with the student to provide counseling and/or develop an action plan with the student.
4. More severe infractions may result in a recommendation for dismissal. Recommendations for dismissal are submitted to the provost and dean of student affairs and enrollment management and are referred to the APG committee for consideration following the Dismissal policy.

Student Employment

During school hours, students in clinical experiences are under the supervision of faculty or preceptors and are not considered employees of the facility. Students may be employed in a clinical facility, but this employment is outside school hours, is noncompulsory and will not count toward credit for graduation. The college assumes no responsibility for work performed by students when they are not in their student role. Students will not be substituted for regular staff in the clinical environment. At the discretion of the clinical preceptor, students enrolled in Clinical Laboratory Sciences who demonstrate proficiency may be permitted to perform procedures under qualified supervision.

HIPAA

Students who are enrolled in programs with a clinical component are required to comply with the Health Insurance Portability and Accountability Act (HIPAA) privacy regulations and related Atrium Health policies and procedures (collectively, the “Privacy Standards”). Failure to comply with the HIPAA privacy standards will result in disciplinary action. The disciplinary action is based on the severity and context of the violation and is outlined in the college’s policy and procedure manual. Students enrolled in clinical programs receive HIPAA education upon admission, annually via continuing education modules (ACE Modules), in the classroom and through routine education provided in the monthly college newsletter.

STANDARDS OF CLINICAL PRACTICE

STUDENT COMPLAINTS AND APPEALS

A student will not be subjected to irresponsible treatment, procedural irregularity, arbitrary decisions, discrimination or differential treatment. Students are encouraged to voice their concerns about all issues regarding the programs, classes, environment and services at Carolinas College. Complaints may be submitted in either verbal or written formats, while appeals must be in writing. Complaints may also be submitted to the appropriate manager or the NC Attorney General’s office. The college will investigate claims or complaints provided by those bodies. Such letters of concern may originate with a complaint from a student, a staff member, a former student, a member of the public or any other source.

Complaints

1. Complaints may be verbal or written and generally address an issue of relatively minor significance or one from which few, if any, negative consequences have resulted or are likely to result. Verbal complaints are considered less formal than written and may be addressed to any member of the staff or faculty, including all administrative personnel. It is expected that staff and faculty alike will give appropriate attention to such complaints and, when necessary, refer the complaint to an appropriate manager. Due to the less formal nature of complaints, students may or may not receive notification of action taken, if any. Students are encouraged to sign written complaints to facilitate additional fact-finding and follow up. Written complaints, whether signed or unsigned, will be referred to the appropriate manager for investigation and, if necessary, for correction. Written complaints, along with an explanation of resolution, if any, are filed in the president’s administrative assistant’s office for up to seven years.
2. In North Carolina, the attorney general’s office is the appropriate office with which to file complaints that rise to the state level. To file a complaint with the Consumer Protection Division of the North Carolina Department of Justice, visit the State Attorney General’s web page at ncdoj.gov/complaint. North Carolina residents may call (877) 566-7226. Those who live outside North Carolina should call (919) 716-6000. Mail a complaint to:
Consumer Protection
Attorney General’s Office
Mail Service Center 9001
Raleigh, NC 27699-9001

3. For online students, Carolinas College is a member of the State Authorization Reciprocity Agreement – North Carolina (SARA-NC), which is the state portal agency for the North Carolina State Education Assistance Authority. If unable to resolve a complaint at the college level, out-of-state online students have the right to contact the state portal agency, SARA-NC, to submit a complaint.

The contact information for SARA-NC is:
SARA North Carolina
North Carolina State Education Assistance Authority
PO Box 14103
Research Triangle Park, North Carolina 27709
Telephone: 855-SARA-1-NC (727-2162)
Telephone: 919-549-8614, ext. 4667
Email: information@saranc.org
Website: saranc.org

4. Complaints of non-compliance with accreditation criteria may be directed to the college using the complaint or grievance process or directly to an appropriate accrediting agency. The matter, if then brought to the attention of the college, will be investigated as follows:

a. Programmatic Accreditation:
   • Receipt of the complaint will be date stamped.
   • The complaint will be forwarded to the provost with a copy to the president and the appropriate program director or dean.
   • The provost will convene a meeting with the dean or appropriate program director.
   • Relevant documentation, if any, will be gathered and examined. Faculty and staff may be included in the process.
   • The provost and program chair will develop a response to the complaint, which will then be discussed with the president.
   • Upon final draft, the response to the complaint will be submitted to the appropriate accrediting body.
   • The provost will maintain an open file on the complaint until a final letter of resolution is received. Periodic updates will be provided to the president, as requested.

b. Institutional Accreditation:
   • Receipt of the complaint will be date stamped.
   • The president, provost and SACS liaison (if different from the provost) will review the complaint and develop a plan and timeline for responding. Depending upon the nature of the complaint, a variety of personnel may be involved in examining the complaint and developing the response.
   • The president assures that the examination and preparation of the response proceeds in a timely manner.
   • The response to the complaint will be submitted to the appropriate accrediting body.
   • The president will maintain an open file on the complaint until a final letter of resolution is received.

c. Responses will be directed to the appropriate accrediting body within 60 calendar days of receipt of the complaint or earlier if requested by the accrediting body.

Appeals
1. Upon receipt of notification of dismissal or upon receipt of final grade for a course, or if a student feels his/her student rights (see catalog) have been violated, the student who wishes to appeal must send written notification to the president within seven working days. The student’s written notification will set forth the specific issues the student seeks to appeal.

2. The services of an uninvolved member of the student affairs department will be available to review the student appeal process with the student. The president will review the request for appeal and determine if the circumstances fall within the areas subject to appeal.

3. The president will inform the student in writing generally within seven working days whether the request for appeal is approved. If approved, the specific appealable issue(s) will be identified for the student. If more time is needed, the president will notify the student.

4. The appealable issues will also be shared with the leader of the department involved in the appealed action or decision.

5. All approved appeals will be heard by a review committee as described in the Complaints and Appeals policy. In case of dismissal, the committee has the authority to uphold or overturn the dismissal. The decision will be rendered by a majority of the committee and will be final. In case of a complaint regarding the violation of a student’s rights, the committee has the authority to determine whether or not a violation of rights has occurred and to make a recommendation regarding action to the president.

Title IX Compliance
Carolinas College does not tolerate discrimination or harassment and will endeavor to protect students and teammates from inappropriate actions of others inside or outside the college community. Allegations of discrimination or harassment will be taken seriously and will be acted upon following college policy. The college does not discriminate or permit discrimination by any member of its community against an individual.

The college complies with Title IX of the Education Amendments of 1972, and its implementing regulations, which prohibit discrimination based on sex (including sexual harassment and sexual violence) in the college’s educational programs and activities. Title IX also prohibits retaliation for asserting claims of sex discrimination. Concerns or inquiries regarding the application of Title IX regulations may be directed to Sandra Harvey, dean of administrative and financial services, Title IX coordinator at 704-355-5586. Also see “Community Standards” in this publication for more information regarding the college’s intolerance for discrimination and harassment. Completion of the annual Title IX training is a requirement for all faculty, staff and students of Carolinas College.
Academic Information and Records

The college offers programs that lead to the Bachelor of Science degree, Associate of Science degree, associate of Applied Science degree or a certificate.

A bachelor’s degree is awarded for a program of study with a minimum of 120 credit hours with no fewer than 30 semester hours being completed at Carolinas College. An associate degree is awarded for a program of study offered with a minimum of 60 semester hours of credit with no fewer than 15 semester hours in General Studies. A certificate is awarded for credit or non-credit courses designed to provide skills necessary for specific employment. The courses may range in completion time from hours up to an academic year. Credit certificate programs are offered with a minimum of 12 credit hours. Typically, General Studies courses are not a component of a certificate program.

Credit Hours

The unit of credit measurement is the semester hour, calculated using 50 minutes of contact time. One semester credit hour is equivalent to one of the following online and face-to-face instructional experiences: 1) one hour of didactic instruction per week; 2) three hours of clinical or laboratory instruction per week; or 3) six hours of practicum instruction per week. Instruction may occur synchronously or asynchronously on campus or online in a virtual or simulated environment. All calculations are based on a standard 14-week semester plus an examination period. Credit calculations for courses offered on a non-standard term format will include an equivalent total number of instruction per week. Instruction may occur synchronously or asynchronously on campus or online in a virtual or simulated environment. All calculations are based on a standard 14-week semester plus an examination period.

Enrollment Status

In determining enrollment status, Carolinas College includes all credit courses offered. Credits earned by advanced standing credit and courses enrolled as “audit” are excluded from the calculation. Enrolled students are designated during each term as enrolled full-time, part-time or less than part-time. Students enrolled in ≥12 credit hours are considered full-time. Part-time students are enrolled in a minimum of 6 credit hours. Students enrolled in fewer than 6 credit hours are considered less than part-time. With the exception of the Federal Pell Grant, all other sources of Federal grants and loans require a minimum of part-time enrollment.

Institutional Student Learning Outcomes

At Carolinas College, students complete instructional activities in various learning environments (e.g., classroom, online, laboratory, clinical) to develop skills to prepare them for entry into healthcare and other professions. The work students complete also helps develop important intellectual skills and essential personal and professional behaviors. These important areas of focus are referred to as Institutional Student Learning Outcomes. In addition to understanding and applying a core body of knowledge in their chosen field of study, a Carolinas College of Health Sciences graduate will be able to:

- Communicate: Use oral and written communication effectively.
- Consider: Integrate theory and evidence to make sound decisions, solve problems and evaluate results.
- Collaborate: Work as an effective team member to achieve objectives.
- Cultivate: Engage in professional behaviors to promote self-directed growth.
- Connect: Build and maintain relationships with others from various professions, perspectives and practices.

Quality Enhancement Plan

Carolinas College has developed a Quality Enhancement Plan (QEP) focused on enhancing collaboration and connection among students pursuing different professions, or interprofessional teamwork, to better prepare graduates for the evolving healthcare environment. Interprofessional education (IPE) has been shown to increase interprofessional collaboration and teamwork between healthcare groups with the result of improved safety and higher quality care for patients. Various IPE activities will be integrated throughout the curriculum of academic programs to ensure that graduates are able to:

- Identify the values and ethics of healthcare professionals and the impact of these on health outcomes.
- Recognize one’s own role and responsibilities and those of other professions in providing effective healthcare.
- Communicate effectively with other health professionals in classroom and clinical settings.
- Collaborate in interprofessional healthcare teams in classroom and clinical settings.

Types of Courses

The college offers three types of courses:

- **Applied Courses** are offered in most programs, are specific to the discipline and are intended to prepare graduates to practice entry-level healthcare.
- **General Education Courses** are a substantial component of each undergraduate degree program. Degree programs include at least one course from each of the following areas: humanities/life arts, social/behavioral sciences and natural sciences/mathematics. The General Studies core ensures a breadth of knowledge to promote intellectual inquiry and includes courses that expose students to a broad understanding of society and self. That understanding prepares students to develop into responsible professionals in the health sciences.
- **Special Studies Courses**, which can include emerging issues or specialized content, provide a basic exposure to skills and concepts useful to the training of healthcare professionals. Special topics courses may be interdisciplinary in nature.

The table on the following page identifies general education courses. Not every course is offered every semester, so students should refer to the current registration bulletin for course availability. General education core courses are identified in italics.
## Distance Education Courses

Carolina's College defines distance education as instructional activity that occurs with a separation by time or space between the student and the instructor. Distance education can include online instruction, simulated instruction, virtual clinical or laboratory instruction, or any other e-learning activities. Courses with distance education components provide the same high-quality instruction for students as traditional on-campus courses. The registration process, fees and academic credit are the same for distance education courses as for traditional on-campus classes. Students should be comfortable navigating the internet and be prepared to attend mandatory on-campus meetings for course requirements as needed. Students complete coursework using technology such as email, multimedia, chat rooms and discussion forums, and can access course information (syllabi, handouts, grades) through the information portal.

### Type of Course

#### Traditional
- 0% Delivered Online
- Course with no online technology used.

#### Web-enhanced
- 1% - 25%
- A traditional course that meets in the classroom for most of the regularly scheduled class time but uses web-based technology for purposes of supplementing the course by publishing course materials, delivering lectures, facilitating discussions, extending office hours, posting course grades, etc.

#### Hybrid
- 26% - 50%
- A course that blends instructional methodologies so that a portion of regularly scheduled class time is replaced with online activities.

#### Online
- 51% - 100%
- A course in which most or all of the content is delivered online. May have only a few or no required face-to-face meetings.

### Course Scheduling

The director of student records and information management generates the course schedule and registration materials approximately 90 days prior to the first day of classes each semester. Section assignments are generally on a first-come, first-served basis with priority provided to students in a clinical program. Students requesting sections that are full should register for an open section and place their name on the wait list for a possible opening. Student schedules can be viewed online and printed.

Students who want to drop a class that does not affect the master curriculum plan may do so online during the drop/add period. If the desired drop affects the master curriculum plan, requests must be approved by the student’s advisor, the instructor and the program chair. Classes may be added after the drop/add period only with the approval of the instructor and the dean of student affairs and enrollment management. Students withdrawing from a class after the drop/add period will receive a grade as described below in the grading section.

Students will be counseled by their advisor if the change affects progress toward completion of the student’s master curriculum plan. Section changes are considered drop/add transactions and are handled as such. No section changes of healthcare classes will be made without the approval of the program chair. General Studies course section changes will be made upon approval of the involved faculty members. After the drop/add period, section changes are made by the director of student records and information management.

Transfer credit may be awarded for classes of equivalent depth, breadth and content if relevant to the program of enrollment. Advanced standing credit may be awarded through testing according to college policy which is available through faculty advisors and student affairs personnel.
Registration
The college will provide an orderly process for class selection and registration. The process will ensure the timely development of a schedule that meets student and program needs as well as a process that provides equity in course availability and guidance in course selection. Before the start of registration, all students are required to meet with their academic advisor. Upon meeting, the advisor will release the registration hold allowing the student to register. Students may change their schedule by dropping or adding courses through the first week of the term. If there is a registration hold on the student’s account, he/she will be electronically blocked from registration for the next semester until the hold is cleared. Registration holds may be applied for financial or academic reasons.

Course Syllabi
The course syllabus outlines the expectations and objectives that must be met in course work, lab, and/or clinical experiences in order to ensure successful completion of the course. Faculty reserves the right to alter the course requirements, mode of delivery, schedule, and/or assignments based on new materials, class discussions, or other legitimate pedagogical objectives or emergency situations. Students will be given notice of relevant changes in class, via e-mail and/or the college learning management system. Syllabi for all courses are available on the information portal.

Plagiarism Detection and Prevention
Carolinas College uses an electronic, web-based plagiarism detection and prevention tool. The tool helps users detect and prevent plagiarism from sites and full-text published internet sources. This tool may be used by students, voluntarily or as required with the submission of an assignment, or by faculty to verify the originality of student work.

Attendance
Traditional classes offered by the college are designed for class attendance and it is assumed that students will be present. Students who miss class, regardless of reason, will be responsible for the work missed. Specific course attendance requirements are identified in each course syllabus. Students who are in violation of the specified course attendance policy will be contacted by the faculty member, referred to the student success coordinator for assistance, and/or provided with instructions for withdrawing from the course if necessary. A student may lose access to a course when the number of allowed absences (if stipulated) has been exceeded, or when, in the opinion of the faculty member, the student has missed so much work as to preclude the possibility of successful completion of the class. Unless otherwise specified in the course syllabus, students that lose course access due to attendance will be able to withdraw from the course up until the withdrawal deadline. In online and hybrid classes, attendance is defined as regular weekly completion of assignments. Students must confirm enrollment in online courses by logging in to the course during the first week of classes and completing the first assignment by the specified due date; course syllabi provide specific expectations.

Testing Guidelines
All examinations and tests are property of Carolinas College of Health Sciences and are not to be distributed to individuals outside the program. Guidelines are established by each program in order to ensure academic integrity and enhance the testing environment. Students are expected to comply with faculty requests, established testing guidelines and technical requirements promptly. Students with documented special accommodations (e.g. additional testing time, small testing room, etc.) are responsible for making the lead instructor of each course aware of individual needs during the first week of each course. Additional specific requirements may be included in each course syllabus.

Clinical Rotations
Completion of clinical rotations is a requirement for clinical programs. Access to clinical sites is governed, in part, by clinical contracts. Access to Atrium Health clinical facilities requires an acceptable criminal background check, negative drug and alcohol screen, and compliance with applicable clinical policies of Carolinas College and Atrium Health. To ensure students will be able to complete programmatic requirements, clinical site availability is evaluated to determine the capacity for program enrollment. In the event a lack of clinical site availability may impact students’ ability to progress, students will be notified immediately. To guarantee clinical placement, the program chair and faculty can implement various changes, including, but not limited to:

- Identifying alternate clinical sites
- Adjusting clinical schedules
- Adjusting course schedules
- Adjusting curriculum plans
- Providing online, virtual or simulated clinical experiences

Grading
The college uses a letter system of grading. Ranges for letter grades are determined by each program and are indicated on each course syllabus or in the program portion of this catalog/handbook. The lowest passing grade in any course in the curriculum is a letter grade of “C.” Cumulative scores will be rounded off to the nearest whole number with the raw score of 0.50 or higher being rounded up to the next whole number.
An “I” (Incomplete) is a temporary grade and must be removed within the time period identified, not to exceed three months. Failure to do so results in a grade of “F.” Grades of “I” must be removed prior to enrollment in courses that identify the incomplete course as a prerequisite.

A “P” (Pass) may be used in clinical/practicum courses and for non-graded, non-credit certificate courses.

A “W” (Withdrawal) indicates the student withdrew prior to completion of 75% of the course based on the last date of attendance.

An “AW” (Administrative Withdrawal) indicates the student withdrew after drop/add period but prior to the start of the course.

The student success coordinator will receive an alert from the director of student records and information management of at-risk (“D” or “F”) students at midterm.

Final course grades will be available online for all students at the end of each term. Grades will not be provided over the telephone. Only an error in grade calculation is justification for change of a recorded grade. Special make-up work or an examination to change a grade already recorded is not permitted. Approved changes are communicated by the program chair to the director of student records and information management. A student who believes there is a grade discrepancy should see the faculty member or program chair immediately.

Grade point averages (GPA and CGPA) are calculated electronically by multiplying the credit hours per course by the quality points earned and dividing by the total credit hours attempted.

</tbody>
</table>

*Not used in computation of grade point average

For repeats, the last grade replaces the previous grade in computing the GPA, however, all entries remain a part of the student’s permanent record. For students receiving conditional admission through the pre-nursing or pre-radiologic technology pathways, only the first attempt at each course will be used to calculate the required GPA.

Auditing

A student may request to audit a course, or an audit may be prescribed. Per the Audit policy, a student must petition to audit a course at the point of registration. Once the class starts, the course designation of “for credit” or “audit” cannot be changed. Audits are available only if space is available. Normal prerequisites apply. Tuition will be the same as those taking the course for credit and all pertinent fees and policies will apply. If auditing only a portion of a class, tuition is assessed based on a ratio determined by the dean of administrative and financial services. Auditing fees are not covered under the Atrium Health Educational Loan Forgiveness program or other financial aid programs.

Expectations of auditors are determined by the course faculty. Typically, the auditor is expected to attend class regularly and may or may not be expected to complete assignments. If the expectations are not achieved, the course will not be considered audited. No credit is awarded for an audited class.

Student Action Plans

Student action plans are intended to increase the likelihood that students will succeed in meeting course and/or program learning outcomes and comply with established academic and conduct standards by providing clear expectations, suggestions and the opportunity for improvement. A student action plan can be initiated for any of the following:

Academic action plans:
1. The student is not progressing toward achievement of one or more learning objectives.
2. The student is likely to benefit from enhanced or remedial learning activities to meet one or more learning objectives.
3. The student has failed to meet one or more clinical learning objectives.

Administrative action plans: The student demonstrates behaviors (or lack thereof) that violate the student code of conduct or honor code.

Student action plans can be initiated by faculty or college administrators at any time during a student’s enrollment. Action plans include a description of the area of deficiency and/or policy violation, specific goal(s) for improvement, a timetable for corrective action to take place and a discussion of potential consequences for failing to meet the criteria of the plan (e.g., failure of a course, academic probation, recommendation for dismissal from the program).

Continuous Enrollment

Continuous enrollment is defined as enrollment in the Fall, Spring, and Summer terms. Continuous enrollment is required in some academic programs, unless a leave of absence (LOA) has been approved. Students should consult with their program to determine if continuous enrollment is required.

In addition, students who do not enroll in and attend at least one course for a period of one year will be withdrawn from the college, must apply for re-admission, and are subject to any new policies, procedures, and degree requirements in the catalog at the time of re-admission.

Withdrawal

A number of factors may lead to the decision to withdraw from a program or a course, including difficulty making satisfactory academic progress in the course and/or for excessive absenteeism. Students should consult with their advisor or program chair prior to withdrawing to ensure full awareness of the consequences. A refund calculation and a withdrawal form will be completed by, or for, all exiting students.

Withdrawal from a course: Students may add and drop classes at their discretion during the first week of classes. After the first week of class, students must withdraw from a course. Students withdrawing from a course after the first week of class or those withdrawing from their last class must obtain their advisor’s signature before submitting the form to the director of student records and information management. A grade of “W” (Withdrawal) is used when a student withdraws from a course when the last date of attendance occurs up to 75% of the course. The deadline for non-punitive withdrawals (75% of the term) will be published in the registration bulletin each semester. Student absence from class does not constitute an official withdrawal, thus failure to withdraw by the established deadline will result in a final grade of “F.” When a student withdraws from a course, access to course materials will be terminated.

Withdrawal from the program/college: Failure to enroll in courses in alignment with the master curriculum without prior approval of the program chair will be considered an unsuccessful attempt in the master curriculum
and will be considered withdrawn from the program and/or the college. Students withdrawing from the program/college must complete the withdrawal form and obtain the signature of the program chair before submitting the form to the director of student records and information management. Students withdrawing from a healthcare program or program that requires a supervised clinical experience are eligible to remain in any General Studies courses in which the student is enrolled. If the request is for less than one semester and the student is not in academic difficulty (not in progression, on probation, or on an action plan) and there is no resulting grading consequence (i.e., an Incomplete grade), the dean of student affairs and enrollment management, in consultation with the program chair, can approve or deny the leave request. If the request is for one semester or more, the student is in academic difficulty, or there is a potential grading consequence for the LOA, the Academic, Progression and Graduation (APG) committee will review the information/documentation provided in support of the request and approve or deny the leave request. Students may request a leave of absence/withdrawal at any point during their enrollment but may not exceed a total of 12 months per program enrollment. Leave of absence status ensures the student a place in the program if he/she meets all conditions set forth and returns at the agreed upon date. Changes that occur in the curriculum, college policies, or the Atrium Health Loan program will be binding upon the student returning from a LOA/W. Students returning to a clinically based healthcare program must reenter no later than one year from the end of the last successfully completed applied course.

If a student involved in an alleged academic integrity violation or facing other disciplinary issues withdraws from a course, program or the college prior to resolution, continuation of the disciplinary process is determined by the dean of student affairs and enrollment management and provost. If a hearing is not pursued upon the withdrawal of the student, the dean of student affairs and enrollment management and provost can reinstate the disciplinary process prior to future readmission or progression. In either case, any disciplinary processes or actions will follow normal due process procedures for the offense.

Satisfactory Academic Progress

Satisfactory academic progress consists of two elements: qualitative, as demonstrated by course grades, and quantitative, as demonstrated by credit hours earned as a percentage of credit hours attempted. A cumulative grade point average (CGPA) of 2.0 (“C”) is the minimal measure of academic satisfactory progress toward graduation. Grades earned in courses taken elsewhere are not calculated in the Carolinas College CGPA, even when advanced standing credit is granted. In addition, beginning at the end of a student’s second term of enrollment and thereafter, students must successfully complete 50% of the cumulative hours attempted. A grade of A, B or C demonstrates successful completion of a course; a grade of I, W, WF, D or F is not considered successful completion. Transfer credit does count in the calculation of the quantitative measure of satisfactory academic progress. Students are expected to understand their academic standing requirements and review their academic performance with their advisors.

At the completion of a semester or term, the director of student records and information management will assure that a new GPA and CGPA have been calculated and appear on the student transcript. A student whose CGPA is below 2.0 or who has not completed 50% of attempted credit hours (upon completion of the second term of enrollment and thereafter) will be placed on academic probation for the subsequent semester attended.

1. The dean of student affairs and enrollment management will send a letter alerting the student to his/her probationary status, including sources of academic assistance and consequences of failure to improve. The program chair will also be notified.

2. The grade earned in a class that is retaken replaces the original grade in the calculation of the GPA and CGPA, but both grades are maintained on the transcript. Separate policies govern CGPA for guaranteed or conditional admission purposes.

At the conclusion of the probationary period, the new CGPA is expected to be at or above 2.0 and at least 50% of all attempted credit hours are to have been successfully earned (effective for credit hours attempted after the second term of enrollment and thereafter). If not, the student will generally be academically dismissed. However, if the CGPA is still below a 2.0 but the term GPA is 3.0 or higher, the student may be allowed to continue the second term and final term to demonstrate ability to be successful. This “second probation” period must culminate in a CGPA of 2.0 or better, or the student will be academically dismissed. A student placed on second (or extended) probation will be notified in writing of his/her status. No student will be permitted to register for class if reaching a 2.0 CGPA within two semesters of notification is not mathematically possible.

Regulations governing federal financial aid dictate a higher standard for calculation of the quantitative measure of satisfactory academic progress to maintain eligibility for federal financial aid. Please review the Satisfactory Academic Progress in the Finance and Financial Aid section of this handbook.

Academic Progression and Dismissal

For all programs, the lowest passing letter grade in any course is a “C.”

Students in the general studies and RN-BSN programs will follow the Academic Satisfactory Progress policy and will not be subject to dismissal based on the grade in one course. Please refer to the Satisfactory Academic Progress section above.

Students in the ADN program will follow the Progression policy and are not subject to dismissal based on the grade in one course. If the course is a prerequisite, that course must be repeated before the student progresses. Repeating a course is based on space availability. For more details on the ADN progression process, please see the Progression policy and the section on progression in the Associate Degree Nursing section of this catalog.

Notification of academic dismissal by the provost will occur when:

1. General Studies and RN-BSN students fail to meet standards of academic satisfactory progress as outlined in the policy by the same name.

2. Students in the ADN program have a subsequent (second) failure fail to meet required co-requisites or prerequisites.

3. Students in the Histotechnology, Medical Laboratory Science, Neurodiagnostic Technology, Radiation Therapy, and Radiologic Technology programs earn a grade lower than a “C” in a master curriculum course.

A student who is dismissed from a clinical program can continue to take general studies courses and complete the associate degree in General Studies program.

Readmission to Credit Programs

A student who is academically dismissed from a program can petition for readmission with the exception of students in the ADN program who have completed the same course twice. A student applying for readmission must reenter no later than one year from the last successfully completed applied course. Applied courses (e.g., NUR, etc.) must be repeated if the length of time between successful completion of a course and readmission to a consecutive course exceeds one calendar year or if substantial curriculum changes have occurred. Petitions for readmission must be submitted to the dean of student affairs and enrollment management. All readmission petitions are deliberated by the APG Committee, including a hearing with the student. For more information, please see the Readmission to Credit Programs and Conducting APG Hearings policies.

Student Academic Records

The student file maintained by the director of student records and information management is considered the primary student academic record. In accordance with the Family Educational Rights and Privacy Act (FERPA) of 1974, as amended, students may review their academic records and prevent disclosure of certain information. The record may be released to a third party only with the written consent of the student or parent
of a dependent student, as defined by the Internal Revenue Service, or in certain situations allowed by federal law including public safety concerns, court subpoenas, regulatory, accreditation or federal agency requests, legitimate educational interests or other exceptions. For the purpose of student records, the term “student” includes all matriculating individuals 18 years of age or older. Any student 17 years of age or younger, or any dependent student whose parent requests access, will be notified of such a request in writing. All requests will be recorded in the student’s file. The director of student records and information management will discuss with interested students the procedure for requesting a review of the academic file.

Student files are kept in locked, fire-proof areas with limited access. Staff granted access are trained regarding the policies governing the handling and storage of student records. Directory information including name, address, telephone number, e-mail address, date of birth, photograph, dates of attendance, degrees, honors and awards received, and participation in college activities may be disclosed without the consent of the student. Students may request nondisclosure of directory information by completing a form available from the director of student records and information management. Requests for nondisclosure are valid for one year. In response to an authenticated electronic or signed student request, an official transcript will be issued to the designated institution or person provided financial obligations to the college have been met. A fee will be charged for each official copy. Transcripts on file from other institutions are not released.

To assure proper record keeping, students are required to update their address and contact information in the student information system. Name changes require legal documentation and must be submitted to the director of student records and information management. Alumni are encouraged to keep the college informed of their current name, contact information and professional status.

Dean’s List, President’s List and Academic Awards

Students in for-credit healthcare programs and those in the Pre-Nursing or Pre-Radiologic Technology pathways or General Studies courses (6 or more semester hours) receiving a grade point average of 3.00 or higher for a semester will be placed on the Dean’s List. Certificate will be awarded.

Students in for-credit healthcare programs and those in the Pre-Nursing or Pre-Radiologic Technology pathways or General Studies courses (6 or more semester hours) receiving a grade point average of 4.00 for a semester will be placed on the President’s List. Certificate will be awarded.

Students achieving an overall GPA of 3.24 or higher will be recognized at the commencement exercise as graduating with Latin honors of:

- Cum Laude 3.24-3.499
- Magna Cum Laude 3.50-3.749
- Summa Cum Laude 3.75-4.00

Additional scholastic, leadership and performance-based awards may be presented as determined by the faculty and/or the program chairs.

Graduation Requirements

Graduation ceremonies are listed on the academic calendar. All students receiving degrees, diplomas or certificates (excluding non-credit programs) are required to submit an application for graduation by the designated deadline and expected to attend the graduation exercises. Enrolled students who have maintained the highest scholastic averages are honored by being named graduation marshals. Programs that graduate students during off-cycle times may have a graduation recognition event in place of a ceremony. Upon request, these students may participate in the next scheduled ceremony.

Satisfactory completion of all required and elective courses in the designated master curriculum is required for graduation and to earn a degree, diploma or certificate. The satisfactory completion of the requirements will be calculated by the director of student records and information management and reviewed by the APG committee. The student must have attained a grade of “C” or better in each of the curriculum requirements and have a 2.0 or higher cumulative grade point average (GPA); earned a minimum of 25% of the required semester hours of credit at Carolinas College and satisfied all financial obligations to the college.

Additional graduation requirements for specific programs can be found in the program-specific sections of the catalog.

Clinical Laboratory Sciences: Histotechnology

Program Mission and Overview

In support of the mission of the college, the mission of the Histotechnology program is to transform lives by educating, engaging and empowering professionals enabling them to function as competent entry-level medical laboratory scientists and serve in leadership, educational and technical roles within the profession.

The Histotechnology program prepares professionals who are competent to perform a full range of histology laboratory techniques and who possess skills in clinical decision-making, regulatory compliance, education, management, quality assurance and performance improvement wherever histology laboratory testing is researched, developed or performed. The curriculum design integrates didactic lectures, student laboratory training and supervised clinical experience in the histology laboratory of Atrium Health Carolinas Medical Center. The program consists of four courses of study including basic histotechniques, advanced histotechniques, histotechnology clinical and professional issues, which includes education, research design and management. On average during the clinical rotation, the faculty to student ratio is 1-to-2.

Philosophy

The histotechnologist must perform duties in an accurate, precise, timely and responsible manner; advocate the delivery of quality laboratory services in a cost-effective manner; work within the boundaries of laws and regulations; safeguard patient information with respect and confidentiality within the limits of the laws; pursue continuing education; and educate the healthcare community and the public concerning the importance of the histology laboratory.

Student Learning Outcomes (NAACLS Entry-Level Competencies)

The Histotechnology program prepares professionals who are competent to perform a full range of histology laboratory techniques and who possess skills in clinical decision-making, regulatory compliance, education, management, quality assurance and performance improvement wherever histology laboratory testing is researched, developed or performed. Based on NAACLS Compliance Standards, at completion of the Histotechnology program, students will possess the following entry-level competencies:
At entry level, the histotechnologist will have the following basic knowledge and skills in:

- Receiving and accessioning tissue specimens.
- Preparing tissue specimens for microscopic examinations, including all routine procedures.
- Performing more complex procedures for processing and staining tissues, including enzymes and immunohistochemistry.
- Assisting with and/or performing gross examination and frozen section procedures in histopathology as well as cytology specimen preparation methods.
- Identifying tissue structures, cell components and their staining characteristics, and relating them to physiological functions.
- Recognizing factors that affect procedures and results and taking appropriate action within predetermined limits when corrections are indicated.
- Developing, testing, implementing, evaluating and selecting new techniques, procedures, instruments and methods in terms of their usefulness and practicality within the context of a given laboratory’s personnel, equipment, space and budgetary resources.
- Making decisions concerning the results of quality control and quality assurance measures and instituting proper procedures to maintain accuracy and precision.
- Confirming abnormal results, verifying quality control procedures, executing quality control procedures and developing solutions to problems concerning the generation of laboratory data.
- Establishing and performing preventative and corrective maintenance of equipment or instruments, as well as identifying appropriate sources for repair.
- Exercising and applying principles of safety, management and supervision.
- Demonstrating professional conduct and interpersonal communication skills with patients, laboratory personnel, other health care professionals and the public.
- Recognizing and acting upon individual needs for continuing education as a function of growth and maintenance of professional competence.
- Recognizing the responsibilities of other laboratory and healthcare professionals and interacting with them with respect for their jobs and patient care.
- Leading supportive personnel and peers in their acquisition of knowledge, skills and attitudes; and providing leadership in educating other health personnel and the community.
- Applying principles of education methodology.
- Applying principles of current information systems.
- Applying principles of in-situ hybridization, plastic and electron microscopy.

At entry level, the histotechnologist will have the following basic knowledge and skills in:

- Principles and practices of professional conduct and the significance of continuing professional development.
- Communication sufficient to serve the needs of patients, the public and members of the healthcare team.
- Principles and practices of administration, supervision and safety as applied to histotechnology.
- Education techniques and terminology sufficient to train/educate users and providers of laboratory services.

TOTAL 26

Clinical Practicum Location
Atrium Health Carolinas Medical Center (CMC)

Weekly Schedule
Students enrolled in the Histotechnology program spend five days per week in lecture, student and clinical laboratories or other assigned areas. Typical hours of instruction are Monday through Wednesday, 8 a.m. to 5 p.m. (online, off-campus); Thursday and Friday 8 a.m. to 2:30 p.m. (on-campus) Clinical rotations vary and may include early morning and second shift hours.

Attendance
Promptness, attendance, and participation are expected. Punctuality is very important, and notification of absences or tardiness is mandatory. Students are required to be on time, present, and actively participating in all seated and online (Zoom, video and audio are required) class sessions, on-campus student labs, and clinical assignments. Students may jeopardize their ability to successfully pass a course if they are not on time, present, and actively participating in class sessions, student labs, and clinical rotations. Students are responsible for missed assignments. Faculty members keep an official attendance record in each course. The following are additional guidelines in regards to attendance and participation:

- Students must notify the course faculty member and the program chair, at least one hour prior to the course or clinical start time for any absence or tardiness. If a student is absent without proper notification more than one time, the student may be recommended for dismissal from the program.
- Promptness, attendance, and participation are documented and incorporated in the student’s affective grade in each course and may be included on any future job references the faculty or program chair writes for the student.
- Students are responsible for accurately and legibly recording time in and time out each day in the clinical area.
Grading Policy

The Histotechnology program uses the following numerical grade ranges for the final letter grade of each course:

- A: 94 – 100
- B: 87 – 93
- C: 80 – 86
- D: 73 – 79 (Deficient, non-passing)
- F: below 73 (Failing, non-passing)

Students must maintain a “C” average or above in each course. Any student who has an average below 80 at midpoint of the course will be required to develop an action plan in conjunction with the education coordinator and/or program chair.

Academic support is available through the Student Success Center. Faculty members or the program chair can refer students experiencing difficulty to the Student Success Center for assistance.

Failure to achieve a course average of 80 or above by the end of the course will result in course failure and academic dismissal from the program. Psychomotor and affective evaluations constitute a percentage of the student’s cumulative grade in each course. Any student who has a consistent problem meeting the psychomotor or affective objectives will be placed on an action plan and if the unacceptable behavior or attitude persists, the student may be recommended for dismissal from the program. The college APG committee will consider any persistent academic performance issues referred by the faculty.

Certification of Completion

Graduates of the program receive a certificate in Histotechnology and are eligible to take the Histotechnology (HTL) American Society for Clinical Pathology (ASCP) Board of Certification examination to become nationally certified. Graduation and receipt of certificate are not contingent upon passing a certification exam.

Awards and Recognition

In addition to other awards given by the college, the Golden Forceps Award is given to the graduating student who demonstrates excellence in clinical performance, service to the community, leadership potential and scholastic achievement as determined by the program and clinical faculty.

Clinical Laboratory Sciences: Medical Laboratory Science

Program Mission and Overview

In support of the mission of the college, the mission of the Medical Laboratory Science program is to transform lives by educating, engaging and empowering professionals enabling them to function as competent entry-level medical laboratory scientists and serve in leadership, educational, and technical roles within the profession.

The curriculum is designed to develop critical thinking skills by integrating theoretical concepts with clinical laboratory training. The program consists of six courses containing didactic lectures and supervised education in the clinical laboratories of chemistry (including phlebotomy), hematology, immunohematology, immunology, microbiology, and professional issues which include professional development, education, research design and management. In each course, a designated faculty member is responsible for curriculum development, instruction and evaluation of student progress. The courses include didactic lectures, student laboratory training and consecutive clinical experiences. Didactic lectures and student laboratory training take place at Carolinas College, with clinical experiences conducted in the laboratories of Carolinas Laboratory Network. On average, during the clinical rotations the faculty/student ratio is 1-to-2.

Philosophy

The medical laboratory scientist must perform duties in an accurate, precise, timely and responsible manner; advocate for delivery of quality laboratory services in a cost-effective manner; work within the boundaries of laws and regulations; safeguard patient information with respect and confidentiality within the limits of the law; pursue continuing education; and educate the healthcare community and the public concerning the importance of the medical laboratory.

Student Learning Outcomes (NAACLS Entry Level Competencies)

The Medical Laboratory Science program prepares professionals with entry-level competencies necessary to perform the full range of clinical laboratory tests in the areas of clinical chemistry, hematology/hemostasis, immunology, immunohematology/transfusion medicine, microbiology, urine and body fluid analysis, laboratory operations and other emerging diagnostics, and play a role in the development and evaluation of test systems and interpretive algorithms.
The medical laboratory scientist will have diverse responsibilities in areas of analysis and clinical decision-making, regulatory compliance with applicable regulations, education and quality assurance/performance improvement wherever laboratory testing is researched, developed or performed. The Medical Laboratory Science program curriculum is designed to develop these skills at entry level by integrating theoretical concepts with clinical laboratory training. Upon completion of the Medical Laboratory Science program, students will have basic knowledge and skills in:

- Application of safety and governmental regulations and standards as applied to clinical laboratory science.
- Principles and practices of professional conduct and the significance of continuing professional development.
- Communication sufficient to serve the needs of patients, the public and members of the healthcare team.
- Principles and practices of administration and supervision as applied to clinical laboratory science.
- Educational methodologies and terminology sufficient to train/educate users and providers of laboratory services.
- Principles and practices of clinical study design, implementation and dissemination of results.
- Pre-analytical, analytical and post-analytical components of laboratory services. This includes principles and methodologies, performance of assays, problem-solving, troubleshooting techniques, interpretation and evaluation of clinical procedures and results, statistical approaches to data evaluation, principles and practices of quality assurance/quality improvement and continuous assessment of laboratory services for all major areas practiced in the contemporary clinical laboratory.

Weekly Schedule

Students enrolled in the Medical Laboratory Science program spend five days a week in lecture, student and clinical laboratories or other assigned areas. The general hours of instruction are 7 a.m. to 3:30 p.m., Monday through Friday with a mixture of on-campus and off-campus (online) learning. Clinical rotations include second shift hours as well.

Attendance

Promptness, attendance, and participation are expected. Punctuality is very important, and notification of absences or tardiness is mandatory. Students are required to be on time, present, and actively participating in all seated and online (Zoom, video and audio are required) class sessions, on-campus student labs, and clinical assignments. Students may jeopardize their ability to successfully pass a course if they are not on time, present, and actively participating in class sessions, student labs, and clinical rotations. Students are responsible for missed assignments. Faculty members keep an official attendance record in each course. The following are additional guidelines in regards to attendance and participation:

- Students must notify the course faculty member and the program chair, and when applicable the clinical preceptor, at least one hour prior to the course or clinical start time for any absence or tardiness. If a student is absent without proper notification more than one time, the student may be recommended for dismissal from the program.
- Promptness, attendance, and participation are documented and incorporated in the student’s affective grade in each course and may be included on any future job references the faculty or program chair writes for the student.
- Students are responsible for accurately and legibly recording time in and time out each day in the clinical area.

Grading Policy

The Medical Laboratory Science program uses the following numerical grade ranges for the final letter grade of each course:

<table>
<thead>

</tbody>
</table>

Deficient, non-passing
Failing, non-passing

Students must maintain a “C” average or above in each course. Any student who has an average below 80 at midpoint of the course will be required to develop an action plan in conjunction with the course faculty and/or program chair.
Academic support is available through the Student Success Center. Faculty members or the program chair can refer students experiencing difficulty to the Student Success Center for assistance.

Failure to achieve a course average of 80 or above by the end of the course will result in course failure and academic dismissal from the program. Psychomotor and affective evaluations constitute a percentage of the student’s cumulative grade in each course. Any student who has a consistent problem meeting the psychomotor or affective objectives will be placed on an action plan and if the unacceptable behavior or attitude persists, the student may be recommended for dismissal from the program. The college APG committee will consider any persistent academic performance issues referred by the faculty.

Certificate of Completion
Graduates of the program receive a certificate in medical laboratory science and are eligible to take the Medical Laboratory Scientist (MLS) American Society for Clinical Pathology (ASCP) Board of Certification Examination to be nationally certified. Graduation and receipt of certificate is not contingent upon passing a certification exam.

Awards and Recognition
In addition to other awards given by the college, the Medical Laboratory Science program presents two awards each year. The Charles U. Mauney Microbiology Scholastic Award is given to the graduating student with the highest GPA in the clinical microbiology course. The Spirit of Excellence Award is given to the graduating student who demonstrates excellence in clinical performance, service to the community, leadership potential and scholastic achievement as determined by the program faculty.

Clinical Laboratory Sciences: Non-Credit Course Offerings
The Clinical Laboratory Sciences department provides innovative non-credit training solutions for healthcare professionals. Courses are offered with clinically relevant skills and practical applications to enhance the care of patients. Participants can gain hands-on experience to prepare them for entry into a health professions career, prepare for certification examinations or enhance their skill set for advancement.

Phlebotomy
This 200-hour, non-credit course culminates in eligibility to sit for a national certification examination. The program is approved by the National Accrediting Agency for Clinical Laboratory Sciences. The first half of the program consists of lecture and student laboratory practice and provides instruction in the skills needed for proper collection of blood. Emphasis is on ethics, legalities, medical terminology, safety and infection control, healthcare delivery systems, patient relations, anatomy and physiology, and specimen collection/processing. Students in this program take PHL 010. Graduation and receipt of a certificate is not contingent on passing a certification exam.

The second half provides the clinical experience in which students are assigned to a variety of healthcare settings to develop skills necessary to perform successful phlebotomy procedures. Times and locations will vary based on the availability of clinical sites. Clinical rotations utilize inpatient and outpatient laboratory facilities of Atrium Health.

Student Learning Outcomes (NAACLS Entry-Level Competencies)
At entry level, the phlebotomist will possess the following entry level competencies:

- Demonstrate knowledge of the health care delivery system and medical terminology.
- Demonstrate knowledge of infection control and safety.
- Demonstrate basic understanding of the anatomy and physiology of body systems and anatomic terminology in order to relate major areas of the clinical laboratory to general pathologic conditions associated with the body systems.
- Demonstrate basic understanding of age specific or psycho-social considerations involved in the performance of phlebotomy procedures on various age groups of patients.
• Demonstrated understanding of the importance of specimen collection and specimen integrity in the
delivery of patient care.
• Demonstrated knowledge of collection equipment, various types of additives used, special precautions
necessary and substances that can interfere in clinical analysis of blood constituents.
• Followed standard operating procedures to collect specimens via venipuncture and capillary (dermal)
puncture.
• Demonstrated understanding of requisitioning, specimen transport and specimen processing.
• Communicated (verbally and nonverbally) effectively and appropriately in the workplace.

Clinical Practicum Locations
• Atrium Health Carolinas Medical Center (CMC)
  • Atrium Health Mercy, a facility of Carolinas Medical Center
  • Atrium Health Pineville
  • Atrium Health University
• Atrium Health Carolinas Medical Center Reference Lab locations and Patient Service
Centers (PSC)
  ◦ Children’s Specialty Center
  ◦ CMC-Medical Center Plaza
  ◦ CMC-Morehead Medical Plaza
  ◦ PSC Mountain Island
  ◦ PSC Northeast Gateway
  ◦ PSC Northeast Medical Arts
  ◦ PSC Pineville Medical Plaza
  ◦ PSC Steele Creek
  ◦ PSC University Medical Park
  ◦ Union West Medical Park
• Physician Offices
  ◦ Mecklenburg Medical Group Steele Creek
  ◦ Mecklenburg Medical Group Ballantyne
  ◦ Mecklenburg Medical Group Uptown
  ◦ Randolph Internal Medicine
  ◦ Charlotte Medical Clinic at South Park
  ◦ Infectious Disease – Myers Park
  ◦ Infectious Disease – Abbey Place/Hedgemere
  • Gastonia, NC
  ◦ Riverwood Medical Associates

Attendance
Time missed must be made up within the designated duration and hours of the course. If more than 12 hours
are missed, the student may be dismissed from the program at the discretion of the program coordinator.
Notification of absences is mandatory and the program coordinator must be notified at least one hour in
advance of an absence. It is the student’s responsibility to contact the program coordinator and arrange for
make-up materials/schedule upon return to the facility.
If a student is tardy two times, the program coordinator will counsel the student and documentation will go into
the student’s file. More than three tardies can result in dismissal from the program.

Grading
The numerical range for course grades:

- A: 92 – 100
- B: 84 – 91
- C: 77 – 83
- D: 70 – 76   Deficient, non-passing
- F: 69 & below   Failing, non-passing

All students must have a grade average equal to at least a “C” (77) for the didactic section and demonstrate
satisfactory performance in all components of the student lab section to advance to the clinical training section.
Students will be evaluated periodically during the course and an action plan will be developed as necessary to
ensure student success. The final course grade is based on a combination of the didactic grade and the clinical
rotation grade. The clinical rotation evaluation, completed by site instructors, is both skill-based and affective.
Graduates receive a certificate which is not contingent upon passing a licensure or certification exam.

Certificate of Completion
Graduates of the program receive a certificate in phlebotomy and are eligible to take the Phlebotomy (PBT)
American Society for Clinical Pathology (ASCP) Board of Certification Examination to be nationally certified.
Graduation and receipt of certificate is not contingent upon passing a certification exam.
Diagnostic and Imaging Sciences: Neurodiagnostic Technology

Program Mission and Overview
In support of the mission of the college, the mission of the Neurodiagnostic Technology program is to transform lives by educating, engaging and empowering professionals enabling them to function as competent diagnostic technologists. The Neurodiagnostic Technology program enrolled its inaugural class in the spring 2020 term. The program can be completed as a one-year certificate or a two-year associate degree program. The Neurodiagnostic Technology program teaches students to record electrical activity in the brain, central nervous, autonomic and peripheral nervous systems and is used in the diagnosis and treatment of brain diseases. Instruction is provided in a hybrid format that includes online coursework and face-to-face clinical and laboratory experiences. The program prepares graduates for entry-level clinical roles in Electroencephalography (EEG) and provides introductory concepts for Nerve Condition Studies (NCS), Evoked Potentials (EP) and Polysomnography (PSG).

Student Learning Outcomes
The student learning outcomes are designed to enhance integration of cognitive theory with psychomotor skills development. The program student learning outcomes reflect the psychomotor skills, cognitive knowledge and affective attitudes students will acquire and enhance as a result of didactic, hands-on laboratory and clinical experiences offered in the program. As measured by course-specific assessments (e.g., written exams, course discussions, analysis of case studies), demonstration of skill competencies in laboratory settings, and regular clinical evaluations, students will:

- Understand fundamental concepts in neuroscience and how they relate to various disease conditions (cognitive domain).
- Correctly operate neurodiagnostic equipment (psychomotor domain).
- Precisely obtain appropriate recordings using various technologies (psychomotor domain).
- Accurately interpret and evaluate various neurodiagnostic tests in laboratory and clinical settings (cognitive domain).
- Apply theoretical knowledge to neurodiagnostic techniques and related disease conditions (cognitive domain).
- Practice patient-centered care in accordance with the ethical and legal framework of the neurodiagnostic technologist (affective attitude).
- Explain measurements, techniques and results related to neurodiagnostic testing to healthcare team members (affective attitude).
- Effectively work as a member of the healthcare team (affective attitude).

- TABLE OF CONTENTS
Clinical Facilities
The major clinical facility for the program is Atrium Health Carolinas Medical Center (CMC). Other sites will be added as appropriate.

Attendance
Promptness and attendance are expected. Punctuality is very important and notification of absences or tardiness is mandatory. Students are required to be on time for class and attend lectures, student labs and clinical assignments. Students may jeopardize their ability to successfully pass a course if they are not present and on time for class and clinical rotations. Faculty members keep an official attendance record in each course. The following are additional guidelines with respect to time and attendance:

- Make-up work/time for assignments missed is the responsibility of the student and at the discretion of the program chair and clinical faculty.
- Students must notify the course faculty member, and when applicable the clinical preceptor, at least one hour prior to the course or clinical start time for any absence or tardiness. If a student is absent without proper notification more than one time, the student may be recommended for dismissal from the program.
- Students are responsible for communicating daily with the program chair or faculty to accurately record their time during clinical rotation.

Grading Policy
The Neurodiagnostic Technology program uses the following numerical grade ranges for the final letter grade of each course:

- A: 94 – 100
- B: 87 – 93
- C: 80 – 86
- D: 73 – 79
- F: Below 73

Students must maintain a “C” average or above in each course. Any student who has an average below 80 at midpoint of the course will be required to develop an action plan in conjunction with the faculty and/or program chair.

Academic support is available through the Student Success Center. Faculty members or the program chair can refer students experiencing difficulty to the Student Success Center for assistance.

Failure to achieve a course average of 80 or above by the end of the course will result in course failure and academic dismissal from the program. Psychomotor and affective evaluations constitute a percentage of the student’s cumulative grade in each course. Any student who has a consistent problem meeting the psychomotor or affective objectives will be placed on an action plan and if the unacceptable behavior or attitude persists, the student may be recommended for dismissal from the program. The college APG committee will consider any persistent academic performance issues referred by the faculty.

Certificate of Completion
With completion of established ABRET requirements, graduates will be eligible to take professional certification examinations administered by the American Board of Registration of Electroencephalographic and Evoked Potential Technologists (ABRET).

The Radiation Therapy program is a one-year certificate program for graduates of accredited radiography or nuclear medicine technology programs. In support of the college’s mission, the Radiation Therapy program prepares graduates to function as an entry-level radiation therapist according to the professional didactic curriculum outlined by the American Society of Radiologic Technologists (ASRT) and the clinical competency requirements outlined by the American Registry of Radiologic Technologists (ARRT). Additionally, the Radiation Therapy program adheres to the core values adopted by the college and by Atrium Health of caring, commitment, equity, integrity and teamwork.

Philosophy
Faculty members believe that learning is facilitated when the learner is actively engaged in the educational process and motivated to strive for excellence. The Radiation Therapy program emphasizes student participation, knowledge, comprehension, integration and application of theoretical and clinical concepts. Program faculty are committed to the success of each student. To this end, we accept the responsibility for guiding and directing the student and creating an environment conducive to learning. Program faculty members serve as educators, facilitators, mentors, consultants, role models and colleagues. We will support, encourage and challenge the student to achieve professional growth through the acquisition of technical knowledge and to expect personal growth through touching the lives of the very special patients entrusted to their care.

The Radiation Therapy program fosters learning by providing an environment that is intellectually stimulating, as well as caring. We believe that being a professional is more than being technically excellent. Radiation therapy is a high-tech, high-touch profession, providing the opportunity to deliver quality patient care and comfort while working with technologically sophisticated equipment. Professional practice is based on demonstrated knowledge, skills and attitudes, as well as ethical, legal and professional standards. The comprehensive structure of the program is designed to help create and instill a sense of professional pride and accountability.

We believe that the professional education of the student in radiation therapy is dynamic and evolving, impacted by current and future trends in the environment, healthcare system and the economy. Education is a continual process and the tools necessary for continued learning should be strengthened and refined through participation.
Mission, Goals and Student Learning Outcomes

The goals of the program are to provide the radiation therapy community with graduates that:

• Demonstrate accurate utilization of treatment delivery skills.
  Students will be able to:
  o Acquire patient data needed to plan a course of treatment.
  o Utilize positioning techniques that ensure proper beam placement.
  o Demonstrate an understanding of processes used to plan a course of treatment.

• Employ critical thinking to solve problems.
  Students will be able to:
  o Assess the patient condition during a course of treatment.
  o Assess equipment function.
  o Evaluate the quality of a planned course of treatment.

• Utilize effective communication skills.
  Students will be able to:
  o Utilize situation appropriate oral communication.
  o Properly employ written communication skills.

• Exhibit professional behaviors.
  Students will be able to:
  o Demonstrate a sense of accountability.
  o Exhibit integrity.

Curriculum

The curriculum for the certificate program in radiation therapy is below:

Clinical Activities and Supervision

Students are assigned to clinical rotations to provide a variety of experiences, to provide consistency and to promote achievement of clinical objectives. Students are required to maintain current CPR credentials as required by the college, current immunizations and to receive annual tuberculin skin testing (TST). All radiation therapy procedures are performed under the direct supervision of a qualified practitioner. Direct supervision means that the qualified practitioner:

• Is a board-certified radiation oncologist, registered nurse (RN), radiation therapist (RTT), dosimetrist (CMD), or medical physicist (MS/PhD).
• Reviews the procedure in relation to the student’s achievement.
• Evaluates the condition of the patient in relation to the student’s knowledge.
• Is present during the procedure, and
• Reviews and approves the procedure.

Clinical Facilities

The following are the major clinical facilities for the radiation therapy program:

- Levine Cancer Institute (LCI)-Carolinas Medical Center, Charlotte, NC
- LCI-Pineville, Charlotte, NC
- LCI-University, Charlotte, NC
- LCI-Cleveland, Shelby, NC
- LCI-North East, Concord, NC
- Rock Hill Radiation Therapy Center
- CaroMont Regional Medical Center
- Mission Health-Asheville, NC
- Gibbs Cancer Center (Spartanburg & Pelham, SC)
- AnMed Radiation Oncology, Anderson, SC

Other facilities will be added as appropriate.
Clinical/Lab Attendance and Punctuality
Clinical/lab experiences are provided during the semester to allow students the opportunity to correlate theory with the actual performance of radiation therapy procedures. Students are expected to attend all scheduled assignments to satisfactorily achieve clinical objectives and are required to attend a minimum number of hours of clinical/lab during the semester as specified in the syllabus. To be permitted to remain in the clinical affiliate, the student must comply with the clinical dress code and radiation safety policies.

Clinical Expectations
Specific assignments to clinical affiliates are scheduled to provide the student with a variety of experiences in a variety of settings. In addition, regional considerations are also applied when determining clinical schedules. Students will not be required to attend clinical facilities outside of the region for which they were accepted. However, all students are required to be on campus two days per week for completion of associated didactic courses. Students receive a clinical notebook at the beginning of the course with specific guidelines outlining the clinical requirements and objectives for the course as well as policies and procedures for the Radiation Therapy program. Students are responsible for maintaining proficiency in all radiation therapy procedures and clinical skills previously taught. Periodic evaluation by the clinical coordinator/clinical supervisor will ensure the student is maintaining the necessary clinical skills.

Clinical Competency Evaluation/Skills
For the student to be successful in the clinical setting, competency evaluation is required for specific radiation therapy procedures and skills. There are core clinical competencies that all students must demonstrate to establish eligibility for graduation and ARRT certification. Competency/skills requirements are identified in the clinical notebook. The clinical competency requirements for radiation therapy include 48 mandatory procedures in the following 7 areas: general patient care, quality control procedures, simulation procedures, dosimetry, treatment accessory devices, participatory procedures and radiation treatment procedures. Additional competencies may be specified in the clinical notebook. The ARRT requirements specify that clinical competency will be demonstrated on patients however, certain clinical procedures may be demonstrated under simulated conditions. Demonstration of competency should include variations in patient conditions (e.g., age, gender, medical condition).

Clinical Evaluation Tools
Clinical evaluation tools are designed for each clinical course and are used by the clinical staff to appraise the student's performance. Each student will receive feedback, verbally and in writing, throughout the semester. Students will be evaluated on their affective, cognitive and psychomotor skills in each clinical facility and assignment. The clinical staff or supervisor will review and discuss the results of these evaluations with the student as they are completed. In addition, clinical conferences between the program chair, clinical supervisor and student will be scheduled periodically throughout the semester. The clinical conference serves as a means for documenting strengths, weaknesses and progress of the student in meeting the clinical requirements and objectives. The clinical conference also assists the student in synthesizing information presented in lecture, lab and clinical.

Radiation Safety
Maximum radiation protection will be provided to each radiation therapy student according to the clinical agency's radiation safety policies.

Student Pregnancy Policy
If disclosure of a potential pregnancy is presented to the program chair, a counseling session will be immediately arranged with the Atrium Health radiation safety officer for:
- Discussion of the North Carolina Regulations for Protection Against Radiation as adopted by the North Carolina Radiation Protection Commission (NCRPC).
- Review of the student's cumulative radiation monitoring report.
- Review of As Low As Reasonably Achievable (ALARA) principles with emphasis on radiation-control procedures, and
- Provision of a second radiation monitor to be positioned at waist level and under any protective lead apron to specifically monitor exposure to the fetus/embryo.
- Discussion of the Nuclear Regulatory Commission's (NRC's) regulations on radiation protection

The student will be required to read and sign a form attesting to the fact that the aforementioned information has been provided with the opportunity to ask questions and indicating an understanding of the associated safety standards and procedures. Following the counseling session with the Atrium Health radiation safety officer the student may elect to: continue in the course without modifications to clinical education or apply for a withdrawal/leave of absence (W/LOA) from the program with re-entry as listed in the catalog/student handbook. Students who satisfy all requirements of the Withdrawal/Leave of Absence Policy are guaranteed re-entry into the program when factors indicating readiness to return have been met. All information regarding a student's declared pregnancy will be held in strict confidence. The student may revoke the declaration via written notification at any time without explanation.

Grading Policy
Unless otherwise specified in a course syllabus, the conversion of numeric to letter grades will be as follows:

- A: 94 – 100
- B: 87 – 93
- C: 80 – 86
- D: 73 – 79
- F: 72 or Below

The final course grade may be affected by attendance, punctuality and other policy considerations.

Grade Progression Policy
Students must earn a minimum score of 80.0 on each clinical requirement to receive a satisfactory clinical rating. Students must also maintain a minimum course average of 80.0 or letter grade of “C” in each curriculum course. Any student who has a course average below 80.0 at midterm will develop an Action Plan/Plan for Success with the approval and support from the course faculty. Failure to achieve a minimum score of 80.0 on each clinical requirement and/or a course average of 80.0 by the end of the course will result in program dismissal.

Certification
Graduates are eligible to challenge the National Certification Examination in Radiation Therapy administered by the American Registry of Radiologic Technologists (ARRT).

Awards and Recognition
In addition to other awards given by the college, an Award of Academic Excellence is given to the graduate who has earned the highest overall GPA in program-specific clinical and didactic courses.
Diagnostic and Imaging Sciences: Radiologic Technology

Program Mission and Overview
The mission of the Radiologic Technology program is to engage, educate and provides graduate technologists with a foundation in the performance of entry-level diagnostic procedures in a variety of healthcare settings.

The Radiologic Technology program is a two-year associate degree program that prepares graduates for a career as a radiologic technologist. Radiologic technology is the health profession that deals with medical imaging in the diagnosis, assessment and treatment of disease. In support of the college’s mission, the Radiologic Technology program of study prepares graduates who have a foundation in the performance of basic diagnostic imaging procedures. Graduates are prepared to practice entry-level diagnostic imaging procedures in a variety of settings and to develop as professionals in the various fields of medical imaging.

Philosophy
The Radiologic Technology program fosters learning by providing an environment that is intellectually stimulating, as well as caring, and where excellence is the hallmark. To this end, faculty and staff serve as professional role models and provide resources and services which assist students in achieving their personal and professional goals.

We believe that the professional education of the student in radiologic technology is dynamic and evolving, impacted by current and future trends in the environment, healthcare system and the economy. Therefore, we provide a variety of experiences in multiple settings and opportunities for service and leadership.

We believe in developing the whole person through the integration of concepts and values derived from general studies. The general studies component, along with the professional curriculum, fosters the student’s ability to think analytically and creatively, communicate effectively and integrate knowledge from the arts and sciences. The integration of general and professional studies promotes lifelong learning and contributes to the development of persons who are caring, competent healthcare practitioners who serve their profession and the community.

We believe that professional practice is based on demonstrated knowledge, skills and attitudes, as well as ethical, legal and professional standards. Our graduates are prepared to develop as professionals in the field of radiologic science.

Mission, Goals and Expected Student Outcomes

Goal 1: Students will become clinically competent.
Student Learning Outcomes:
• SLO 1: Students will demonstrate quality patient care.
• SLO 2: Students will demonstrate knowledge of radiographic positioning and techniques.
• SLO 3: Students will practice radiation protection and safety for the patient, self and others.
• SLO 4: Students will manipulate all radiographic equipment with ease.
• SLO 5: Students will execute all transporting methods without assistance.

Goal 2: Students will develop effective written and oral communication skills.
Student Learning Outcomes:
• SLO 1: Students will demonstrate effective written and oral communication skills in clinical performance.
• SLO 2: Students will demonstrate effective written and oral communication skills in didactic performance.
• SLO 3: Students will demonstrate progression in achieving information literacy skills during the program.

Goal 3: Students will develop critical thinking skills.
Student Learning Outcomes:
• SLO 1: Students can adjust exposure factors and vary positioning techniques for a variety of patient conditions to maintain radiographic quality.
• SLO 2: Students will show evidence of participation in community and professional development activities that promote lifelong learning.

Goal 4: Students will demonstrate a commitment to professional behaviors.
Student Learning Outcomes:
• SLO 1: Students will demonstrate sound professional behaviors through development of interpersonal skills and relationships in the medical environment.
• SLO 2: Students will show evidence of participation in community and professional development activities that promote lifelong learning.

</tbody>
</table>
Clinical Facilities
The following are the major clinical facilities for the program:
- Atrium Health Carolinas Medical Center (CMC)
- Atrium Health University City
- Atrium Health Myers Park
- Atrium Health Mercy
- Atrium Health Pineville
- Atrium Health Steele Creek
Other sites are added as appropriate.

Clinical/Lab Attendance
Clinical/lab experiences are provided each semester to allow students the opportunity to correlate theory with the actual performance of radiologic imaging procedures. Students are expected to attend all scheduled assignments and are required to attend a minimum number of clinical and lab each semester as specified in the syllabus. The clinical coordinator or course faculty may make exceptions in extreme circumstances.

Clinical Assignments/Preparation
The clinical schedule/rotation is posted for each course. Specific assignments to clinical areas/sites are made to provide the student with a variety of experiences in a variety of settings. Students receive a clinical notebook prior to each course with specific guidelines outlining the clinical requirements and objectives for the semester. Students are expected to prepare for clinical assignments. Students are responsible for maintaining proficiency in all imaging procedures and clinical skills previously taught. Periodic evaluation by the clinical instructor will ensure the student is maintaining the necessary clinical skills. A student who does not maintain clinical competency may be removed from the clinical environment and receive an unsatisfactory clinical rating. Clinical/didactic assignments may be scheduled Monday through Friday between the hours of 7 a.m. and 7 p.m.

Competency Evaluation/Skills
For the student to be successful in the clinical setting, competency evaluation is required for specific imaging procedures and skills. There are core clinical competencies that all students must demonstrate to establish eligibility for graduation and American Registry of Radiologic Technologists (ARRT) certification.

Competency/skills requirements are identified in the clinical notebook. Students must demonstrate competence in all 36 mandatory radiologic procedures and 15 of the 35 elective procedures. All procedures should be performed on patients, but only a total of 10 imaging procedures may be simulated. The ARRT has identified the imaging procedures eligible for simulation. Students must be CPR certified and demonstrate competency in general patient care activities. All competency demonstrations, patient care skills and clinical education will be performed under the direct supervision of a registered radiologic technologist. To ensure that each student is actively participating in radiographic examinations and obtaining educational experience beyond the core competencies, the student is required to obtain a minimum number of competencies each semester to receive a satisfactory clinical score.

The following student behaviors are necessary to be considered competent in an imaging procedure or skill:
- Clearly demonstrate an understanding of the principles and rationale for performing the radiologic imaging procedure or skill.
- Competently demonstrate how the radiologic imaging procedure or skill is performed within a specified time frame.
- While performing the radiologic imaging procedure or skill, identify patient care responsibilities such as communication, safety and legal and ethical issues.
- Clearly demonstrate radiation safety principles in all assigned tasks and rotations.

Clinical Evaluation
Clinical conferences are scheduled periodically throughout the semester. The purpose of the conference is to assist the student in synthesizing information presented in lecture, lab and clinical. Self-evaluation by the student is required. A Clinical Rotation Summary form is a tool used by the faculty and student to appraise the student's performance. Each student will receive feedback, verbally and in writing throughout the semester. The clinical conference serves as a means for documenting strengths, weaknesses and progress of the student in meeting the clinical requirements and objectives.

If the student is having difficulty or is unsatisfactory at any time, the faculty member and the student will develop an action plan. The action plan constitutes a contract for improvement. By the end of the course, each student must achieve a satisfactory in the clinical component in order to progress. Satisfactory is defined as consistently demonstrating the identified behaviors in all components of the objectives. Following the evaluation conference, the clinical summary form is signed by the student and faculty member. Signature of the student indicates that
Supervision During Clinical Assignments

All medical imaging procedures will be performed under the direct supervision of a qualified/registered radiographer until the student has achieved competency. Direct supervision means that a qualified/registered radiographer:

- Reviews the procedure in relation to the student’s achievement.
- Evaluates the condition of the patient in relation to the student’s knowledge.
- Is present during the conduct of the procedure.
- Reviews and approves the procedure.

Medical imaging procedures are performed under indirect supervision after a student has demonstrated competency. Indirect supervision means that supervision is provided by a qualified/registered radiographer immediately available to assist the student regardless of the level of student achievement. "Immediately available" is interpreted as the presence of a qualified/registered radiographer adjacent to the room or location where a radiologic procedure is being performed. This availability applies to all areas where ionizing radiation equipment is in use.

The student-to-radiographer ratio must be 1-to-1. A staff radiographer may not supervise more than one student during any imaging procedure. It is acceptable for more than one student to be temporarily assigned to a registered staff radiographer during the performance of uncommon procedures such as (but not limited to) TMJ’s, Mastoids, etc.

Level I and Level II students will be directly supervised for all bedside radiography and all radiographic procedures performed in a surgical environment (OR) regardless of the skill/competency level of the student.

Repeat Radiographs

Students in the Radiologic Technology program are required to abide by all radiation safety rules, regulations and precautions. It is imperative that all efforts should be made to avoid repeat radiographs. The goal of all radiography students under the supervision of registered radiographers is to obtain a high-quality diagnostic image with as low a radiation dose to the patient as possible. This is in keeping with the ALARA Principle of As Low As Reasonably Achievable.

Unsatisfactory radiographs may only be repeated in the presence of a qualified/registered radiographer regardless of the student’s competency achievement. A student who repeats an unsatisfactory radiograph other than in the presence of a qualified/registered radiographer will be given a written reprimand and be required to meet with the school faculty to determine further action(s).

The program faculty will provide quarterly dosimetry radiation badge reports to each student. Students are required to review the quarterly monitoring report and acknowledge receipt by signing the appropriate form.

Radiation Safety

Maximum radiation protection will be provided to each radiology student according to the clinical agency’s radiation safety policies. This will include a radiation monitoring badge, class and lab education sessions, direct supervision in clinical rotations, clinical site orientations and additional measures stated in the radiation safety policies. All students are required to wear radiation monitors for clinical and laboratory assignments.

Student Pregnancy Policy

If a student becomes pregnant while enrolled in the program, they should note that declarations of pregnancy:

- Are voluntary and optional.
- Must be made in writing when disclosed.
- Will be kept in strict confidence.
- May be withdrawn in writing at any time without explanation.

If notice of voluntary disclosure of a potential pregnancy is presented to the program, the program chair will immediately arrange a counseling session with the Atrium Health radiation safety officer for:

- Discussion of the Nuclear Regulatory Commission’s (NRC’s) regulations on radiation protection.
- Discussion of the North Carolina Regulations for Protection Against Radiation as adopted by the North Carolina Radiation Protection Commission (NCRPC).
- Review of the student’s cumulative radiation monitoring report.
- Review of As Low As Reasonably Achievable (ALARA) Principles with emphasis on radiation-control procedures.
- Provision of a second radiation monitor to be positioned at waist level and under any protective lead apron to specifically monitor exposure to the fetus/embryo.

The student will be required to read and sign a form attesting to the fact that the aforementioned information has been provided, that she has been given the opportunity to ask questions and provide input into the counseling session and that she understands the level of risk associated with her clinical education.

Following the counseling session with the Atrium Health radiation safety officer the student may elect to continue in the course without modifications to clinical education or apply for a Withdrawal/Leave of Absence (W/LOA) from the program with re-entry as listed in the catalog/student handbook. Students who satisfy all requirements of the Withdrawal/Leave of Absence Policy are guaranteed re-entry into the program when factors indicating readiness to return have been met. All information regarding a student’s declared pregnancy will be held in strict confidence.

Grading Policy

Unless otherwise specified in a course syllabus, the conversion of numeric to letter grades will be as follows:

- A: 94 – 100
- B: 87 – 93
- C: 80 – 86
- D: 73 – 79
- F: Below 73

Certification

Students earning the Associate in Applied Science degree in radiologic technology are eligible to take the certification examination administered by the American Registry of Radiologic Technologists (ARRT).

Awards and Recognition

In addition to other awards given by the college, the Highest Scholastic Achievement in Radiologic Technology Award is presented to the student who has earned the highest overall GPA in program-specific courses. Additionally, the Spirit of Excellence for Radiologic Technology award is presented to the student who best represents esprit de corps, clinical skills, patient care, professionalism and the core values of Carolinas College.
Bachelor of Science in Medical Imaging

Program Mission and Overview
In support of the college mission, the Bachelor of Science in Medical Imaging (BSMI) program endeavors to build upon previous academic and career experiences for the purpose of educating, engaging, and empowering graduates to succeed in a diverse and changing healthcare environment.

The Bachelor of Medical Imaging program is designed to prepare graduates for an evolving healthcare environment and to provide a foundation for advancement in healthcare. Graduates will develop the knowledge and skills needed to expand scope of practice and become effective leaders across the healthcare spectrum. Emphasis is placed upon interprofessional communication, collaborative decision making, and professional values of servant leadership.

Student Learning Outcomes
Consistent with the mission of Carolinas College, the BSMI program will provide the health care community with graduates that can:

- Communicate effectively
- Contribute to interdisciplinary decision making
- Employ leadership skills

Curriculum
The BSMI degree is a 120-credit hour program designed to include content focused on the evolving healthcare environment and utilize lower-level coursework completed at the associate degree or diploma level as the foundation of the baccalaureate program. The degree consists of 44 credits awarded for current certification (one modality), Forty-six (46) hours of (100-200 level) general education credits, and thirty (30) hours of (300-400) level major course credits. Six (6) of the major course credits will be initially offered as a clinical option. Students will be advised to schedule clinical option courses at the end of their program of study.

BSMI Degree Requirement TOTAL | 120 |
Diagnostic and Imaging Sciences: Non-Degree Course Offerings

The Radiologic Technology program provides innovative non-degree training for imaging healthcare professionals. Courses are offered with clinically relevant skills and practical applications to enhance the care of patients. Participants can gain hands-on experience to prepare them for entry into a diagnostic imaging professions career, prepare for certification examinations and enhance their skill set for advancement.

Computed Tomography

The Computed Tomography (CT) classes are designed to advance knowledge and skill with the modality of computed tomography. With both online didactic and practicum experiences, students are introduced to advanced CT procedures. Classes are designed for the radiographer, nuclear medicine technologist and radiation therapy technologist.

Student Learning Outcomes

Upon completion, the CT technologist will demonstrate the following entry-level competencies:

- Demonstrate a thorough understanding of the fundamentals, equipment and instrumentation used in CT.
- Differentiate between the various types of data acquisition, image processing and reconstruction techniques and select the most appropriate type per examination.
- Identify and perform initial procedural steps prior to the beginning of each examination.
- Discuss and assess patient safety needs specific to CT including medicine reconciliation, allergy history, lab results, and contrast injection procedures.
- Demonstrate ability to distinguish between and perform basic CT procedures for specific areas of the body.
- Differentiate between and discuss additional applications useful within the CT modality.
- Differentiate how technologist and equipment-specific tools are utilized to improve CT image quality.
- Produce quality CT images and critique the overall quality of the examination.
- Articulate and evaluate the specific radiation safety knowledge required of a CT Technologist.
- Implement specific radiation safety requirement of a CT Technologist to minimize patient dose.

Program Format

All courses associated with the degree completion, with the exception of clinical course options, will be offered on-line. The college currently has affiliation agreements with Atrium Health to accommodate clinical education requirements.

Online Attendance and Participation

Students are expected to login to courses four or more times weekly to read announcements, obtain course updates, and participate in learning activities for the week. It may be necessary to login more often to complete assignments and communicate with peers and faculty. Students may find it helpful to make a calendar or checklist to organize study routines. Unsatisfactory attendance may be considered adequate reason by the course faculty to request the student to withdraw from the course.

Course-related communication with faculty and class members is considered professional communication. Courses with required online discussions may have rules pertaining to participation and academic rigor.

To be successful in this fully online program, students are expected to be able to:

- Create and edit documents using Microsoft Word, Excel and PowerPoint.
- Send and receive email messages with file attachments.
- Navigate the internet and use search engines.
- Upload and download files from the learning management system (Moodle/Canvas) and other sites as directed by course instructor(s).
- Learn additional technical skills following instructions provided by course instructor(s)

Progression

Students must complete 40 of the 46 required (100-200 level) general education credits prior to enrollment in (300-400) level degree courses. All students must complete a minimum of thirty (30) credit hours at Carolinas College to meet degree requirements.

Grading Policy

The conversion of numeric letter grades will be as follows:

- A: 90 – 100
- B: 80 – 89
- C: 70 – 79
- D: 60 – 69
- F: Below 60

Registry maintenance

Students needs to maintain current registry status while enrolled in the program. A student whose registry status is not current must immediately contact his or her faculty of record and the program chair.
• Produce quality images of sagittal, coronal, and axial planes as we identify cross-sectional anatomy of the head, neck, chest, abdomen, and pelvis.
• Examine CT images for pathology and discuss disease pathways commonly visualized.
• Utilize pathology and cross-sectional knowledge to identify areas of concern for notifying the Radiologist in a timely manner.

Courses Credits
CTT 101 Computed Tomography I 3
CTT 102 Computed Tomography II 3
TOTAL 6

Clinical Practicum Locations
• Atrium Health Carolinas Medical Center (CMC)
• Atrium Health Mercy, a facility of Carolinas Medical Center
• Atrium Health Pineville
• Atrium Health Steele Creek
• Atrium Health University

Supervision During Clinical Assignments
All medical imaging procedures will be performed under the supervision of a qualified/registered CT technologist.

Grading
Unless otherwise specified in a course syllabus, the conversion of numeric to letter grades will be as follows:

A: 94 – 100
B: 87 – 93
C: 80 – 86
D: 73 – 79
F: Below 73

Attendance
Time missed must be made up within the designated duration and hours of the course. Notification of absences is mandatory, and the program coordinator must be notified at least 30-minutes in advance of an absence. It is the student's responsibility to contact the program coordinator and arrange for make-up materials/schedule upon return to the facility.

Tardies are counted as missed clinical time.

Certification
Students successfully completing both CTT 101 and CTT 102 are eligible to take the Computed Tomography certification examination administered by the American Registry of Radiologic Technologists (ARRT).

Mammography
Mammography classes are designed for the American Registry of Radiologic Technologists-registered (ARRT) radiologic technologist to advance their knowledge and skill within the modality of mammography. The mammography classes include both a theory class and practicum class. The didactic component of the theory class focuses on the fundamentals of mammography, breast imaging equipment and techniques for image quality. Breast anatomy, pathologies and strategies for communicating with patients are also part of the curriculum. In the practicum class, clinical emphasis will continue to develop and demonstrate competency in the performance of mammography procedures and patient care skills. Patient safety concerns are addressed throughout the class as it relates to radiation safety and an overall emphasis on patient care.

Student Learning Outcomes
Upon completion, the mammographer will demonstrate the following entry-level competencies:

• Demonstrate patient care skills.
• Understand the American Cancer Society (ACS) guidelines for screening mammography, patient dosage, and the possibility for additional projections and/or other breast imaging procedures with the patient.
• Practice universal precautions and radiation safety.
• Document patient clinical history relevant to the performance and interpretation of the mammography exam.
• Evaluate images for diagnostic quality.
• Identify and label the anatomical structures of the breast.
• Compare breast anatomical structures to mammographic anatomical structures.
• Identify and label breast anatomical structures on a mammographic image
• Describe breast augmentation and identify the types of breast implants, the common implant locations, and the anatomical changes to the augmented breast.
• Describe the anomalies of development that can occur in the breast.
• Recognize clinical breast changes.
• List the physical changes of the breast related to pathology.
• List the mammographic changes of the breast related to pathology and identify the common mammographic appearance of breast pathology.
• Perform screening and/or diagnostic mammograms on both full field digital and digital breast tomosynthesis (3D) mammography equipment.
• Perform mammograms by positioning the patient and equipment according to department protocol or requisition.
• Select equipment appropriate to the patient and the examination to be performed.
• Select and record exposure factors based upon breast tissue density, patient’s age, numerical compression scale and equipment characteristics.
• Evaluate images for diagnostic quality.
• Perform quality assurance tests required by the ACR for all digital mammography equipment.
• Observe, assist with, or participate in specialty exams (augmented breasts/interventional/special procedures)
• Review mammography exams with a radiologist.

Clinical Practicum Locations

Charlotte Radiology breast imaging facilities

Supervision During Clinical Assignments

All medical imaging procedures will be performed under the supervision of a qualified/registered mammographer.

Grading

Unless otherwise specified in a course syllabus, the conversion of numeric to letter grades will be as follows:

- A: 94 – 100
- B: 87 – 93
- C: 80 – 86
- D: 73 – 79
- F: Below 73

Attendance

Time missed must be made up within the designated duration and hours of the course. Notification of absences is mandatory, and the program coordinator must be notified at least 30-minutes in advance of an absence. It is the student’s responsibility to contact the program coordinator and arrange for make-up materials/schedule upon return to the facility.

Tardies are counted as missed clinical time.

Certification

Students successfully completing both MAM 101 and MAM 102 are eligible to take the Mammography certification examination administered by the American Registry of Radiologic Technologists (ARRT).

General Studies

General Studies courses that comprise the associate of science in General Studies program are offered to enhance the undergraduate learning experience and help students develop competencies in communication, critical thinking and problem solving, and content application, which provide a foundation of knowledge and academic skills that will prepare a student for further study or careers in the life sciences or healthcare professions.

Several curriculum pathways are offered once a student is enrolled in the associate of science in General Studies program, provided students meet the basic admission requirements for their selected pathway. Students have until the completion of their first semester in the program to select their specific pathway unless they remain enrolled as a non-degree seeking student.

Student Outcomes

The General Studies courses at Carolinas College are unique in many ways, but one commonality is that all emphasize particular goals, objectives and outcomes. Specific courses articulate individual objectives, but all General Studies courses emphasize at least one of the learning goals below. After completing the General Studies courses at Carolinas College, students will demonstrate the ability to:

- Communicate effectively.
- Understand the fundamental concepts and applications of the natural sciences.
- Analyze and understand the influence of different environmental, social and cultural contexts in shaping human thought and behavior.
- Think critically, apply abstract concepts and draw conclusions from course concepts.
- Exhibit awareness in the areas of integrity, ethical reasoning and/or cultural diversity.
- Work with others to effectively reach a goal.
Grading Policy
The associate of science program uses the following numerical grade ranges for the final letter grade of each course:

A: 90 – 100
B: 80 – 89
C: 70 – 79
D: 60 – 69
F: Below 60 (Failing)

Awards and Recognition
In addition to other awards given by the college, the Excellence in General Studies award will be given to a graduating student who exhibits commendable performance related to at least one of the six student outcomes.

Associate of Science in General Studies
This degree will be awarded to students who successfully complete 60 semester credit hours of coursework. This program provides students with a basic understanding of the biological sciences and an opportunity to integrate liberal arts with healthcare education. The healthcare programs at Carolinas College have a competitive admission process. Students who are not accepted upon their first application to the program of choice have the opportunity to take college-level coursework while enrolled in the associate of science general studies program, enabling them to complete courses, which would later transfer when admission to a clinical program has been obtained. Students entering the AS program may modify their course sequence to best prepare them for a particular program in anticipation of a change of program or track. This program can also help students prepare for transfer into advanced programs at four-year institutions leading to degrees such as pre-medicine or pre-veterinary.

*An advisor will help determine the best sequence of courses for each student.

Curriculum Tracks and Pathways
Within the General Studies program, two curriculum tracks are offered: Pre-Nursing and Pre-Radiologic Technology. Students enrolled in these tracks will receive a conditional acceptance into either the Carolinas College Associate Degree Nursing (ADN) or Radiologic Technology program.

Students who receive conditional admission into the ADN program via the General Studies Pre-Nursing pathway must complete 14 credit hours at Carolinas College within two consecutive semesters and earn an overall GPA of 3.21. The 14 credit hours must be from the General Studies courses in the nursing master curriculum and must include BIO 168 and BIO 169 (eight credit hours). The additional six credit hours must be two General Studies courses within the nursing master curriculum, excluding NUR 100/HLC 102. The incoming student will identify...
the two additional courses after transfer credit has been awarded. The courses will be identified in advance of enrollment in a written agreement maintained in their permanent academic record and cannot be changed once classes begin. Only the first attempt in each course will be considered and once the criteria for full admission is met, the progression policy will apply. Students who earn the 3.21 GPA must complete all nursing pre-enrollment requirements and the Chemistry pre-requisite prior to starting the nursing curriculum. Students who do not earn admission may change to the General Studies track to complete the associate degree.

Pre-Nursing Pathway
The Pre-Nursing pathway is a 14-semester credit hour block of classes.

The coursework includes:

• Human Anatomy and Physiology I (BIO 168, 4 credit hours)
• Human Anatomy and Physiology II (BIO 169, 4 credit hours)
• General Education course (3 credit hours)
• General Education course (3 credit hours)

Students who receive conditional admission into the Radiologic Technology program via the General Studies Pre-Radiologic Technology pathway must complete 14 credit hours at Carolinas College within two consecutive semesters and earn an overall GPA of 3.21. The 14 credit hours must be from the general studies courses in the nursing master curriculum and must include BIO 168 and BIO 169 (eight credit hours). The additional six credit hours must be two general studies courses within the Radiologic Technology master curriculum, excluding HLC 102. The incoming student will identify the two additional courses after transfer credit has been awarded. The courses will be identified in advance of enrollment in a written agreement maintained in their permanent academic record and cannot be changed once classes begin. Only the first attempt in each course will be considered and once the criteria for full admission is met, the progression policy will apply. Students who earn the 3.21 GPA must complete all Radiologic Technology pre-enrollment requirements prior to starting the Radiologic Technology curriculum. Students who do not earn admission may change to the General Studies track to complete the associate degree.

Pre-Radiologic Technology Pathway
The Pre-Radiologic Technology pathway is a 14-semester credit hour block of classes.

The coursework includes:

• Human Anatomy and Physiology I (BIO 168, 4 credit hours)
• Human Anatomy and Physiology II (BIO 169, 4 credit hours)
• General Education course (3 credit hours)
• General Education course (3 credit hours)

Health Sciences: Healthcare Simulation

The Healthcare Simulation program prepares graduates for various roles in healthcare simulation including education, operations, research, assessment, and administration. The program is flexibly designed with multiple entry points, offering accelerated pathways into the job market through Bachelor of Science degree (Bachelor of Science in Health Sciences, Healthcare Simulation concentration) and certificate options (Healthcare Simulation certificate).

Program Mission
In support of the college mission and the mission of Carolinas Simulation Center, the Healthcare Simulation program prepares graduates with the psychomotor skills, cognitive knowledge, and affective attitudes necessary to function in various roles within a simulation center through excellence in simulation-based training and assessment.

Organizing Framework and Expected Student Outcomes
Consistent with the accreditation standards as outlined by the Society for Simulation in Healthcare (SSH), students who complete the Bachelor of Science in Health Sciences, Healthcare Simulation concentration or Healthcare Simulation Certificate will be able to:

1. Demonstrate a commitment to professional values and behaviors.
   • Students will be able to summarize various roles and responsibilities within simulation.
   • Students will demonstrate sound professional behaviors by following ethical principles in the simulation field.

2. Develop an operational knowledge of healthcare simulation principles.
   • Students will compare various types of simulation modalities and locations, and how they align with learner objectives.
   • Students will integrate simulation into education, research, patient safety, and clinical practice.

3. Apply educational principles to simulation.
   • Students will develop, implement, and evaluate innovative simulation curriculum.
   • Students will demonstrate simulation best practices related to feedback and debriefing.

4. Demonstrate basic operations of a simulation center.
   • Students will demonstrate design and operations of simulation activities.
   • Students will explain administrative responsibilities related to day-to-day operations of a simulation center (staffing, budget, policies, purchasing of supplies and equipment, and logistics).
Curricula
The Bachelor of Science in Health Sciences, Healthcare Simulation (BSHS-SIM) concentration’s 120-hour master curriculum is an innovative approach to simulation education prepares graduates with the psychomotor skills, cognitive knowledge, and affective attitudes necessary to function in technical, educational, or operational roles within a simulation center. The BSHS-SIM program includes:
- Forty-nine (49) credit hours of required general education courses,
- Thirty (30) credit hours of major area elective courses,
- Twenty-one (21) credit hours of interdisciplinary health and healthcare courses and,
- Twenty (20) credit hours of simulation courses.

Bachelor of Science in Health Sciences, Healthcare Simulation Concentration Master Curriculum:

Program Format

The Bachelor of Science in Health Sciences, Healthcare Simulation Concentration and Healthcare Simulation certificate will be offered in a hybrid format with didactic content offered online, laboratory practice offered face-to-face, and clinical education offered at Carolinas Simulation Center.

Teaching Methods – Examples may include: Multimedia lectures, readings, online discussions and activities, “check your knowledge” quizzes, scholarly writing exercises, collaborative projects and presentations, peer and instructor feedback.

- **Student-Content Interactions**
  - Examples may include: Students will engage with course content by completing weekly reading assignments, viewing weekly lectures and videos; completing quizzes and other online activities and participating in online small group discussions. Students will engage in formative assessments to guide learning and summative assessments to measure the mastery of learning standards and curriculum essentials.

- **Student-Instructor Interactions**
  - Examples may include: Students will watch the instructor’s lectures online and interact with the instructor through the class discussion board. Every week, the professor will provide feedback to students on completed learning activities and assignments in the multimedia format.

- **Student-Student Interactions**
  - Examples may include: Students will introduce themselves in the classroom. Throughout the course(s), students will be encouraged to ask questions about the course within a forum and students will have the opportunity to answer their peers’ question(s). Students will interact with their peers within team assignments.

Online Attendance and Participation

Students are expected to login to courses four or more times weekly to read announcements, obtain course updates, and participate in learning activities for the week. It may be necessary to login more often to complete assignments and communicate with peers and faculty. Students may find it helpful to make a calendar or checklist to organize study routines. Unatisfactory attendance may be considered adequate reason by the course faculty to request the student to withdraw from the course.

Course-related communication with faculty and class members is considered professional communication. Courses with required online discussions may have rules pertaining to active participation and academic rigor.

Refer to the Acceptable Use policy for more information about electronic communication and netiquette and minimum technology requirements.

To be successful in this fully online program, students are expected to be able to:

- Create and edit documents using Microsoft Word, Excel and PowerPoint.
- Send and receive email messages with file attachments.
- Navigate the internet and use search engines.
- Upload and download files from the learning management system (Moodle/Canvas) and other sites as directed by course instructor(s).
- Learn additional technical skills following instructions provided by course instructor(s).

Clinical/Lab Attendance

Clinical/lab experiences are provided in the spring and summer semesters to allow students the opportunity to correlate theory with the actual performance of healthcare procedures. Students are expected to attend all scheduled assignments and are required to attend a minimum number of hours of clinical and lab each semester as specified in the syllabus. The clinical coordinator or course faculty may make exceptions in extreme circumstances.

Notification of clinical absences or tardiness is mandatory. The clinical area or instructor must be notified by phone at least one-half hour in advance of an absence. Leaving prior to the end of clinical schedule or missing labs counts as absent time.

Grading Policy

The conversion of numeric letter grades will be as follows:

- **A**: 90 – 100
- **B**: 80 – 89
- **C**: 70 – 79
- **D**: 60 – 69
- **F**: Below 60 (Failing)
Nursing: Associate Degree Nursing

Program Mission and Overview
In support of the college mission, the Associate Degree Nursing (ADN) program prepares graduates to practice at entry level according to the core components as outlined by the National League for Nursing, in a variety of healthcare settings. The core components and competencies include: human flourishing, nursing judgment, professional identity and the spirit of inquiry. Additionally, the ADN program adheres to the core values adopted by Atrium Health of caring, commitment, integrity and teamwork.

Philosophy
We, the faculty, believe that:
Nursing is a caring profession that uses a holistic approach to promote optimal health for diverse individuals and their families and communities. A scientific process of assessment, planning, intervention and evaluation of outcomes is used to implement nursing care. Nursing is a scholarly profession with its own body of scientific knowledge supported and communicated through research and informatics. Nursing draws support from the liberal arts and life sciences to develop critical thinking and promote evidence-based practice.

Nursing is an art as well as a science. It is an interactive, interpersonal process which finds expression through actions intended to promote human flourishing. Caring represents a gift of self, based on sound nursing judgment and intuitive awareness of the patient’s needs. Nursing is founded on the belief that everyone deserves unconditional positive regard.

Nursing practice occurs in a variety of settings and is a collaborative, interprofessional process. Nurses assume a professional identity and practice within a professional code of ethics and established standards of care. A solid foundation of knowledge, skills and attitudes supports the delivery of safe, effective care to culturally diverse patients, groups and families. Nurses advocate for patients and their support systems. Nurses are accountable to themselves, the patient, the community and society.

Nursing education is a continuous lifelong process. We believe the learning process is facilitated when it progresses from simple to complex and concrete to abstract. Learning is goal-directed, building upon previous knowledge with concurrent application. Successful learners demonstrate a spirit of inquiry and challenge the status quo. Nursing education promotes information literacy, self-direction, problem-solving and accountability. Faculty and students are equal partners in the educational process based on trust, support, caring and respect.

The Carolinas College of Health Sciences ADN program prepares individuals to contribute to society and the profession of nursing while encouraging matriculation into baccalaureate nursing programs. The faculty recognizes that each student learns differently and accepts the challenge of creating a learning environment conducive to those individual needs. The faculty serves as educators, facilitators, mentors, consultants, role models and colleagues to students as well as the community.

Organizing Framework and Student Learning Outcomes
The philosophy of the ADN program faculty shapes the curriculum. The core components and competencies identified by the National League for Nursing are major elements of the curriculum’s organizing structure. The organizing framework contains the following core components and competencies:
- Human flourishing
- Nursing judgment
- Professional identity
- Spirit of inquiry

The program student learning outcomes for the ADN program align with the established organizing framework for the curriculum. Upon completion of the ADN program, graduates will be able to:
- Advocate for patients and families in ways that promote their self-determination, integrity, and ongoing growth as human beings.
- Make judgments in practice, substantiated with evidence, that integrate nursing science in the provision of safe, quality care, and promote the health of patients within a family and community context.
- Implement one’s role as a nurse in ways that reflect integrity, responsibility, ethical practices, and an evolving identity as a nurse committed to evidence-based practice, caring, advocacy, and safe, quality care for diverse patients within a family and community context.
- Examine the evidence that underlies clinical nursing practice to challenge the status quo, question underlying assumptions, and offer new insights to improve the quality of care for patients, families, and communities.

Curriculum

Clinical Activities and Facilities

Students are assigned to clinical groups to provide a variety of experiences, to provide consistency and to promote achievement of clinical student learning outcomes. Assignments may include evening and weekend hours and community settings. Students will be required to maintain current AHA BLS credentials as required by the college and current immunizations and health assessments as required by Teammate Health.

The following are the major clinical facilities for the ADN program:

- Atrium Health Carolinas Medical Center
- Atrium Health Behavioral Health (Charlotte & Davidson)
- Atrium Health Mercy, a facility of Carolinas Medical Center
- CMC-Myers Park
- Atrium Health Pineville
- Levine Cancer Institute
- Levine Children’s Hospital

Clinical/Lab Attendance

Clinical/lab/practicum experiences are provided each semester to allow students the opportunity to correlate theory with patient care. Students are expected to attend all laboratory and clinical experiences in order to satisfactorily achieve clinical student learning outcomes. Students may jeopardize their ability to successfully pass clinical if they are not present and on time for clinical experiences. Promptness and attendance are expected.

Students are expected to arrive in the clinical area at the designated time in full uniform. In order to be permitted to remain in the clinical area, the student must comply with the clinical dress code policy. Notification of clinical absences or tardiness is mandatory. The clinical area or instructor must be notified at least one hour in advance of an absence; leaving prior to the end of clinical schedule counts as absent time.

Students are expected to attend all laboratory and clinical experiences in order to satisfactorily achieve clinical student learning outcomes. Students may jeopardize their ability to successfully pass clinical if they are not present and on time for clinical experiences. Promptness and attendance are expected.

Students are expected to attend all laboratory and clinical experiences in order to satisfactorily achieve clinical student learning outcomes. Students may jeopardize their ability to successfully pass clinical if they are not present and on time for clinical experiences. Promptness and attendance are expected.

Students are expected to arrive in the clinical area at the designated time in full uniform. In order to be permitted to remain in the clinical area, the student must comply with the clinical dress code policy. Notification of clinical absences or tardiness is mandatory. The clinical area or instructor must be notified at least one hour in advance of an absence; leaving prior to the end of clinical schedule counts as absent time.

Clinical Activities and Facilities

Students are assigned to clinical groups to provide a variety of experiences, to provide consistency and to promote achievement of clinical student learning outcomes. Assignments may include evening and weekend hours and community settings. Students will be required to maintain current AHA BLS credentials as required by the college and current immunizations and health assessments as required by Teammate Health.

The following are the major clinical facilities for the ADN program:

- Atrium Health Carolinas Medical Center
- Atrium Health Behavioral Health (Charlotte & Davidson)
- Atrium Health Mercy, a facility of Carolinas Medical Center
- CMC-Myers Park
- Atrium Health Pineville
- Levine Cancer Institute
- Levine Children’s Hospital

Clinical/Lab Attendance

Clinical/lab/practicum experiences are provided each semester to allow students the opportunity to correlate theory with patient care. The clinical area or instructor must be notified at least one hour in advance of an absence; leaving prior to the end of clinical schedule counts as absent time.
Post-Test Analysis
The course faculty will review the statistical analysis of individual test items as well as other significant issues prior to posting test grades. Decisions to exclude or keep a test item are at the discretion of the course faculty.

Test Review
Test reviews will be conducted following unit tests upon request of the student. In the remote environment, concepts will be reviewed, and in the face-to-face environment, individual tests will be reviewed. Final exams will not be reviewed. After course grades are submitted in SONIS, there will be no further review of any tests by students.

Total Testing
The ADN program utilizes a total testing program to enhance the students’ educational process. The testing program is used to: decrease attrition rates, encourage critical-thinking and use of nursing process, increase performance on the NCLEX-RN and validate the nursing curriculum against national norms. The testing program provides numerous practice tests for students to utilize as review and in preparing for these tests. Students are required to take a Comprehensive Assessment Profile (CAP) test at the end of most courses. To successfully complete the CAP test requirement of a course the student will have one opportunity to take CAP test(s) associated with the course in which they are enrolled. Proficiency in the content will be determined by levels described in the syllabus and will comprise 5% of the course grade.

ADN Program Progression
Students who are unsuccessful in a nursing master curriculum course can progress in the program based on co-requisite requirements, space availability and faculty approval. Specific information is indicated below:

- A student who is unsuccessful in any nursing course may not progress in the nursing curriculum until that course is successfully repeated but may remain enrolled in General Studies courses. Students are required to successfully pass each nursing course in sequence prior to progressing.
- Nursing students who are unsuccessful in a general studies course may not progress if the course is a prerequisite for a course in the subsequent semester. General Studies courses are expected to be taken as prescribed in the nursing master curriculum plan. A student who transfers into the nursing program is ineligible for progression if they had been unsuccessful in a nursing course in their previous program.
- In all instances above the program chair will contact the student to discuss the process for requesting progression. The program chair will notify the student of his/her eligibility to progress and request completion of the Petition for Progression – Student Form. Completion of the Petition for Progression will require a success plan for improvement. Students that fail to submit the Petition for Progression Form by the established deadline will be automatically deferred to the next semester. Students who complete this form, and are offered a space in a course, may delay progression by no more than one nursing course. An additional voluntary waiver of progression results in program withdrawal. The nursing faculty and program chair will determine if the student is allowed to return to the next available class or if additional remedial time is needed prior to progressing.
- Students unsuccessful in two courses in the nursing master curriculum plan will be dismissed from the program with the option of applying for readmission. Two unsuccessful attempts of the same course will result in dismissal with no option to reapply.
- Any subsequent unsuccessful attempts after readmission will result in immediate dismissal with no option to reapply.
- Any skill that has been previously validated may require reevaluation before the student can return to the clinical setting. Additional remediation may be required for some skills.
- Students who have an outstanding financial obligation to the college will not be allowed to progress.
- The Progression policy does not apply to students who have been administratively dismissed.

Nurse Aide II Certification
Students successfully completing NUR 110 and NUR 120 and demonstrating successful verification of the listed skills may be eligible to apply to the NC Board of Nursing for listing as a Nurse Aide II. An application, program chair verification and fee must be submitted to the North Carolina Board of Nursing by the applicant.

Licensure
Students successfully completing the ADN program are eligible to apply for licensure as a registered nurse through individual state boards of nursing. Successful completion of the computer adaptive National Council Licensure Examination (NCLEX-RN) is a licensure requirement. Fees for taking the examination vary from state to state.

Awards and Recognition
In addition to other awards given by the college, nursing excellence awards are presented to graduating nursing students. These awards are presented to nursing graduates who exhibited commendable performance in clinical and best exemplified the core components of each nursing specialty practice. Nursing faculty select graduates for the following nursing excellence awards: Adult Health, Behavioral Health, Child-Adolescent, Maternal-Neonatal and Acute Clinical Concepts.
generalist continuously evaluates his or her lifelong learning goals to seek opportunities for growth, currency and professional development.

The faculty at Carolinas College guide, design and coordinate the BSN experience to successfully meet the needs of students by implementing integrative strategies for learning. Learners have a varied set of cognitive, psychological, social and cultural characteristics that require faculty to meet diverse learning needs and styles. Learning and education objectives are focused on the professional practice and roles of the baccalaureate generalist nurse.

Organizing Framework and Student Learning Outcomes

The RN-BSN program curriculum is framed from the Essentials of Baccalaureate Education for Professional Practice developed by the American Association of Colleges of Nursing (AACN, 2008). The student learning outcomes (SLOs) for the RN-BSN program at Carolinas College aligns with this established AACN framework for the curriculum. Upon completion of the RN-BSN program, graduates will be able to:

- Integrate concepts from arts and sciences into professional nursing practice.
- Utilize knowledge of organizational systems leadership in the delivery of safe, quality care.
- Demonstrate use of evidence-based practice in the provision of clinically competent care.
- Implement knowledge of technology for clinical decision making in quality care delivery.
- Examine principles and policies related to system financial and regulatory constraints in the provision of care.
- Demonstrate the use of interprofessional communication and collaboration to enhance quality patient outcomes.
- Develop interventions for health promotion and disease prevention to people and diverse populations.
- Integrate professional values in the provision of ethical, culturally competent, non-judgmental care.
- Translate and apply knowledge of nursing concepts and evolving competence to patient populations in complex, diverse healthcare environments.

Curriculum

The RN-BSN degree is a 120-credit hour program designed to include content focused on the evolving healthcare environment and utilize lower-level coursework completed at the associate degree or diploma level as the foundation of the baccalaureate program. The RN-BSN program includes:

1. Thirty-seven (37) credit hours of designated NUR core content validated and awarded based upon RN licensure,
2. Thirty-three (33) credit hours of lower-level general education courses,
3. Eighteen (18) credit hours of upper-level general education courses, and
4. Thirty-two (32) credit hours of upper-level nursing (NUR) or health science (HLC) courses.

Please note that NUR 301 is the mandatory opening course of the RN-BSN curriculum and NUR 450 is the culminating course and must be taken at the end. All other coursework can be taken in any sequence based on availability and the individual student’s program of study.

**Program Format**

The RN-BSN program includes content focused on the evolving healthcare environment. The 100% online program with 7-week courses is designed in an accessible and accelerated format to accommodate student flexibility. Most students can complete the program within 18 months. Certain RN-BSN courses are open to health science students with specialties outside of nursing. Therefore, nursing students have the unique opportunity for interprofessional experiences through student-to-student course activities.

**Teaching Methods** - Examples may include: Multimedia lectures, readings, online discussions and activities, “check your knowledge” quizzes, scholarly writing exercises, collaborative projects and presentations, peer and instructor feedback.

- **Student-Content Interactions**
  - Examples may include: Students will engage with course content by completing weekly reading assignments, viewing weekly lectures and videos, completing quizzes and other online activities and participating in online small group discussions. Students will engage in formative assessments to guide learning and summative assessments to measure the mastery of learning standards and curriculum essentials.

- **Student-Instructor Interactions**
  - Examples may include: Students will watch the instructor’s lectures online and will interact with the instructor through the class discussion board. Every week, the professor will provide feedback to students on completed learning activities and assignments in the multimedia format.

- **Student-Student Interactions**
  - Examples may include: Students will introduce themselves in the classroom. Throughout the course(s), students will be encouraged to ask questions about the course within a forum and students will have the opportunity to and answer their peers’ question(s). Students will interact with their peers within team assignments.

**Online Attendance and Participation**

Students are expected to login to courses four or more times weekly to read announcements, obtain course updates, and participate in learning activities for the week. It may be necessary to login more often to complete assignments and communicate with peers and faculty. Students may find it helpful to make a calendar or checklist to organize study routines. Unsatisfactory attendance may be considered adequate reason by the course faculty to request the student to withdraw from the course.

Course-related communication with faculty and class members is considered professional communication. Courses with required online discussions may have rules pertaining to participation and academic rigor.

Refer to the Acceptable Use policy for more information about electronic communication and netiquette and minimum technology requirements.

To be successful in this fully online program, students are expected to be able to:

- Create and edit documents using Microsoft Word, Excel and PowerPoint.
- Send and receive email messages with file attachments.
- Navigate the internet and use search engines.
- Upload and download files from the learning management system (Moodle/Canvas) and other sites as directed by course instructor(s).
- Learn additional technical skills following instructions provided by course instructor(s).
Clinical Activities & Assignments
Two courses (NUR 340, NUR 450) are facilitated online with didactic and include immersive learning experiences that include service-learning, virtual simulation, and/or a capstone project. Virtual simulation is utilized for experiences, such as natural or man-made disasters, that are not available outside the simulation environment. Students spend time completing their service-learning immersive experience to provide needed resources and services within their community. The capstone project is developed, implemented in a practice setting, and evaluated within the culmination course.

Grading Policy
The conversion of numeric letter grades will be as follows:
- A: 90 - 100
- B: 80 - 89
- C: 75 - 79
- D: 70 - 74
- F: 69 & below

Licensure
Students need to maintain a current unencumbered registered nurse license in their state of residency while enrolled in the program. A student whose license becomes encumbered or is not current must immediately contact his or her faculty of record and the program chair.

Awards and Recognition
In addition to other awards given by the college, the RN-BSN program presents two awards to graduating students. The Scholarly Writing Award is presented to the student who has demonstrated excellent writing skills and critical thinking, while using evidence to support written content. The Leadership Distinction Award is presented to the student who has consistently been recognized by peers, faculty, and/or organizations as an excellent leader and teammate.

Nursing: Non-Credit Course Offerings

Nurse Aide I
This 150-hour, non-credit course culminates in eligibility to sit for testing to be listed as a Nurse Aide I in North Carolina. The program is approved by the North Carolina Department of Health and Human Services/Division of Health Service Regulation (DHHS/DHSR). This training is open to the public and is separate from the college’s nursing programs. Students in this program take NUR 010.

The course of instruction provides the theoretical and practical knowledge and training required for graduates to be competent practitioners as nurse aides. CPR certification is a component of the curriculum for this course. Clinical experiences are provided in the nursing home and/or rehabilitative setting. Didactic instruction may occur in either the online environment using the Information Portal or face to face in the classroom and in simulated labs.

Clinical Aide I curriculum meets or exceeds the standards of the Division of Health Service Regulation (DHSSR) for listing on the Nurse Aide Registry.

Student Learning Outcomes
At the completion of the Nurse Aide I course, students will:
1. Demonstrate respect for the dignity and worth of patients while providing age and developmentally appropriate care.
2. Communicate effectively in both oral and written form with members of the healthcare team.
3. Demonstrate satisfactory performance of NA I skills related to hygiene, safety, nutrition, exercise, elimination, mobility, and aging.
4. Employ principles of safety when providing patient care.
5. Identify the role of the Nurse Aide I as a member of the healthcare team.

Attendance
Classroom, lab, and clinical attendance is required. Satisfactory completion of NA I requires students to attend all 150 hours of the program. A student may be absent for no more than 5.5 hours. All missed classroom content, laboratory, and clinical experiences must be made up for the student to successfully complete the Nurse Aide I program. If any time is missed in the skills lab or clinical the student must contact their NA I faculty member to schedule make-up time. If the requirement for attendance is not met, the student will receive an unsatisfactory for the course and not pass the program. All absences will be recorded and include the date, content missed, and date content was made up. Exceptions to this policy will be at the discretion of the coordinator of the NA I Program.
Grading

Grading for the Nurse Aide I course will be Pass/Fail. Numerical range for program grades:

- **P**: 80 - 100
- **F**: 79 & below

All students must have a course grade average equal to at least 80% for the didactic section and demonstrate skill proficiency for all required skills in the simulated lab setting and clinical setting and achieve a satisfactory rating on the final clinical evaluation tool. Students will be evaluated periodically during the course and an action plan will be developed as necessary to ensure student success.

Certificate of Completion

Graduates of the program will receive a Nurse Aide I certificate and are eligible to take the Pearson Vue National Nursing Assistant Assessment Program (NNAAP) Examination which includes a written exam and skills competency testing for listing on the NA I Registry.

Course Descriptions

This section reflects all courses expected to be offered by Carolinas College of Health Sciences during the 2021-2022 academic year. Please refer to your specific program’s curriculum sheet and the college’s registration bulletin for course offerings by term.

**BIO 130: Introduction to Neuroscience**

Credits: 3 (3 Class) This course provides an overview of the human nervous system with an emphasis on the structure and function of the brain. Topics include anatomy of the nervous system, the physical and chemical bases of action potentials and synaptic transmission, sensory processing, motor pathways and higher brain functions dealing with memory, language and brain disorders. Prerequisite: One unit of high school biology.

**BIO 168: Human Anatomy and Physiology I**

Credits: 4 (3 Class, 1 Lab) A study of the structure and function of the human body approached from a cellular and system level. Cells, tissues, integument, skeletal system, muscular system, nervous system and special senses are included. This general studies class fulfills a natural sciences/mathematics requirement for students enrolled in a degree program. Prerequisite: One unit of high school biology.

**BIO 169: Human Anatomy and Physiology II**

Credits: 4 (3 Class, 1 Lab) A continuation of BIO 101. The endocrine, cardiovascular, lymphatic/immune, respiratory, digestive, urinary and reproductive systems are included, as well as metabolism and fluid and electrolyte balance. This general studies class fulfills a natural sciences/mathematics requirement for students enrolled in a degree program. Prerequisite: BIO 101.

**BIO 200: Microbiology**

Credits: 4 (3 Class, 1 Lab) This course is a study of the basic physiology of bacteria and viruses with emphasis on the general biology of microbes, control of microorganisms, interaction of microbes and the human body, and diseases caused by microbes.

**CHM 104: General Chemistry I**

Credits: 4 (3 Class, 1 Lab) This course covers the fundamental principles and laws of chemistry. Topics include measurement, atomic and molecular structure, periodicity, chemical reactions, chemical bonding, stoichiometry, thermochemistry, gas laws and solutions. Offered summer only.

**COM 101: Communication**

Credits: 3 (3 Class) This course provides an overview of basic communication concepts to enhance skills to communicate in interpersonal, small group, intercultural, organizational, mass communication contexts. Offered fall only.

**CSA 310 Cross-sectional Anatomy**

This course will provide an introduction to advanced imaging methods and analysis. Students will learn to utilize a variety of imaging methods to improve patient assessment, reduce cost, and improve health outcomes. Emphasis will be placed upon anatomical identification, cross-modality correlation, data analysis, safety, and improved operational efficiencies.
ENG 235: Film as Literature  
Credits: 3 (Class) This course is a theory class designed for the ARRT registered Radiologic Technologist to advance their knowledge and skills within the modality of computed tomography. The course focuses on CT physics principles, CT equipment, CT-specific procedures, image acquisition, processing and reconstruction, image quality and cross-sectional anatomy. Potential safety concerns are addressed throughout the course as it relates to radiation safety, contrast issues and an overall emphasis on patient care. The class introduces students to advanced CT procedures, such as CT-guided biopsies, brain perfusions and CT cardiac studies. This course briefly discusses the future advancements of CT technology. Prerequisite: ARRT Registry. Corequisite: CTT 102

ENG 240: Research and Evaluation  
Credits: 3 (Class) This course provides the student with skills needed to review and evaluate research and effectively communicate data. Emphasis is placed on understanding research, such as library research, personal surveys, historical analysis, collections of bibliographies, quantitative and qualitative methods, as well as source credibility evaluation and APA formats. Prerequisite: ENG 101.

GEN 102: Leadership Development  
Credits: 3 (Class) This course is designed to provide students with the fundamental knowledge and skills required of effective leaders. Through experiential learning and interaction with peers, students analyze, discuss and write about leadership skills including communication, empowerment, conflict-resolution, change and decision-making. Topics of critical thinking, personal growth and interpersonal relationships are explored within the context of leadership development. This general studies class fulfills an elective requirement for students enrolled in a degree program.

HEA 109: Health and Wellness  
Credits: 3 (Class) This course will provide a general overview of the physical, social, emotional, spiritual and environmental dimensions of health and their applications to personal wellness.

HLC 310: Cultural Aspects of Health and Illness Credits: 3 (Class) This course focuses on the basic cultural and transcultural principles of diverse populations. Students will learn the cultural assessment of individuals and groups including the identification of health practices and healthcare disparities. Ethnic, religious, sociological, economic and political factors that influence health literacy, wellness management and health-seeking behavior will also be examined. 

HLC 320: Legal and Ethical Issues in Healthcare Credits: 3 (Class) This course explores legal and ethical issues in healthcare related to the complexities of medical conditions, current healthcare laws and practices, and determining responsibilities of patients, employers and employees. Included is a review of ethical theories and professional standards, as well as legal and ethical rights and responsibilities of patients and healthcare professionals. This course will expose students to a select group of contemporary legal and ethical issues faced by healthcare professionals to provide the student with the knowledge necessary to recognize legal and ethical problems.

HLC 330: Inter-Professional Collaboration and Problem-Solving  
Credits: 3 (Class) This course is aimed at the development of effective communication skills for the global workplace including professional behaviors, interpersonal relationships, management and strategies for collaboration, teamwork and conflict management. This course prepares the student for professional practice with critical-thinking and advanced problem-solving across the care continuum and allows students to identify the process for group collaboration for decision-making.

HLC 340: Transformational Leadership and Management  
Credits: 3 (Class) This course examines the roles, traits and contribution of the healthcare professional in leadership and managerial positions in any professional practice environment. This course will prepare students to understand organizational leadership, quality improvement, managing patient outcomes, culture of safety, change management and how to promote a practice work environment. The importance of leadership, complexity science, building relationships, people management, delegation, conflict resolution and inter-professional teams are key components covered in this course.

HLC 410: Research and Evidence-Based Practice  
Credits: 3 (Class) This course introduces computer applications for healthcare professionals, quantitative and qualitative research, novice to expert critical review and critique research. This course expands on theories related to practice research, collection and analysis of data, and interpretation of data. The healthcare professional student will also learn to identify levels of evidence and the process of research and practice change with evidence-based practice models.

HLC 420: Transformational Leadership and Management  
Credits: 3 (Class) This course examines the roles, traits and contribution of the healthcare professional in leadership and managerial positions in any professional practice environment. This course will prepare students to understand organizational leadership, quality improvement, managing patient outcomes, culture of safety, change management and how to promote a practice work environment. The importance of leadership, complexity science, building relationships, people management, delegation, conflict resolution and inter-professional teams are key components covered in this course.

HLC 430: Healthcare Policy and Regulation  
Credits: 3 (Class) This course will examine healthcare policy and regulatory environments from the perspective of local, state, national and global healthcare trends. The impact of policy issues, including healthcare costs, quality of services, financing of healthcare systems, scope of professional practice, workplace safety and how policy is affected by political compromise will also be evaluated. Students will learn basic elements of healthcare regulation, credentialing bodies, structure of organizations, influences of key policies on healthcare delivery, and the relation between the public and private sectors on health policy.

HTL 206: Professional Issues I  
Credit: 1 (1 Class) This course comprises units of study on professional development and educational methodologies. The unit on self-development introduces the importance of accreditation and certification along with a focus on developing professional ethics and participating in professional activities. The unit on educational methodologies includes a presentation of educational concepts concerning instructional techniques and terminology that can be utilized in an educational setting as well as to train providers of laboratory services. Prerequisite: Admission to the histotechnology program.
HTL 207: Professional Issues II
Credits: 2 (2 Class) This course comprises units of study on research design and management. The unit on research design introduces the fundamentals of research terminology, sampling, measurement, design, and analysis. The unit on management includes basic managerial principles, budget considerations, laboratory safety practices, and quality assurance systems and total quality management as applied to the pre-analytical, analytical, and post-analytical components of the laboratory environment. Prerequisite: Admission to the histotechnology program.

HTL 210: Basic Histotechniques
Credits: 9 (7 Class, 2 Lab) This course provides an introduction to histology laboratory operations and the principles of the routine histologic techniques of gross dissection, fixation, decalcification, tissue processing, embedding, microtomy, frozen sectioning and basic H & E staining. Emphasis is placed on histology laboratory organization, terminology, specimen accession, record keeping, instrumentation, laboratory safety and quality assurance. The topics of OSHA regulations, CAP requirements and Protected Patient Information are discussed. This course includes the applied laboratory techniques of dissection, fixation, decalcification, processing, embedding, microtomy, frozen sectioning, H&E staining and cytoprep. Prerequisite: Admission to the histotechnology program.

HTL 220: Advanced Histotechniques
Credits: 8 (6 Class, 2 Lab) This course encompasses histochemical principles and application of routine and special staining techniques of special staining, immunohistochemistry and enzyme immunohistochemistry, as well as laboratory mathematics utilized in the histopathology laboratory. The theories of staining and dyes along with the associated chemistry, muscle enzyme histochemistry, antibodies and immunohistochemical assays including enzyme pretreatment will be discussed. Use of the bright field microscope for identification of tissues and cells types, their structure and function and disease states of the various organ systems as it relates to routine and special staining will be emphasized. The course is designed to build on the cognitive and psychomotor skills learned in previous courses within the histotechnology program. Prerequisite: HTL 210

HTL 260: Histotechnique Practicum
Credits: 6 (4 Class, 2 Practicum) This is a clinical course that provides entry-level clinical experiences in the histopathology laboratory of Carolinas Medical Center. This course is designed to assist the student in refining skills and theory learned in previous courses in the histotechnology program along with understanding the daily workflow of a comprehensive histopathology laboratory. This unit includes classroom, online and clinical components with emphasis on preparing a quality microscopic slide for diagnosis. Clinical experiences include gross exam, accessioning, tissue processing, embedding, microtomy, special staining, immunohistochemistry, kidney/muscle cryotomy and case assembly. Included in this course is the opportunity to observe cytological preparatory techniques. Upon completion, the student will demonstrate proficiency as an entry-level histotechnologist and be prepared to take the American Society for Clinical Pathology Board of Certification exam at the HTL level. Prerequisites: HTL 201, HTL 220

IDS 301: Biopsychosocial Aspects of Aging
Credits: 3 (3 Class) This course will focus on understanding the physiological changes in the older adult, psychosocial aspects of aging, normal aging variants, promoting healthy aging and family and community challenges.

MAM 101: Mammography I
Credits: 3 (3 Class) This course is designed for the ARRT registered Radiologic Technologist to advance their knowledge and skill within the modality of mammography. The didactic component of the class focuses on the fundamentals of mammography, breast imaging equipment and techniques for image quality. Breast anatomy, pathologies and strategies for communicating with patients are also part of the curriculum.

MAM 102: Mammography II
Credits: 3 (3 Practicum) The mammography practicum is designed for the ARRT registered Radiologic Technologist to advance their knowledge and skill within the modality of mammography. Clinical emphasis will continue to develop and demonstrate competency in the performance of mammography procedures and patient care skills. Patient safety concerns are addressed throughout the course as it relates to radiation safety and an overall emphasis on patient care.

MAT 101: College Math
Credits: 3 (3 Class) A beginning college-level math course which includes the following topics: operations with signed numbers; addition, subtraction, multiplication and division with algebraic expressions; factoring; techniques for solving linear and fractional equations; an introduction to graphing, ratio and proportion, direct and inverse proportion, scientific notation; and unit conversion. This general studies class fulfills a natural sciences/mathematics requirement for students enrolled in a degree program.

MAT 201: Elementary Statistics
Credits: 3 (3 Class) An introductory course in concepts and methods of descriptive and inferential statistics, including data summarization, binomial and normal distributions, sampling, central limit theorem, confidence intervals, hypothesis testing and linear regression. Prerequisite: MAT 101 or equivalent.

MLS 410: Hematology/Coagulation/Clinical Microscopy
Credits: 7 (6 Class, 1 Lab) This course encompasses theoretical principles of routine blood counts and differentials, urinalysis (clinical microscopy) and cerebrospinal fluid/body fluid counts as well as coagulation profiles. Complex tests including bone marrow studies, cytochemical stains and special coagulation procedures in addition to learning experiences in cytogenetics, histology, cytology and-andrology laboratories are included as available. Analysis of blood, urine, spinal fluid, and other body fluids with manual procedures and state of the art instrumentation are part of the experience. Emphasis is placed on the clinical significance and interpretation of these analytes. Quality assurance, including quality control, is emphasized to ensure accuracy and validity of testing methods and patient results. His course incorporates the application of laboratory mathematical calculation concepts related to clinical chemistry. Pre-analytical, analytical, and post-analytical components are utilized to enhance problem solving and critical thinking skills. Prerequisite: Admission to the medical laboratory science program.

MLS 430: Clinical Microbiology
Credits: 9 (7 Class, 2 Lab) This course encompasses essential didactic and clinical instruction in theoretical principles of pathogenic parasites, bacteria, fungi and agents of bioterrorism. Emphasis is placed upon collection, handling and processing of patient specimens for the isolation, identification, antimicrobial susceptibility testing and medical significance of microorganisms involved in the infectious disease process in the healthcare and community environments. The clinical importance and relevance upon different patient populations, infections, diseases, treatment, and complications arising from various settings is assessed. Use of a bright field microscope and its importance in assessing specimen quality as well as departmental quality control and performance improvement. Principles and practices are a focus throughout the course to ensure the accuracy and reliability of laboratory information. To encourage and enhance critical thinking, pre-analytical, analytical, and post-analytical skills are developed and evaluated throughout the course. Prerequisite: Admission to the medical laboratory science program.

MLS 440: Clinical Chemistry
Credits: 8 (8 Class) This course involves the biochemical analysis of blood, urine, spinal fluid, and other body fluids with manual procedures and state of the art instrumentation. The clinical principles and practices are a focus throughout the course to ensure accuracy and validity of testing methods and patient results. His course incorporates the application of laboratory mathematical calculation concepts related to clinical chemistry. Pre-analytical, analytical, and post-analytical components are utilized to enhance problem solving and critical thinking skills. Prerequisite: Admission to the medical laboratory science program.
MLS 450: Clinical Immunology  
Credits: 4 (3 Class, 1 Practicum) This course encompasses the theoretical and practical aspects of the field of immunology and its application in the clinical laboratory. Areas of study focus on the theory of immunity, antibody production, and autoimmunity. Emphasis is placed on the application of testing methodology principles that guide physicians in diagnosing and monitoring immune disorders and infectious diseases. Pre-analytical, analytical, and post-analytical components of immunology are analyzed throughout the course to enhance critical thinking. Clinical experiences include rotations in the serology, molecular, flow cytometry, and histocompatibility laboratories. Prerequisite: Admission to the medical laboratory science program.

MLS 460: Professional Issues I  
Credit: 1 (1 Class) This course comprises units of study on professional development and educational methodologies. The unit on professional development emphasizes the integration of principles related to accreditation and certification into professional practice along with a focus on developing professional ethics and participating in professional activities. The unit on educational methodologies includes an application of theoretical concepts concerning instructional techniques and terminology that can be utilized in an educational setting as well as to train providers of laboratory services. Prerequisite: Admission to the medical laboratory science program.

MLS 461: Professional Issues II  
Credits: 2 (2 Class) This course comprises units of study on research design and management. The unit on research design emphasizes the fundamentals of research terminology, sampling, and measurement as well as the comparison of research design and analysis practices. The unit on management includes the preparation of managerial principles, budget considerations, laboratory safety practices, and quality assurance, quality improvement and total quality management as applied to the pre-analytical, analytical, and post-analytical components of the laboratory environment. Prerequisite: MLS 460.

MLS 462: Professional Issues III  
Credit: 1 (1 Class) This course comprises a unit of study on Phlebotomy. Phlebotomy prepares the student to properly perform blood collection on a variety of different patients with emphasis on professional behavior, safety, quality specimen collection, and customer service. Prerequisites: MLS 460 and MLS 461.

MLS 470: MLS Practicum  
Credits: 4 (4 Practicum) This course provides a hands-on clinical experience for students to actively engage in applied theory and practical knowledge through the performance of procedures studied in the previous didactic courses of hematology (MLS 410), immunohematology (MLS 420), microbiology (MLS 430), and chemistry (MLS 440). This course reinforces the ability to correlate clinical laboratory data with patient diagnosis and treatment. Utilizing a faculty-developed plan along with guidance of working laboratory preceptors, students continue developing clinical laboratory skills as well as expanding understanding of the profession and culture of a clinical laboratory. Prerequisites: MLS 410, MLS 420, MLS 430, and MLS 440.

NDT 101: Fundamentals of Neurodiagnostic Technology  
Credits: 8 (6 Class, 2 Lab) An introduction to neurodiagnostic technology based on national professional competencies, professional standards of practice and associated clinical theories. This course provides an overview of electroencephalography, including basic terminology, procedures, instrumentation, normal brain function, and patient safety and documentation. Includes simulated laboratory experiences focused on proper electrode placement and basic recording techniques. Co-requisite: NDT 102.

NDT 102: Neurodiagnostic Technology Clinical I  
Credits: 5 (5 Clinical) This course provides an opportunity for students to apply concepts and develop the skills needed to provide patient-centered care. Emphasis is placed on developing skills essential to patient care and assessment, effective communication and safe operations of recording instrumentation and equipment. Corequisite: NDT 101.

NDT 151: Applied Neurodiagnostic Technology  
Credits: 7 (5 Class, 2 Lab) This course builds upon fundamental concepts and focuses on more specific skills and patient populations. Emphasis will be placed on application of instrumentation and recording skills, abnormal brain wave patterns, artifacts identification and troubleshooting, lifespan EEG patterns (neonatal, pediatric, adult, geriatric), neurophysiology and common adult and pediatric neurological disorders and diseases. Prerequisite: NDT 101; Co-requisite: NDT 152.

NDT 152: Neurodiagnostic Technology Clinical II  
Credits: 5 (5 Clinical) This course is a continuation of Neurodiagnostic Technology Clinical I. Students are prepared to progress toward integration of fundamental and advanced concepts. Emphasis is placed on the continued development of technical skills used in testing patients in a variety of clinical settings. Prerequisite: NDT 102; Co-requisite: NDT 151.

NDT 201: Advanced Neurodiagnostic Techniques  
Credits: 7 (6 Class, 1 Lab) This course introduces more advanced techniques, including clinical evoked potentials, nerve conduction studies, polysomnography, long-term epilepsy monitoring and intraoperative monitoring. Emphasis will be placed on effective patient care, recording parameters, instrumentation and application of basic techniques. Prerequisites: NDT 151, NDT 152; Co-requisite: NDT 202.

NDT 202: Neurodiagnostic Practicum I  
Credits: 4 (4 Practicum) This course is a continuation of Neurodiagnostic Clinical II. Emphasis will be placed upon continued practice opportunities and competency demonstration in the delivery of more complex procedures, critical thinking and the successful integration of didactic and clinical components. Prerequisites: NDT 151, NDT 152; Corequisite: NDT 201.

NUR 010: Nurse Aide I  
This non-credit course is a hybrid didactic and lab/clinical course designed to provide the student with the knowledge and skills needed to provide basic nursing care in a structured healthcare setting under the supervision of a registered nurse. Emphasis is placed on person-centered care, the aging process, communication, safety/emergencies, infection prevention, legal and ethical issues, measurements, elimination, nutrition, basic restorative care, rehabilitation, dementia, mental health and end-of-life care. Upon completion, students are eligible to sit for the National Nursing Assistant Assessment Program (NNAAP) Examination for listing on the North Carolina Nurse Aide I Registry. Prerequisites: Admission to the Nurse Aide I Program.

NUR 100: Nursing Medical Terminology  
Credits: 4 (2 Class, 2 Lab/Clinical) This course is a theory and lab/clinical course which introduces concepts basic to nursing practice and the role of the associate degree nurse. The course provides the basis for student learning related to the practice of nursing including the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry. Clinical lab emphasis is placed on learning the core components and skills competencies that will be needed when caring for one or more patients in a variety of healthcare settings. Prerequisite: Admission to the nursing program. Co-requisites: Bio 168, Nur 100/HLC 102 and Mat 101.

NUR 120: Fundamentals II  
Credits: 4 (2 Class, 2 Lab/Clinical) This is a theory and lab/clinical course which introduces concepts basic to nursing practice and the role of the associate degree nurse. The course provides the basis for student learning related to the practice of nursing including the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry. Clinical lab emphasis is placed on the application of the core components and competencies when caring for one or more patients in a variety of healthcare settings. Prerequisite: NUR 110. Co-requisites: Varies based on term of enrollment: Bio 168, Nur 100/HLC 102 and Mat 101 or Bio 169 and Psy 101.

NUR 140: Behavioral Health  
Credits: 4 (2 Class, 2 Lab/Clinical) This is a theory and lab/clinical course designed to prepare the student for the role of the associate degree nurse in the provision and management of holistic care for the individual experiencing alterations in social and psychological functioning and his/her family. The course emphasizes the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry in providing care for this specific patient population. Clinical emphasis is placed on the application of the core components and competencies when caring for one or more patients in a variety of healthcare settings. Prerequisites: NUR 120. Co-requisites: Varies based on term of enrollment: Bio 169 and Psy 101 or Bio 200 and Psy 241.
NUR 150: Adult Health I
Credits: 4 (2 Class, 2 Lab/Clinical) This is a theory and lab/clinical course designed to prepare the student for the role of the associate degree nurse in the provision and management of holistic care for the adult patient and his/her family. The course emphasizes the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry in providing care for adult patients with cancer, diabetes, post-surgical procedures, or who are experiencing common cardiovascular or musculoskeletal health alterations. Clinical placement is placed on the application of the core components and competencies for one or more patients in a variety of healthcare settings. Prerequisite: NUR 140. Co-requisites: Varies based on term of enrollment: BIO 169 and PSY 101 or BIO 200 and PSY 102.

NUR 156: Transcultural Nursing
Credits 3 (1 Class, 2 Lab/Clinical) This is a clinical/community health-focused course designed to allow students the opportunity to gain insight into the health and well-being of individuals and communities in a developing country. While meeting elective requirements, there is emphasis on the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry in a transcultural experience in the country of Belize. This is accomplished through the observation of healthcare delivery, participation in nursing activities and cultural experiences. The course emphasizes cultural awareness and assessment, clinical decision-making in a non-US hospital environment and risk assessment of individuals and populations. The student will attend 90 clinical hours with an assigned course faculty member. Prerequisite: NUR 150.

NUR 160: Maternal-Neonatal Health
Credits: 4 (2 Class, 2 Lab/Clinical) This is a theory and lab/clinical course designed to prepare the student for the role of the associate degree nurse in the provision and management of holistic care for the maternal patient and her/his family. The course emphasizes the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry in providing care for adult patients with gastrointestinal, neurosensory, reproductive, respiratory or renal disorders and management. Clinical placement is placed on the application of the core components and competencies for one or more patients in a variety of healthcare settings. Prerequisite: NUR 170. Co-requisites: Varies based on term of enrollment: SOC 101 and ENG 101 or 200-Level Humanities Course and Elective.

NUR 201: Transcultural Nursing – Intensive Leadership Option
Credits: 3 (1 Class, 2 Lab/Clinical) The leadership option for NUR 201 emphasizes the development of leadership skills including, planning, organization, implementation and evaluation of specific course activities including fundraising, education and outreach as part of a transcultural nursing experience in Belize, Central America. This option occurs in tandem with NUR 156, Transcultural Nursing, a clinical/community health-focused course designed to allow students the opportunity to gain insight into the health and well-being of individuals and communities in a developing country. While meeting elective requirements, there is emphasis on the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry in providing care for the maternal/neonatal patient and his/her family. Clinical placement is placed on the application of the core components and competencies for one or more patients in a variety of healthcare settings. Prerequisite: NUR 150. Co-requisites: Varies based on term of enrollment: BIO 200 and PSY 241 or SOC 101 and ENG 101.

NUR 170: Child & Adolescent Health
Credits: 4 (2 Class, 2 Lab/Clinical) This is a theory and lab/clinical course designed to prepare the student for the role of the associate degree nurse in the provision and management of holistic care for the child/adolescent patient and his/her family. The course emphasizes the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry in providing care for the child/adolescent patient and his/her family. Clinical placement is placed on the application of the core components and competencies when caring for one or more patients in a variety of healthcare settings. Prerequisite: NUR 156. Co-requisites: SOC 101 and ENG 101.

NUR 210: Advanced Nursing I
Credits 3 (4 Class, 4 Lab/Clinical) This is a theory and clinical/lab course designed to assist the student in synthesizing a holistic collaborative approach to assess, plan, intervene and evaluate outcomes of care for patients across the lifespan. The course emphasizes the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry in providing care for groups of patients with complex or multiple health problems in a variety of settings. Prerequisites: NUR 180. Co-requisites: 200-Level Humanities Course and an Elective.

NUR 220: Advanced Nursing II
Credits 3 (1 Lab/Optional, 2 Practicum) This is a clinical/lab/practicum course designed to assist the student in synthesizing a holistic collaborative approach to assess, plan, intervene, and evaluate outcomes of care for patients across the lifespan. The course emphasizes the core components of human flourishing, nursing judgment, professional identity and spirit of inquiry in providing care for groups of patients with complex or multiple health problems in a variety of settings by working with an individually assigned staff RN in assuming the roles of the Associate Degree Nurse within the discipline of nursing. Prerequisites: NUR 210. Co-requisites: Varies based on term of enrollment: 200-Level Humanities Course and an Elective or none.

NUR 301: Transition to Baccalaureate Nursing
Credits: (4 Class) This course explores career options such as public health, home health, occupational health, forensics, case management and school nursing.

NUR 450: Capstone Project
Credits: 4 (4 Class) The student chooses an area of practice to exemplify transition to baccalaureate nursing. Combining cultural understanding for an appropriate nursing population (community or global), the student will incorporate evidence-based practice, informatics, leadership, professional practice, healthcare policy and inter-professional collaboration to result in an effective change. The culmination of which will include scholarship dissemination through a poster presentation. Culminating course of the RN-BSN program – must be taken during the last semester of RN-BSN nursing courses.

PHI 201: Ethics
Credits: (3 Class) This course introduces theories about the nature and foundations of moral judgments and applications to contemporary moral issues. Ethical systems studied in the course will examine specific case studies. Upon completion of the course, students should be able to apply various ethical theories to individual moral issues. Prerequisite: ENG 101. Offered fall and summer only.

PHI 301: Philosophy
This non-credit course is a didactic and clinical course designed to provide the student with the knowledge and skills needed to perform accurate, safe and reliable collection, transportation and processing of blood specimens for laboratory analyses.
PSY 101: General Psychology
Credits: 3 (3 Class) An overview of general topics in the science of behavior including such topics as learning, motivation, personality, sensation, and perception, and adjustment. This general studies class fulfills a social/behavioral sciences requirement for students enrolled in a degree program. Offered fall and summer only.

PSY 241: Human Growth and Development
Credits: 3 (3 Class) A study of the development of the individual from conception to death. Major concepts are acquired through study of the stage and developmental tasks in terms of physical, emotional, social and intellectual growth. This general studies class fulfills a social/behavioral sciences requirement for students enrolled in a degree program. Prerequisite: PSY 101.

RAD 101: Introduction to Patient Care
Credits: 2 (2 Class) This is a theory course which introduces students to concepts of basic patient care. The course provides students with an introduction to the essential and supporting elements of the radiologic imaging process to include communication, professional behaviors, radiation safety and protection, and legal-ethical considerations. Emphasis is on developing skills essential to patient care and assessment, and written and oral communication. Prerequisite: Admission to the radiologic technology program.

RAD 110: Applied Radiography I
Credits: 4 (3 Class, 1 Lab) This is a theory and lab course which introduces the student to concepts basic to Radiologic Technology. The course provides an introduction to the essential and supporting elements of the radiologic imaging process to include procedure methods, radiation protection, equipment operation, image evaluation and legal-ethical considerations. Lab emphasis is on developing skills essential to patient care and assessment, written and oral communication, radiation safety, and professional development. Prerequisites: RAD 101, 110, 115, 130, 135, 140, 150, 155, 160.

RAD 135: Practicum Education II
Credits: 4 (3 Class, 1 Lab) This is a theory and lab course designed to focus on radiographic procedure methods for radiography of the lower extremity, vertebral column, genitourinary and gastrointestinal systems. Students will also participate in community and professional development activities that promote lifelong learning. Prerequisite: RAD 101, 110, 115, 130, 135, 140.

RAD 150: Applied Radiography III
Credits: 3 (3 Class) This is a theory course designed to provide the student with a base of knowledge from which practicing radiographers can make informed decisions about technical factors and diagnostic image quality. Included will be concepts of the science and technology of imaging, basic concepts of mathematics, fundamentals of physics, the atom, electromagnetism and the X-ray imaging system. Additionally, this course provides an in-depth study of X-ray production and X-ray interaction with matter. Prerequisite: RAD 101, 110, 115.

RAD 140: Radiation Physics
Credits: 4 (4 Class) This course is designed to provide the student with a base of knowledge from which practicing radiographers can make informed decisions about technical factors and diagnostic image quality. Included will be concepts of the science and technology of imaging, basic concepts of mathematics, fundamentals of physics, the atom, electromagnetism and the X-ray imaging system. Additionally, this course provides an in-depth study of X-ray production and X-ray interaction with matter. Prerequisite: RAD 101, 110, 115.

RAD 155: Practicum Education III
Credits: 3 (3 Practicum) This course is a continuation of Radiologic Technology Practicum II. Emphasis is placed upon the enhancement of critical thinking problem-solving skills as the student continues to develop and demonstrate competency in the performance of diagnostic imaging procedures. Learning objectives and remaining competencies will be completed through structured sequential assignments at designated clinical facilities. Prerequisites: RAD 101, 110, 115, 130, 135, 140.

RAD 160: Imaging I
Credits: 2 (2 Class) This course is designed to provide the student with a base of knowledge from which practicing radiographers can make informed decisions about technical factors and diagnostic image quality. It provides an in-depth study of X-ray production and X-ray interaction with matter. In addition, photographic and geometric properties of images will be studied as well as the effects of scatter radiation. Lab sessions will be incorporated into the course to emphasize the components of the lecture material. Prerequisite: RAD 101, 110, 130, 140.

RAD 210: Applied Radiography IV
Credits: 3 (3 Class) This is a theory course which introduces the student to basic pathophysiology and the radiographic manifestation of disease. Students will continue to develop and demonstrate an increased degree of competence in their performance of the skills related to diagnostic imaging. Students will also participate in community and professional development activities that promote lifelong learning. Prerequisites: RAD 101, 110, 130, 140, 150, 160.

RAD 215: Practicum Education IV
Credits: 4 (4 Practicum) This course is a continuation of Radiologic Technology Practicum III. Emphasis will be placed upon the enhancement of image production and evaluation skills, independent judgment and decision-making and the performance of more complex imaging procedures such as computed tomography (CT) and magnetic resonance imaging (MRI). Continued practice opportunities and the demonstration of skills typical of entry-level practitioners is also emphasized. Learning objectives and remaining competencies will be completed through structured sequential assignments at designated clinical facilities. Prerequisites: RAD 101, 110, 115, 130, 135, 140, 150, 155, 160.

RAD 220: Imaging II
Credits: 4 (3 Class, 1 Lab) This course is designed to build on the student’s knowledge of the principles and procedures presented in RAD 140 and RAD 160. An in-depth study of electronic equipment used in radiography and fluoroscopy, image receptors, digital radiography and fluoroscopy, fluoroscopy equipment, quality assurance and quality control factors are presented. Prerequisites: RAD 101, 110, 130, 140, 150, 160.

RAD 230: Applied Radiography V
Credits: 3 (3 Class) This course is designed to enhance expertise in all radiographic imaging procedures, patient care, phlebotomy, professional development, radiation protection, and image production and evaluation. Students will also participate in community and professional development activities that promote lifelong learning. Prerequisites: RAD 101, 110, 130, 140, 150, 160, 210, 220.

RAD 235: Practicum Education V
Credits: 4 (4 Practicum) This course is a continuation of Radiologic Technology Practicum IV. Emphasis will be placed upon competency demonstration in the delivery of more complex imaging procedures, critical thinking and the successful integration of didactic and clinical components required for certification. Continued practice opportunities and the demonstration of skills typical of entry-level practitioners is also emphasized. Learning objectives and remaining competencies will be completed through structured sequential assignments at designated clinical facilities. Prerequisites: RAD 101, 110, 115, 130, 135, 140, 150, 155, 160, 210, 215, 220.

RAD 240: Radiation Protection
Credits: 4 (4 Class) This course is designed to give the student an understanding of the essential information on radiation protection and the biological effects of ionizing radiation. Building from basic to more complex concepts, this course will cover radiation physics, cell structure, effects of radiation on humans at the atomic and cellular levels, regulatory and advisory limits for human exposure to radiation and the implementation of patient and personnel radiation protection practices. Prerequisites: RAD 101, 110, 130, 140, 150, 160, 210, 220.
RMI 440 Research & Evidence-Based Practice
This course provides an introduction to quantitative and qualitative research methodology and evaluation. Theories, methodologies, data collection, analysis, and interpretation of data will be presented. The student will also learn to identify levels of evidence and incorporate evidence into clinical practice.

RMI 450 Capstone Project
This course will provide opportunities to incorporate evidence-based practice, informatics, leadership, professional practice, healthcare policy and inter-professional collaboration to improve clinical practice. Students will utilize a variety of methods to disseminate findings and document implementation of improved methods. Pre/co-requisite: RMI 440

RTT 210: Introduction to Radiation Therapy Procedures
Credits: 3 (3 Class) This course provides an overview of radiation therapy principles and procedures. Emphasis is placed upon the organization of healthcare systems and the delivery of cancer care. Topics include healthcare and program policy, professional responsibility, multi-disciplinary cancer care, history and origins of radiation therapy and principles of treatment set-up and delivery. Co-requisites: RTT 215, 220, 230, 240.

RTT 211: Quality Management
Credits: 2 (2 Class) This course provides an overview of quality management in radiation oncology. Emphasis is placed upon operations testing and evaluation of simulators, megavoltage units, treatment planning systems and brachytherapy equipment. An examination of regulatory guidelines and related legal implications is included. Prerequisites: RTT 230; Co-requisites: RTT 221, 231, 241, 250.

RTT 215: Oncology Nursing and Patient Care
Credits: 3 (3 Class) This course provides an in-depth study of oncology patient care with an emphasis on assessment and management of medical conditions specific to patients with cancer. Topics include screening and prevention, patient and community education, communication, care standards, research and protocols, treatment options, management of site-specific treatment effects, prevention of treatment complications and the psychological impacts of cancer. Co-requisites: RTT 210, 220, 230, 250.

RTT 220: Oncology I
Credits: 3 (3 Class) This course provides an in-depth study of the principles of neoplastic development. Emphasis is placed upon cancer development in specific anatomic regions and the selection of treatment. Topics include neoplastic mechanisms, diagnostic procedures, cross-sectional anatomy, physiology, etiology and epidemiology, signs and symptoms, tumor staging and grading, treatment options and prognostic indicators for malignancies of the major body organs and systems. Co-requisites: RTT 210, 215, 230, 240.

RTT 221: Oncology II
Credits: 3 (3 Class) This course provides a progressive study of neoplastic development. Continued emphasis is placed upon cancer development in specific anatomic regions and an examination of current treatment options. Prerequisites: RTT 220. Co-requisites: RTT 211, 231, 241, 250.

RTT 222: Oncology Decisions
Credits: 4 (4 Class) This course provides an opportunity to utilize problem-solving to address complex issues related to radiation oncology treatment delivery and patient care. Emphasis is placed upon utilization of previously acquired knowledge to address a variety of clinical situations and to optimize treatment outcomes. Prerequisites: RTT 221. Co-requisites: RTT 232, 242, 260, 270.

RTT 230: Radiation Therapy Physics
Credits: 4 (4 Class) This course introduces the principles of physics pertinent to the use of radiation in the clinical setting. Topics include the structure of matter, principles of electromagnetism, fundamentals of X-ray production, and relative units, nuclear transformations, interactions of ionizing radiation and measurement of radiation. Co-requisites: RTT 210, 215, 220, 240.

RTT 231: Dosimetry
Credits: 4 (4 Class) This course provides an in-depth study of radiation dose measurement and treatment delivery. Emphasis is placed upon calibration procedures, absolute and relative dosimetry, electron and photon beam characteristics, field parameters, dose calculations and beam compensation. Prerequisites: RMI 440. Co-requisites: RTT 230.

RTT 232: Treatment Planning
Credits: 3 (3 Class) This course provides an in-depth study of radiotherapy planning procedures. Emphasis is placed upon data acquisition, image reconstruction, image acquisition and image fusion, computer-aided planning, plan evaluation and optimization, target and critical structure identification and prescription variations. A discussion of current and developing treatment methods in correlation with each anatomic region will be included. Prerequisites: RTT 231. Co-requisites: RTT 222, 242, 260, 270.

RTT 240: Radiation Therapy Practicum I
Credits: 4 (4 Practicum) This course provides an opportunity to apply concepts and develop the skills needed to provide patient-centered care. Emphasis is placed upon the use of critical thinking and problem-solving to analyze, evaluate and integrate foundational concepts into clinical practice. Students will complete required objectives and competencies through structured sequential assignments at designated clinical facilities. Co-requisites: RTT 210, 215, 220, 230.

RTT 241: Radiation Therapy Practicum II
Credits: 4 (4 Practicum) This course is a continuation of Radiation Therapy Practicum I. Students are expected to progress toward integration of fundamental and advanced concepts. Required objectives and competencies will be completing through structured sequential assignments at designated clinical facilities. Prerequisites: RTT 240. Co-requisites: RTT 211, 221, 231, 250.

RTT 242: Radiation Therapy Practicum III
Credits: 3 (3 Practicum) This course is a continuation of Radiation Therapy Practicum II. Emphasis will be placed upon continued practice opportunities and the demonstration of skills typical of entry-level practitioners. Remaining objectives and competencies will be completed through structured sequential assignments at designated clinical facilities. Prerequisites: RTT 241. Co-requisites: RTT 222, 232, 260, 270.

RTT 250: Radiation Biology & Health Physics
Credits: 3 (3 Class) This course provides an overview of the molecular, cellular and systemic effects of ionizing radiation. Emphasis is placed upon radiation effects, regulations and principles of safety associated with the practice of radiation oncology. Prerequisites: RTT 230. Co-requisites: RTT 211, 221, 231, 241.

RTT 260: Research
Credits: 1 (1 Class) This course is designed to assess the student's ability to process and disseminate information related to the treatment and care of cancer patients. A literature review, data analysis and presentation will be completed. Prerequisites: RTT 210, 240, 241. Co-requisites: RTT 222, 232, 242, 270.

RTT 270: Radiation Therapy Seminar
Credits: 3 (3 Practicum) This course provides comprehensive integration of key principles and tenets of radiation therapy. Emphasis is placed upon preparation for the national certification exam. Prerequisites: RTT 211, 221, 231, 241, 250. Co-requisites: RTT 222, 232, 242, 260.

SBB 010: Specialist in Blood Bank Technology/Transfusion Medicine I
This non-credit online course comprises units of study on education principles, research methods, laboratory operations, laboratory mathematics, in an in-depth study of blood products and concepts of immunology, physiology and pathophysiology as they relate to immunohematology. Clinical components are required for completion of this course. Pre-requisite: Admission to the Specialist in Blood Bank Technology Program.

SBB 020: Specialist in Blood Bank Technology/Transfusion Medicine II
This non-credit online course comprises units of study on blood group systems, routine and special serology including molecular testing, transfusion practice, laboratory mathematics, transplantation and adverse effects of transfusion. Topics will include columns of clinical components and a satisfactory Capstone project are required for completion of this course. Prerequisite: SBB 010.

SIM 101: Foundations of Simulation I
Credits: 3 (3 Class) The purpose of this course is to introduce and provide an overview of core concepts of healthcare simulation best practices including education, operations, research, assessment, and administration. Topics will include history of simulation and current trends, educational theory, simulation curriculum planning, design, implementation, and evaluation, simulation operations and technology, introduction to simulation research, simulation standards and accreditation, quality and patient safety, roles and responsibilities, policies and procedures, psychological safety, and ethical considerations.

SIM 102: Foundations of Simulation II
Credits: 3 (3 Class) The purpose of this course is to expand and practically apply core concepts from foundations I to include interactive case studies, observations, and table-top scenarios. Introduction of advanced concepts in healthcare simulation will include interprofessional education, human factors, systems integration, summative assessment, root cause analysis, and latent safety issues. Prerequisite: SIM 101
SIM 210: Education in Healthcare Simulation
Credits: 2 (2 Class) The purpose of this course is to provide learners the opportunity to gain knowledge and skills in planning, designing, implementing, and evaluating simulation education curriculum. Topics include problem identification and general needs assessment, targeted needs assessment, outcomes and objectives, educational strategies, implementation, evaluation and feedback, scenario design, simulation modalities, and debriefing best practices. Prerequisite: SIM 102; Corequisite: SIM 211

SIM 211: Education in Healthcare Simulation Practicum
Credits: 1 (1 Lab) This course provides hands on experiences and mentorship from an experienced simulation educator. Prerequisite: SIM 102; Corequisite: SIM 210

SIM 220: Simulation Operations and Technology
Credits: 2 (2 Class) The purpose of this course is to provide learners the opportunity to gain knowledge and skills in simulation operations and technology. Topics include simulation modalities, computer networking, scenario programming, moulage and model making, manikin and task trainer care and maintenance, and technology troubleshooting. Prerequisite: SIM 210 and SIM 211; Corequisite: SIM 221

SIM 221: Simulation Operations and Technology Practicum
Credits: 1 (1 Lab) This course provides hands on experiences and mentorship from an experienced simulation operations specialist. Prerequisite: SIM 210 and SIM 211; Corequisite: SIM 220

SIM 230: Research and Assessment in Healthcare Simulation
Credits: 2 (2 Class) The purpose of this course is to provide learners the opportunity to gain knowledge and skills in 1) simulation research design and implementation and 2) advanced concepts in assessment and evaluation. Topics include simulation research design process, simulation research methods (quantitative, qualitative, mixed methods), reliability and validity, assessment tools, summative and formative assessment, and regulatory considerations. Prerequisites: SIM 220 and SIM 221.

SIM 240: Administration in Healthcare Simulation
Credits: 2 (2 Class) The purpose of this course is to provide learners the opportunity to gain knowledge and skills in administrative oversight of a simulation program. Topics include finances (capital and operations), policy and procedures, strategic planning, managing resources, personnel, equipment, and space, accreditation standards, scheduling, usage statistics, and return on investment/return on value. Prerequisite: SIM 230

SIM 250: Simulation Capstone
Credits: 4 (4 Class) The student chooses an area of practice to further explore and apply the knowledge acquired in their academic studies. Collaborating with simulation experts, the student will design, implement, and evaluate a simulation project that incorporates simulation best practices and current simulation trends in that area. The completion of the project includes scholarship dissemination through a podium or poster presentation to a group of choice. Culminating course of the BSHS Simulation program – must be taken during the last semester of BSHS Simulation courses.

SOC 101: Introduction to Sociology
Credits: 3 (3 Class) In this course, students will learn about the theories and methods of investigation used by sociologists to identify patterns in human behaviors and attitudes. Various social institutions and agents of socialization, including but not limited to the institutions of family, education and the economy will be examined. In addition, social factors such as culture, race, class, gender and their influences on the social experience will be explored. This general studies class fulfills a social/behavioral sciences requirement for students enrolled in a degree program.

SOC 210: Diversity and Inclusion
Credits: 3 (3 Class) This course examines comparisons of diverse roles, interests, opportunities, contributions and experiences in social life. Topics include race, ethnicity, gender, sexual orientation, class and religion. Upon completion, students will be able to analyze how cultural and ethnic differences evolve and how they affect personality development, values and tolerance. Pre-requisite: ENG 101.

BOARDS OF DIRECTORS
Ginger Walker, Chair of the Board
Diploma, Carolinas College of Health Sciences
Vicki Block
MBA, Xavier University
BS, University of Akron
Tena Drayton
MBA, Northwestern University
