

South Piedmont AHEC Portfolio Program

Maintenance of Certification

South Piedmont AHEC sponsors activities through the American Board of Medical Specialties (ABMS) Portfolio Program that promote our quality and safety improvement aims and while helping you earn continuing certification (MOC) credit from a participating ABMS Member Board or from the National Commission on Certification of Physician Assistants (NCCPA). Activities can be large in scale to address systemic and clinical issues or smaller activities to improve a specific area of practice.

Participation in an activity will:

- Stimulate creativity in developing new initiatives for further clinical and system improvement.
- Influence change throughout the organization that results from successful activities.
- Provide MOC Part IV credit towards your board certification cycle.

What the South Piedmont AHEC Portfolio Program can do for you:

- Help you develop an activity to meet board requirements for meaningful participation.
- Submit approved activities and attestations of participation to the ABMS Portfolio Program.
- Assist with retaining required activity documentation.
