

Radiation Therapy Program

Program Mission

The mission of the **Radiation Therapy Program** is to engage students in active learning; empowering them to build knowledge, develop skills, and become competent, entry-level radiation therapists.

Program Goals

To provide the radiation therapy community with graduates that:

- **Competently administer prescribed courses of treatment. Students will be able to:**
 - Demonstrate accurate utilization of treatment delivery skills.
 - Acquire patient data needed to plan a course of treatment. Utilize positioning techniques that ensure proper beam placement.
 - Demonstrate an understanding of processes used to plan a course of treatment.
- **Employ critical thinking to solve problems. Students will be able to:**
 - Assess the patient condition during a course of treatment.
 - Assess equipment function.
 - Evaluate the quality of a planned course of treatment.
- **Utilize effective communication skills. Students will be able to:**
 - Utilize situation appropriate oral communication.
 - Properly employ written communication skills.
- **Exhibit professional behaviors. Students will be able to:**
 - Demonstrate a sense of accountability.
 - Exhibit integrity.
